¹ Partly estimated.
² Comprises main, P. B. X. (those directly connected with private branch exchanges), and extension telephones.
³ Includes county, municipal, and other taxing-district taxes. Excludes excise taxes collected by telephone carriers from users of telephone services.
⁴ Includes data for Canada and the Key West-Havana cables, not shown separately.
⁵ Includes \$706,000 not distributed by States.

¹ Data for Western Union included in domestic telegraph; not segregable between domestic telegraph and ocean-cable operations. ² Includes long-term advances from affiliates.

³ Principally as estimated by reporting carriers on basis of actual counts for test periods.

⁴ Beginning 1945, includes press messages on an unequated basis; prior to 1945, they were included on an equated basis. ⁵ Includes depreciation and operating taxes.

⁶ After recorded provision for Federal income taxes including those on non-communications activities.

⁷ Deficit or other reverse item.

⁸ For 1930, end of June; for 1935-1945, end of December; thereafter, end of October.

¹ Pole and wire mileages reflect acquisition on Oct. 7, 1943, of facilities of Postal Telegraph Companies.

² In use chiefly on the company's trunk lines through 1952; beginning 1953, represents all telegraph circuits.

³ Excludes agency and commission offices, numbering 10,932 on Dec. 31, 1956.

⁴ Figures for 1915 and prior years represent net income before bond interest.

Special emergency	1,429	1,839	2,344				
State guard	139	198	20				

¹ Each license, construction permit, or combination construction permit and license is counted as one station; therefore, a station might include a transmitter and many mobile units.

² Stations licensed or holding construction permits.

³ Not tabulated in 1954 or 1955. International broadcast stations are now counted by individual licenses, not by the number of transmitters. Present figures include 1 experimental operation.

⁴ Issuance of radiotelephone licenses discontinued Feb. 1, 1954.

No. 652.—BOOKS—NEW BOOKS AND NEW EDITIONS PUBLISHED, BY SUBJECT: 1950 TO 1956

[Data based on reports from approximately 800 publishers. To assure as complete a coverage as possible, reports are checked against book reviews and notices and against card index of the Library of Congress. New books are new titles; new editions are revisions of trade or textbooks, and cheaper editions of original trade books. Data exclude pamphlets, theses, reports, and reprints (containing no change whatsoever from original publication)]

Section 19

Power

This section presents statistics relating to the supply, production, and distribution of power and energy. The principal sources of these data are the Federal Power Commission, and the Bureau of Mines of the Department of the Interior.

The Federal Power Commission publishes various statistical reports, including *Production of Electric Energy and Capacity of Generating Plants*, which present data on the production of electric energy classified by type of prime mover and on the capacity of all generating plants classified by type of prime mover. These reports also include statistics on quantities of basic fuels used (coal, oil, natural gas, etc.) and on water as an actual and potential source of power. The Commission's data cover both generation for public use by electric utilities and for use by the producer where generated by nonutility establishments. Data on sales, revenues, and numbers of customers by classes of service, on rates and typical bills, and related matters are also issued at regular intervals by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes, and other costs of production appear in the Commission's series entitled *Electric Power Statistics*.

The Federal Power Commission has uniform systems of accounts for public utilities subject to its jurisdiction and for its licensees. The Commission compiles data from the following periodic reports: Annual reports of electric utilities containing information as to assets, liabilities, revenues, generating capacity, and number of consumers; power system reports of electric utility systems presenting generating capacity, transmission facilities, and loads and load characteristics; monthly and annual reports containing such information as production of electricity for public use, fuel consumed, and stocks of fuel on hand; and reports from electric utilities and industrial corporations with respect to their electric power requirements and supply.

The Bureau of Mines' annual *Minerals Yearbook* presents statistics on coal, oil, and natural gas production and utilization. Other important sources of data include the American Gas Association, which in its monthly bulletins and annual statistical issues (such as *Gas Facts*) presents data on natural gas utilization and the production of manufactured gas from coal, oil, and similar products; and the *Statistical Bulletin* of the Edison Electric Institute, issued monthly and annually, which presents data on the distribution of electric energy by public utilities.

Related materials are presented in other sections of this volume. Thus, statistics on production, value, and consumption of coal, oil, and natural gas are presented in section 28, Mining and Mineral Products; statistics compiled by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries on the use of power by manufacturing, extracting, and related industries are also presented in section 28, and in section 30, Manufactures.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series G 159-170") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on April 15, 1957, when the material was organized and sent to the printer. In some instances, more recent data were added later.

No. 654.—ENERGY FROM MINERAL FUELS AND WATER POWER—ANNUAL SUPPLY, 1900 TO 1955, AND CONSUMPTION, 1920 TO 1955, BY SOURCE

[In trillions of British thermal units. Unit heat values employed are: Anthracite, 12,700 B. t. u. per pound; bituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 5,800,000 B. t. u. per barrel; natural gas, total production multiplied by 1,075 B. t. u. minus repressuring vent and waste gas multiplied by 1,035. Water power includes installations owned by manufacturing plants and mines, as well as Government and privately owned public utilities. Fuel equivalent of water power calculated from kilowatt-hours of power produced wherever available, as is true of all public utility plants since 1919. Otherwise, fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 percent for factories and mines and of 40 percent for public utilities. See also *Historical Statistics*, series G 159-170]

YEAR	Total	Water power	COAL		Crude petroleum ¹	Natural gas ²	PERCENT				
			Anthra-cite	Bitu-minous and lignite			Water power	Coal		Crude petroleum ¹	Natural gas ²

¹ Not available.

² Noncentral stations distributed to other publicly owned classes on the basis of actual ownership.

³ Comprises production and capacity of approximately 2,668 industrial electric power plants of 100 kilowatts and over in 1955, including amounts for stationary electric power plants of railroads and railways.

⁴ Each prime mover type in combination plants counted separately.

⁵ Based on capacity in service at end of year.

Source: Federal Power Commission; annual report, *Production of Electric Energy and Capacity of Generating Plants*, and industrial electric power summaries; also related monthly reports for 1956.

Kilowatt-hours per customer.....	4, 396	3, 943	4, 833	7, 172	7, 180	8, 180	8, 246
Annual bill, average.....dollars.....	85. 72	82. 41	92. 31	129. 10	130. 68	146. 42	150. 90
Revenue per kilowatt-hour.....cents.....	1. 95	2. 09	1. 91	1. 80	1. 82	1. 79	1. 83

¹ Census figures; relate to Apr. 1 for 1940 and 1950, Jan. 1 for 1945, and Nov. for 1954.
² Represents cooperatives only and excludes customers of all other agencies (companies and municipals) financed in whole or in part by REA.
³ Customers served by municipal systems and various power districts not financed by REA.
⁴ "Eastern farms" are those located in the area not affected by heavy irrigation pumping and their statistics are a measure of use of electricity on the average farm. "Western farms" are those where irrigation may be involved. Possibly less than one-fifth of farms in irrigation States do actual pumping, but statistics are not available to make a more accurate separation. Figures for "Western farms," therefore, are more a reflection of fluctuation in the energy used than they are of the conventional farm requirements.

¹ Net; i. e., excludes loans rescinded. For years prior to 1948, includes amounts not yet under loan contract.
² Organizations, mainly cooperatives, to which loans for extending central station electric service in rural areas are made.
³ Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Dec. 31, 1956, there were 47 such borrowers, with 12,118 miles energized and 54,510 consumers served.
⁴ Rural electric distribution, generation, and transmission systems operated by REA borrowers.
⁵ Pole miles of electric distribution and transmission line in service.
⁶ Through 1954, this item was headed "Consumers connected." The change was a result of a revised definition of a consumer as reported by REA borrowers, effective Jan. 1, 1955. It resulted in a downward adjustment in the national total of about 60,000 for 1955, chiefly through elimination of idle services.
⁷ Includes energy sales and revenues of power sold by one REA borrower to another. ⁸ Not available.

No. 667.—GAS UTILITY INDUSTRY—CUSTOMERS AND REVENUES, BY CLASS OF SERVICE: 1932 TO 1956

[Covers natural, manufactured, mixed, and liquid petroleum gas. Based on questionnaire mailed to all privately owned gas utilities and municipally owned gas departments in the United States, except those with annual revenues less than \$25,000, which in the aggregate account for only a negligible portion of the industry]

¹ Represents those whose employment plus any first-tier subcontractor's employment total 50 or more; operating contractors comprise those engaged in production, research and development, maintenance, and service; excludes supply contractors.

² As of December 31.

³ Includes those under construction.

⁴ Under construction.

⁵ Applications to construct and operate are filed simultaneously; conversions from construction permits to licenses to operate are made upon satisfactory completion of construction.

⁶ Under construction prior to the Atomic Energy Act of 1954; consequently, excluded from construction permit figures but reported under licenses to operate.

Source: Atomic Energy Commission; semiannual reports and records.

FIG. XXXI.—SPEED OF MOTOR VEHICLES: 1942 TO 1956
[See table 600]

Sources: Department of Commerce, Bureau of Public Roads.

Section 20

Roads and Motor Vehicles

This section presents statistics relating to the mileage, control, and financing of public roads and to motor-vehicle travel and usage. The Bureau of Public Roads of the Department of Commerce is the principal compiler of data concerning public roads and motor-vehicle registrations. Since 1945, it has published such data in its annual *Highway Statistics*. For statistics prior to 1945, the same Bureau's *Highway Statistics, Summary to 1945*, presents public roads data carried back over periods ranging from 20 to 50 years. The motor-vehicle registration figures which appear in *Highway Statistics* are compiled from reports and records of State highway departments.

The first road mileage survey was made in 1904. Data for 1904 and other road mileage surveys made in 1909, 1914, and 1921 appear in Department of Agriculture Bulletin 1279, *Rural Highway Mileage, Income, and Expenditures, 1921-22*.

Two useful handbooks of statistics in this field are issued annually by the Automobile Manufacturers Association of Detroit, Michigan. These are *Automobile Facts and Figures* and *Motor Truck Facts*. In addition, the Bureau of the Census compiles and publishes statistics on the motor vehicles and equipment industry which appear in the *Census of Manufactures* reports and in its *Annual Survey of Manufactures*. Data from these reports are also included in section 30, *Manufactures*, in this volume.

Rural and other roads.—The term "rural" as used here may be roughly defined as the area which lies outside of communities having 2,500 inhabitants or more. "Urban extensions" are continuations of designated State-system roads in or through cities or towns of 2,500 inhabitants or more. "County and other local roads" are rural roads over which the State exercises no direct control.

Highway systems.—The Federal-Aid Highway Act of 1916 provides for the sharing of highway construction costs between the States and the Federal Government with the initiative retained by each State for choosing projects and carrying them out. The planning and development of Federal-aid systems began in 1921. Federal funds share with State funds in costs of engineering, construction, and right-of-way acquisition on the designated systems while other charges, such as maintenance and policing, are borne entirely by the States and local agencies.

The Federal-aid primary system connects all of the principal cities, county seats, ports, manufacturing areas, and other traffic generating areas. In general, these are at the same time the main State trunkline roads. Certain sections of the primary system are more important than others from the viewpoint of national interest. Consequently, in 1944, the Congress authorized the creation of the national system of interstate highways, not to exceed 40,000 miles in length. In 1956 Congress extended the system to 41,000 miles and authorized for the first time a long-range program to complete the system. Federal funds of \$25 billion, providing 90 percent of the total estimated cost, are authorized for the fiscal years 1957 to 1969.

The Federal-Aid Highway Act of 1944 authorized the first specific funds for Federal-aid highways in urban areas, and established the Federal-aid secondary system, consisting of important feeder roads linking the farms, factories, distribution outlets, and smaller communities with the primary system.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series K 177-181") provide cross-references, where applicable, to *Historical Statistics of the United States, 1782-1945*. See preface.

Note.—This section presents data for the latest census year or period available on April 29, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

No. 675.—EXISTING MILEAGE OF RURAL ROADS: 1921 TO 1955

[In thousands of miles. As of December 31. Rural roads comprise roads outside incorporated areas and certain of the more populous unincorporated areas. Figures cover continental U. S. See also *Historical Statistics*, series K 177-181]

Disbursements of State-highway funds ⁸	do.	1,330,545	1,678,009	1,299,381	3,561,513	5,720,432

¹ Includes secondary State systems and some municipal street mileage in State systems. Not comparable with subsequent years, since county road mileage had not yet been taken over by State highway departments.

² Through 1945, low type was distinguished from high type by quality of surfacing material used; for 1950 also by rigidity of base; and for 1954, combined thickness of surface and base was an added consideration.

³ Not available

⁴ Beginning 1940, includes connecting streets not under State control. Beginning 1950, excludes streets of this type in Kentucky, Maryland, Mississippi, and District of Columbia. May include the municipal portion of a State route entering a city or town

⁵ Mileage of State park, forest, institutional, toll, and other roads under State control.

⁶ Represents State-controlled only.

⁷ Includes funds transferred to or from local units and proceeds of highway-user imposts allotted by the State treasurer for county and other local roads and streets, and nonhighway purposes. See also tables 685 and 686.

⁸ Includes accumulated reserves.

¹ Excludes vehicles owned by military services.² As reported. State registration requirements differ widely.³ Comprises registration fees, certificates of title, transfer or registration fees, permits, fines, etc.; excludes motor-fuel and motor-carrier taxes, for California, includes \$87,981,877 vehicle license fees and for Washington, \$14,901,309 motor-vehicle excise taxes.⁴ Comprises fees for registration of automobiles (including taxicabs), buses, trucks and tractor trucks, trailers, and motorcycles. ⁵ Commercial full trailers included with trucks.⁶ In Vermont, trucks under 1,500 pounds capacity, and in Oregon, trucks with gross weight of 6,000 pounds or less, included with automobiles, in most States, similar light trucks comprise half or more of all trucks registered.⁷ Includes 1,626 automobiles of the diplomatic corps.⁸ Represents publicly owned only. Heavy semitrailers registered with tractors (as a unit). Automobile trailers not required to register.Source: Department of Commerce, Bureau of Public Roads; annual report, *Highway Statistics, 1955*.

Section 21

Transportation, Air and Land

This section presents statistics concerning the systems of mass transport of persons and goods by land and air. The modes of transport included are railway, trucking, bus and streetcar, and civil aviation. The principal sources of these data are *Transport Statistics in the United States*, Part 1 (formerly *Statistics of Railways in the United States*), published annually by the Interstate Commerce Commission; the *Transit Fact Book* (relating to street railways) published annually by the American Transit Association, and the *Statistical Handbook of Civil Aviation* published by the Civil Aeronautics Administration. Various periodic reports such as the *Monthly Report on Transportation Statistics* and the quarterly (also annual) *Statistics of Class I Motor Carriers* (beginning in 1954, issued as Part 7 of *Transport Statistics*) are issued by the Interstate Commerce Commission. In addition, the Association of American Railroads supplements official railway statistics with various releases, and the annual review and statistical number of *Fleet Owner* (*Bus Transportation* prior to January 1957), a McGraw-Hill publication, summarizes operations of common carrier and school buses. The Interstate Commerce Commission also issues annually *Selected Financial and Operating Statistics from Annual Reports of Electric Railways* (beginning in 1954, issued as Part 4 of *Transport Statistics*), an abstract of the annual reports of electric railway companies, chiefly interurban, which report to it. The Bureau of the Census published a quinquennial report on electric railways from 1902 to 1937. The report included data on affiliated trolley-bus and motor-bus operations in the latter period of its history.

Railways.—The total railroad mileage of the United States comprises: (1) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission; (2) switching and terminal railroads, also reporting to the Commission; and (3) private railroads (identified by the Commission as “circular” because they report on brief circulars, or as “unofficial” when their reports are received too late for tabulation). Except for certain mileage data, the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries comprise proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, determined by their annual operating revenues: Class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports have been required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Note.—This section presents data for the most recent year or period available on April 29, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

Motor carriers.—Statistics of class I for-hire carriers (those with \$100,000 or more of gross annual operating revenues) are compiled by the Interstate Commerce Commission from annual and quarterly reports submitted to it by these carriers. Beginning with reports for the year 1950, the class I minimum became \$200,000. This series begins with 1939 data.

Civil aeronautics.—Federal promotion and regulation of civil aviation are carried out by two bodies—the Civil Aeronautics Administration and the Civil Aeronautics Board. The Civil Aeronautics Board prescribes Civil Air Regulations which deal with the competency of airmen, airworthiness of aircraft, and air traffic control. The Board also issues certificates permitting persons to engage in air transportation as a business, fixes air-mail rates which they may charge, and may establish maximum and minimum rates for transportation of passengers and goods. It also has the duty of investigating accidents in air transportation. The Board also hears prosecutions brought by the Administrator of Civil Aeronautics in connection with the revocation and suspension of airmen and air carrier certificates as a result of violations of the Civil Air Regulations.

The Civil Aeronautics Administration is an operating agency of the Department of Commerce. Its principal activities are the operation of air route traffic control centers, airport traffic control towers, and communication stations; and the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment for the airways. It also promotes safety through the certification of planes, pilots, mechanics, and air agencies, such as flight and ground schools; checks the design, structure, and performance of new planes to insure the safety of the flying public; and investigates accidents to fixed-wing aircraft of 12,500 pounds or under (with the exception of those used in Alaskan air carrier operations). The CAA also acts in an advisory capacity in the design and construction of airports; administers the Federal Aid Airport Program; provides technical civil aviation assistance in foreign countries and arranges for the technical aeronautical training of foreign nationals in the United States; and conducts technical research and development programs.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series K 28-33") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 699.—VOLUME OF DOMESTIC INTERCITY FREIGHT TRAFFIC, BY TYPE OF TRANSPORTATION: 1939 TO 1955

[In millions of ton-miles. A ton-mile is the movement of a ton (2,000 lbs.) of freight for the distance of one mile. Comprises public and private traffic and revenue and nonrevenue traffic]

¹ Includes circular and unofficial companies. ² Comprises lessors, proprietary, circular, and unofficial companies.

³ For railways reporting track by class. Excludes circular and unofficial, figures for which cover road, first track only.

⁴ Includes switching and terminal companies except as noted.

⁵ Since 1916 represents steam locomotives and freight cars of class 1 railways, excluding switching and terminal companies.

⁶ Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale, or abandonment, reclassification, etc. Includes lessor companies since 1921, for 1925 and subsequent years, includes proprietary companies except those which are part of systems filing consolidated annual reports.

⁷ Includes depreciation on "Miscellaneous physical property" for years prior to 1920. Amortization of defense projects included subsequent to 1940.

⁸ Comprises actually outstanding, nominally issued, and nominally outstanding securities, and equipment obligations. ⁹ See footnote 4, table #09.

¹⁰ Average for 1908-1910.

¹¹ Average for 1899 and 1900.

Source: Interstate Commerce Commission, annual reports, *Statistics of Railways in the United States*, and, beginning 1954, *Transport Statistics in the United States*, Part 1.

No. 708.—RAILWAYS—MILES OF ROAD OWNED, BY STATES AND FOR TERRITORIES: 1870 TO 1955

[Data are for actual length of line in each State without duplication. As of June 30 prior to 1930, Dec. 31 thereafter; includes reporting circular and unofficial railways, but beginning with 1910 excludes switching and terminal roads. See also *Historical Statistics*, series K 1, 2, and 29, for annual U. S. totals]

No. 704.—RAILWAYS (ALL REPORTING COMPANIES)—EQUIPMENT IN SERVICE: 1925 TO 1955

[For years ending December 31. "All reporting companies" include switching and terminal but not circular and unofficial lines. Data for tractive effort and capacity of cars exclude switching roads, also smaller roads during recent years; they would not be materially different if all carriers were included. Excludes the large number of cars owned by private car lines. See also *Historical Statistics*, series K 34-38]

¹ Includes proprietary companies. Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale or abandonment, reclassification, etc.

² Amortization of defense projects included subsequent to 1940. ³ Excludes returns for lessor companies.

⁴ Investment originally published is increased by \$170,000,000, estimated reserve for accrued depreciation, to make figures comparable with those of other years.

⁵ Comparable figure not available.

⁶ Excludes returns for class II and class III companies.

No. 719.—RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1955

[For years ending June 30 prior to 1916; December 31 thereafter. For various reasons, including fact that returns were required under different acts, statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. From 1921-47 they were considered as such when damage exceeded \$150 with or without a casualty, for 1948, accidents causing damages in excess of \$250, with or without a casualty, were classified as train accidents; for 1949-50, train accidents were those causing damage of \$275 or more; in 1951, \$300 or more; in 1952, \$325 or more; and beginning 1953, \$350 or more. Where damage was less than the amounts specified and there was a reportable casualty it was classified as a train-service accident. Figures for years 1911-15 include industrial and other nontrain accidents to employees only, and for years 1906-10 exclude switching and terminal roads. Otherwise, data cover all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody. See also *Historical Statistics*, series K 84-93]

No. 721.—TRANSIT INDUSTRY—SUMMARY: 1930 TO 1955

[Calendar years except as noted. Comprises all organized local passenger transportation agencies except taxicabs, suburban railroads, and sightseeing and school buses. Covers (a) local motorbus lines, (b) electric street railways, (c) elevated and subway lines, (d) interurban electric railways, and (e) trolley coach lines. Based on financial and statistical reports received by American Transit Association from transit companies representing more than 85 percent of the industry]

ITEM	1930	1935	1940	1945	1950	1952	1953	1954	1955
Miles of route operated (Dec. 31):									
Electric railway—miles of single track.....	35,400	26,700	19,602	17,702	10,813	8,532	7,352	6,765	6,197

1. Continental United States, and Territories and possessions.

2. Civil airways. * Includes gliders.

3. Available. * Excludes all aircraft operated by scheduled airlines and by CAA.

4. Statistically computed from trend, since no formal survey was conducted.

5. Includes flying for corporate or executive purposes as well as flying by individuals, including farmers and on personal business.

6. Includes contract, charter, industrial, and commercial agricultural flying.

7. Includes airports and airfields recorded with CAA. "Limited" includes seaplane bases and heliports.

8. See note 4, table 737, for current definitions.

9. For 1934, detail shown is number of planes involved in accidents; for other years, number of accidents.

10. Department of Commerce, Civil Aeronautics Administration, and Civil Aeronautics Board. Publication CAA Statistical Handbook of Civil Aviation.

No. 729.—SCHEDULED AIR CARRIERS—SUMMARY OF OPERATIONS: 1934 TO 1956

1954	272,725	190,721	196,615	106	62,295	58,069	4,226	23,709
1955	367,627	236,889	226,425	264	100,882	88,802	12,080	40,056
1956	411,952	243,972	243,553	319	108,411	102,789	5,622	59,569

¹ Domestic trunk, local service, and helicopter carriers.

² Includes some military ton-miles and may include a small amount of international traffic.

³ For periods prior to issuance of certificates, comprises operations for only those uncertificated carriers that were ultimately granted certificates.

⁴ Comprises civil and military ton-miles.

⁵ Nonscheduled freight ton-miles not reported by local service carriers.

¹ L/MF—Low/Medium Frequency; radio navigational aids operating between 200 and 400 kilocycles.
² VHF—Very High Frequency; radio navigational aids operating on 108 through 118 megacycles.
³ Includes gliders.
⁴ Includes military. Airport type definitions: Public use—all airports serving scheduled and large irregular air carriers as regular, alternate, and provisional stops; all CAA intermediate landing fields; all airports having a true-light certificate to indicate a lighted airport; and all other airports operationally active. Limited—all airports not qualifying as "public-use."
⁵ Includes seaplane bases and heliports.
⁶ Cumulative since enactment of Federal Airport Act, May 16, 1946, through Dec. 31, 1956.

Section 22

Waterways, Water Traffic, and Shipping

This section presents statistics concerning water transportation, including inland waterways and ocean borne commerce, the merchant marine, cargo and vessel tonnages, and shipbuilding. The principal sources of these data are two annual reports issued by the Corps of Engineers of the Department of the Army entitled *Waterborne Commerce of the United States* and the *Annual Report of the Chief of Engineers*; the Bureau of the Census monthly and annual *U. S. Water-Borne Foreign Trade* and the Bureau of Customs annual *Merchant Marine Statistics*. Data in this field are also presented in the *Annual Report of Commission of Navigation*, issued by the Maritime Administration of the Department of Commerce; *The Bulletin* issued annually by the American Bureau of Shipping; and the *Annual Summary of Merchant Ships Launched in the World* and the *Register Book* published by Lloyd's Register of Shipping of London, England. A basic source for historical data is the Bureau of the Census, *Foreign Commerce and Navigation of the United States*, which was issued annually through 1946.

Data relating to merchandise exports and imports, their classification, dollar values, and countries of origin and destination may be found in section 32, Foreign Commerce.

Units of measurement.—Cargo tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

Vessel shipments, entrances, and clearances.—Shipments by dry cargo vessels comprise shipments on all types of watercraft except tanker vessels, and shipments by tanker vessels comprise all types of cargo both liquid and dry carried by tanker vessels.

A vessel is reported as entered at the first port in the United States at which entry is made, regardless of whether any cargo is unladen at that port. A vessel is reported as cleared from the last port where outward cargo is completed or where the vessel cleared in ballast. Army and Navy vessels entering or clearing without commercial cargo and vessels touching at a United States port in distress, or for other temporary causes without discharging cargo, are not included in the figures.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series K 132-145") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note. This section presents data for the most recent year or period available on April 29, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

No. 740.—WATERBORNE COMMERCE OF THE UNITED STATES—CARGO TONNAGE, FOREIGN AND DOMESTIC: 1940 TO 1955

[In thousands of short tons. See also *Historical Statistics*, series K 132-145]

No. 741.—UNITED STATES RECEIPTS AND PAYMENTS FOR INTERNATIONAL TRANSPORTATION: 1947 TO 1956

[In millions of dollars. Data are international transportation transactions recorded for balance of payments purposes (see table 1112). Receipts include freight on exports carried by U. S. operated carriers and foreign carrier expenditures in U. S. ports. Payments include freight on imports carried by foreign carriers and U. S. carrier port expenditures abroad. Freight on exports carried by foreign carriers is excluded since such payments are directly or indirectly for foreign account. Similarly, freight on U. S. imports carried by U. S. carriers is a domestic rather than an international transaction]

—WATERBORNE IMPORTS AND EXPORTS—CARGO TONNAGE, BY FLAG OF CARRIER VESSEL: 1921 TO 1956

of 2,240 pounds. Excludes cargoes (small in aggregate) carried by ships of less than 100 tons gross prior to 1946. Beginning 1946, excludes U. S. Army and Navy cargo, and includes Alaska, Hawaii, to Rico. Beginning July 1950, excludes commodities classified for security reasons as "special". From July 1953 through December 1955 and beginning July 1956, exports exclude shipments under 100 pounds regardless of shipping weight. For January through June 1956, exclude those under \$1,000 regardless of weight. Beginning 1954, imports exclude shipments under 2,000 pounds shipping weight]

¹ Unrigged included with sailing prior to 1863.
² Comprises iron, steel, composite, concrete, bronze, and aluminum.
³ Comprises whale fisheries and cod and mackerel fisheries. Beginning 1939, figures exclude mackerel.
⁴ Decrease of tonnage arises principally from registered tonnage having been corrected in 1818, 1829, and 1830 by omitting all vessels with registers granted prior to 1815, which were presumed to have been lost at sea, captured, etc. ⁵ Not available. ⁶ Includes Puerto Rico and Virgin Islands. ⁷ Includes Hawaii and Alaska.

Section 23

Irrigation, Drainage, and Soil Conservation

This section presents statistics concerning agricultural land development, in particular, measures of the activities of irrigation and drainage enterprises, and reclamation and land conservation projects. The primary sources for these data are the Bureau of the Census which conducts decennially a Census of Drainage and a Census of Irrigation (as part of the Census of Agriculture), and a mid decade Census of Agriculture which covers fewer items in these fields; the *Report of Administrator of Soil Conservation Service*, issued by the Soil Conservation Service of the Department of Agriculture; and the *Annual Report of the Secretary of the Bureau of Reclamation*, Department of the Interior. In addition, the Bureau of Reclamation issues annually *Crop Summary and Related Data, Federal Reclamation Projects*.

Irrigation.—Irrigated land as defined by the Bureau of the Census is the net acreage of farm land to which irrigation water is applied. It does not include land that could be irrigated, or usually is irrigated, but was not irrigated during the census year. Excluded also is uncultivated land (roads, farmsteads) in irrigated farms and irrigated nonfarm land (cemeteries, parks, golf courses, etc.).

Most of the irrigated land is located in the 17 Western States and Arkansas, Louisiana, and Florida. In these States the Bureau of the Census collects information on acres irrigated, irrigation works, capital investment, and a number of other items from irrigation companies, districts, and other organizations, and from farms that operate their own irrigation supply works. Information for the other States, excepting special surveys, is limited to that reported in the regular farm census.

The development of irrigation projects rests primarily on the Bureau of Reclamation. By Congressional directive its activities are confined to the 17 Western States and Alaska. The operation of irrigation works upon complete development is transferred to capable private water user organizations.

Drainage.—Most farm land drainage works serve to reclaim and improve the land. Other purposes are to protect the land against overflow and to rid the land of sewage from irrigation ditches or for control of alkali formation.

The farm lands of the Eastern States need drainage to remove surplus rainfall. Most of this is gravity drainage through pumps in some cases and in the Western States drainage serves to remove sewage water from irrigated lands and to carry off alkali salts.

The Bureau of the Census in 1930 enumerated in general only those organized enterprises with 500 acres or more of drained farm land and a few unorganized enterprises of smaller size which had their own drainage works and were reported. In previous Censuses (1910 to 1940) all organized enterprises draining farm lands were included in the enumeration regardless of size. Private drained lands of less than 500 acres have not been enumerated in any of the four drainage censuses. The change in Census procedure for 1950 materially reduced the number of enterprises enumerated but affected very little the amount of drained land enumerated.

In taking the 1950 Census differences in form of organization and management of drainage enterprises make it impossible to divide accurately the total drained area.

Note.—The section presents data on the most recent year of publication available. The material was organized and arranged in this plan.

age enterprises into two groups: The 10 "county-drain" States and the 30 "drainage-district" States. The 8 States with no drainage enterprises are the 6 New England States, Pennsylvania, and West Virginia. In the 10 "county-drain" States (Delaware, Indiana, Iowa, Kentucky, Michigan, Minnesota, North Dakota, Ohio, Oklahoma, South Dakota), statistics were gathered for the county as a unit, rather than for each separate enterprise as for the 30 "drainage-district" States. Generally, the maintenance work on existing ditches has been done by reorganizing the land of an earlier enterprise into a new project. Since the number of enterprises for "county-drain" States would be meaningless, the number was not obtained for these 10 States.

In the Western States most of the drained land is located in irrigation enterprises which were chartered to do both irrigation and drainage work under one organization. The cost of construction, operation, and maintenance of the irrigation works is usually far greater than that for drainage. Separate records are seldom kept of expenditures for drainage and irrigation. Data were not included in the 1950 Census for cost, collections, and indebtedness of irrigation enterprises having their own drainage. Therefore, the data for 1950 are not fully comparable with those for earlier years.

Soil conservation.—Basic soil conservation district legislation has now been enacted in all of the 48 States and 4 of the Territories and possessions. Each of these laws contains an effective date after which soil conservation districts could be organized by local farmers and operators. A soil conservation district is a political subdivision of a State which is determined by petition and referendum of farmers residing in the area, and approved by the State Soil Conservation Committee. Districts, in most cases, have authority to solicit Federal, State, county, and private assistance in carrying on their soil and water conservation program within the area. On request of the local governing body of each soil conservation district, the Department of Agriculture provides technical and other assistance to districts, through its several agencies. "Memorandums of understanding" form the basis on which any departmental assistance is provided to a district for use on the farms and ranches within the district. After the basic memorandum with the Department has been signed, the Soil Conservation Service signs a supplemental memorandum with each district governing body requesting assistance, to cover activities which the Soil Conservation Service will help each district to carry out.

No. 769.—IRRIGATION ENTERPRISES—SUMMARY: 1910 TO 1950

[Data are for the 17 Western States, Arkansas, Louisiana, and, for 1940 and 1950, Florida. Tables 769 and 771 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of management of enterprises. An enterprise is defined as "an independent irrigation establishment owning or operating works for supplying water to agricultural land." See also *Historical Statistics*, series F 56-59]

¹ For specific procedure on organization of soil conservation districts, see respective State soil conservation district law. By provision of most State district laws, State soil conservation committee has responsibility for organization of districts. Local district governing bodies administer affairs of each individual district.

² Soil Conservation Service furnishes technical and other assistance to practically all districts that have entered into Memorandums of understanding with Department of Agriculture.

³ Comprises all farmer district cooperative agreements for initial, advanced and basic conservation plans (formerly shown as active conservation plans only, not including initial and advanced agreements). Cancellations caused by death, change in ownership, or mutual consent have been deducted. Data on plans and treated areas included only work done through farmer district cooperative agreements since Aug. 1937 with assistance of Soil Conservation Service.

⁴ Includes Imperial Irrigation District.

⁵ Includes 11 State cooperative grazing districts.

⁶ Includes 1 wind-erosion district.

Section 24

Agriculture—General Statistics

This section presents measures of the broader aspects of our farm economy: The number, value, acreage, and ownership of farms; agricultural balance sheet; and farm prices, income, expenditures, and debt.

The principal sources of these data are the *U. S. Census of Agriculture*, conducted by the Bureau of the Census, and the many current and annual publications of the Department of Agriculture, among which are: *The Balance Sheet of Agriculture*, *Current Developments in the Farm Real Estate Market*, *Agricultural Finance Review*, *The Farm Income Situation*, *Agricultural Statistics*, *Agricultural Prices*, *Crops and Markets*, and *Statistics of Farmers' Marketing, Purchasing, and Service Cooperatives*.

Data on farm output and productivity, on specific crops, acreage, and production, and on livestock and poultry may be found in section 25, Agriculture—Production and Related Subjects.

Starting in 1940 a Census of Agriculture has been conducted every 10 years. In 1925, 1935, 1945, and 1954 a mid-decade census has also been taken. The data have been obtained by personal enumeration of individual farms. The first Census of Agriculture, limited in scope, included such items as an inventory of the principal classes of domestic animals, the production of wool, the value of poultry and products of the dairy, and the production of principal crops. Data concerning the number, acreage, and value of farms were first introduced in the Census of 1850. In 1880, information was first secured as to the tenure under which farms were operated. A detailed classification of farm land according to use was first obtained in 1925.

Farms and farmland.—In the course of its history, the Bureau of the Census has employed several definitions of a farm. According to the latest definition (used in the 1950 and 1954 Censuses) a farm is all the land on which some agricultural operations are performed by a person, either by the operator or with the assistance of household or hired labor. Places of 3 acres or more are considered farms if their production is valued at a minimum of \$150, exclusive of that from a home garden. Places of less than 3 acres must have sold a minimum of \$150 of their production to be classified as a farm.

According to the definition used from 1925 to 1945, places of 3 acres or more were counted as farms if any agricultural products, other than from a home garden, were produced, while places of less than 3 acres were classified as farms if the agricultural production was valued at a minimum of \$250. For the definitions used in earlier censuses, see *U. S. Census of Agriculture: 1950*, Vol. II, Introduction.

Agricultural operations consist of the production of crops or plants, vines, or trees (excluding forestry operations), or of the keeping, grazing, or feeding of livestock for animal products, animal increase, or value enhancement. Included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, fur farms, mushroom houses, apiaries, and cranberry bogs. Excluded are fish farms, fish hatcheries, oyster farms, frog farms, kennels, game preserves, parks, and the like. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm for census purposes. Thus, for a plantation, each cropper and tenant operation is considered a separate farm even though the entire plantation may be handled essentially as a single farm enterprise.

The land in farms includes considerable areas of land not actually under cultivation or used for pasture or grazing, but all such land must have been under the control of the

Note.—This section presents data for the most recent year or period available on May 9, 1957, when the material was organized and sent to the printer. In some instances, more recent data were added later.

operator and considered a part of his farm. Land used for grazing or pasture that was neither owned nor leased by the farm operator generally was not included under land in farms. Rent-free lands were included in an operator's farm only if he had sole use of such lands. Thus vast acreages of land used for grazing, such as national forests, Taylor grazing land, State lands, or other public lands, and some railroad and other privately owned lands, are not included as land in farms even though used for agricultural purposes.

Farm prices and income.—Information on prices received by farmers for products they sell and prices paid for articles they buy for production and family living are obtained by the Agricultural Marketing Service from about 33,000 voluntary reporters, which include farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month in which a particular crop harvest begins.

The index numbers of prices received and of prices paid by farmers are based on current midmonth prices for these commodities. For information concerning methods of construction of the indexes, see Supplement No. 1 to the January 1950 issue of *Agricultural Prices*, issued by the Agricultural Marketing Service. The ratio of the index of prices received to the index of prices paid by farmers measures the monthly variation in the average per unit exchange value of farm products in terms of commodities and services bought by farmers.

Cash income is the cash receipts from farm marketings and represents the quantities of crops, livestock, and livestock products sold by farmers multiplied by the prices received per unit of production at the local market. Gross farm income includes Government payments, value of farm products consumed on the farm, and rental value of farm homes, as well as cash receipts from farm marketings.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series E 1-16") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ For 1910 and subsequent years, includes in-migrations and enlistments into the Armed Forces, and persons returning from the Armed Forces. For all years includes persons who have not moved but who are in and out of the farm population because agricultural operations have ceased or have begun on the place where they are living.

² Includes Armed Forces overseas.

³ Not available.

Retired farmer		4	4	3	5	5	5	5
Other occupation		24	25	34	28	30	29	32

¹ Total population includes Armed Forces overseas.

² Census figures, adjusted for underenumeration. Intercensal years interpolated on basis of change in farm population.

³ Comprises farm land and buildings, implements and machinery and livestock, including poultry. Turkeys included from 1929 to 1940.

⁴ As of March 1. ⁵ Year ending Mar 1. ⁶ Includes contracts to purchase (but not options).

⁷ Includes loss of title by default of contract, and surrender of title or transfers to avoid foreclosures.

⁸ Comprises inheritance and gift transfers, sales in settlement of estates, and miscellaneous and unclassified sales.

Other land ⁵	123	126	130	130	131	137	149	144	135

¹ Comprises cropland harvested, crop failure, and cultivated summer fallow.

² Comprises all open or nonforested pasture in farms. Includes cropland used only for pasture 1945 to 1954, and plowable pasture in earlier years.

³ Comprises land used chiefly for grazing. Includes open or nonforested grazing land and idle grassland for first decades; forest and arid woodland, and shrub and brush grazing land for all years.

⁴ Excludes forested areas in parks, wildlife refuges, military areas, recreation sites, and forest land used for grazing.

⁵ Comprises urban, industrial, and residential areas outside farms, parks and wildlife refuges; military lands; roads; railroads, ungrazed desert, rock, swamp, and other unused and waste land.

Source: Department of Agriculture, Agricultural Research Service. Compiled from Bureau of the Census reports, publications and records of the Agricultural Research Service and the former Bureau of Agricultural Economics, and public land administering and conservation agencies.

No. 782.—LAND UTILIZATION, BY OWNERSHIP: 1930 TO 1954

[In millions of acres. See headnote, table 781. Private land comprises that owned by individuals, private groups, corporations, and Indian land under Government administration. Public comprises that owned by Federal, State, or local governments.]

No. 789.—FARMS—NUMBER AND PERCENT DISTRIBUTION, BY TYPE: 1950 AND 1954

[Based on reports for a sample of farms. Type of farm determined on basis of relationship of value of sales from a particular source to total value of products sold for each farm. In general, value of sales from a particular source was 50% or more of total sales when a farm was classified as that type. Part-time farms include those with a value of products sold of \$250-\$1,199 and with operator either reporting 100 days or more of off-farm work or other income exceeding value of farm products sold. Residential farms include those with a value of farm products sold of less than \$250. Abnormal farms include public and private institutional farms, experiment stations, community projects, etc.]

Expenses..... do.	6.8	7.6	8.1	8.0	8.4	7.2	7.5	7.2
Surplus and reserves, end of year ⁴ ... \$1,000.....	32,656	45,474	70,644	154,073	167,264	180,000

¹ Beginning 1945 includes taxes on gasoline used in farm tractors.

² For 1930, includes companies with more than 65 percent of their insurance on farm property; for later years, 50 percent. About 68 percent of their total insurance is on farm property, for both periods.

³ Number of companies for which data were obtained; perhaps not entirely complete for any year.

⁴ Excess of assets over liabilities. Most of farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves. Data not compiled prior to 1933.

Farmer's share of consumer's dollar ⁴ (percent)	18	17	17	18	18	17	17	17

¹ Calculated from retail prices collected by the Bureau of Labor Statistics.

² Calculated from official series showing prices received by farmers applied to quantities of farm products equivalent to retail purchases.

³ Equals difference between retail cost and farm value.

⁴ Obtained by expressing the farm value as a percentage of retail cost (based on unrounded figures).

¹ Many expense items are not included such as livestock and poultry purchased, seeds, bulbs, plants, trees, machinery repair, maintenance of buildings, taxes, mortgage interest, insurance, rents, containers, veterinary fees, and others of varying degrees of importance. Expenditures shown in this table amounted to approximately 43 percent of all farm production costs for 1954 according to a special cooperative study by the Bureau of the Census and the Agricultural Marketing Service (see table 807).

² Not available.

³ Cash payments for farm labor, housework specifically excluded, excludes expenditures for contract construction work, machine hire, or labor included in cost of machine hire.

No. 814.—FERTILIZER CONSUMPTION: 1880 TO 1955

[In thousands of tons of 2,000 pounds. Estimates based on tag sales, records of Government officials, etc. Beginning 1935, figures include tonnage distributed by Agricultural Adjustment Administration (now Soil Conservation Service) and by Tennessee Valley Authority, data for the latter representing fiscal years ending June 30. Data for phosphate rock used in Illinois and Florida, available only since 1939, have been excluded from annual comparisons]

Miscellaneous.....	260	99,901	93,376				

¹ Represents value at the first level at which cooperatives transact business for farmers. Excludes wholesale business of farm supply cooperatives with other cooperatives or terminal market sales performed for local associations.

² Because many associations are engaged in more than one type of business, these totals are less than the number that would be obtained by adding the number of associations handling individual items or performing individual services.

³ Charges for services in which no duplication occurs.

No. 817.—FARMERS' MARKETING, FARM SUPPLY, AND SERVICE COOPERATIVES— NUMBER, MEMBERSHIP, AND BUSINESS: 1913 TO 1955

[Covers operations of associations whose fiscal years ended between June 30 of year shown and July 1 of preceding calendar year, with limited exceptions. Comprises independent local associations, federations, large-scale centralized associations. Data are for marketing season during which farm products are moved into channels of trade. Marketing seasons overlap]

¹ Since 1935, comprises members (those entitled to vote for directors) but excludes nonvoting patrons.

² Comprises value of commodities sold or purchased for patrons and charges for rendering other essential services in marketing or purchasing. Beginning 1951, net figures; adjusted for duplication resulting from transactions between cooperatives. Earlier figures included some duplication. ³ Beginning 1951, includes service associations.

Section 25

Agriculture—Production and Related Subjects

This section presents statistics concerning farm output and productivity, farm imports and exports, and data relative to specific crops, livestock, dairy products, and poultry.

The principal sources of these data are the reports of the decennial and quinquennial Censuses of Agriculture conducted by the Bureau of the Census and three annual reports issued by the Agricultural Marketing Service of the Department of Agriculture entitled *Crop Production*, *Crop Values*, and *Agricultural Statistics*. Other important sources of these data published by the Agricultural Marketing Service include *Production of Manufactured Dairy Products*; *Livestock on Farms, January 1*; *U. S. Livestock Reports*; *The National Food Situation*; *Cotton and Cottonseed Production*; and *The Wheat Situation*. Data sources concerned with agricultural exports and imports include *Foreign Agricultural Trade* published by the Foreign Agricultural Service of the Department of Agriculture and *Foreign Commerce and Navigation of the United States* which was issued annually through 1946 by the Bureau of the Census. Statistics on other aspects of agriculture may be found in section 24, Agriculture—General Statistics.

Crop reporting.—Annual agricultural statistics of a wide variety have been issued currently by the Department of Agriculture for 90 years—the first being as of May 1, 1863. The 41 field offices design the samples and collect data from voluntary reporters. State estimates and other information are sent to the Crop Reporting Board of the Agricultural Marketing Service, where, after review, reports are issued containing State, regional, and United States data.

Statistics compiled by the Agricultural Marketing Service on crops, livestock and livestock products, agricultural prices, farm employment, and other related subjects are based mainly on data obtained through mail questionnaires. The basic information is obtained from nearly three-fourths of a million reporters, mostly farmers, who report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living. The most extensive of the current survey data are gathered by the Agricultural Marketing Service from questionnaires handled in cooperation with the Post Office Department through its rural mail carriers. These surveys obtain livestock data in June and December and crop acreage data in October.

In the data prepared by the Agricultural Marketing Service, estimates of crop acreage and production for the census years are set up currently from available information. Later, if necessary, these data are revised to a level based largely on the Census enumerations. The estimates for intercensal years are based on sample data obtained each year from individual reporters. This information is supplemented by other data, such as State assessors' enumerations of agricultural information, crop meter frontage measurements, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians as well as reports from other sources having a knowledge of farming, agricultural production, and processing. Cotton acreage and production are also based on sample data and, in large measure, on ginning information gathered by the Bureau of the Census.

Note.—This section presents data for the most recent year or period available on May 9, 1957, when the material was organized and sent to the printer. In some instances, more recent data were added later.

Livestock.—For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The five decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; and April 1, 1930, 1940, and 1950. The 1925, 1935, and 1945 quinquennial Censuses of Agriculture were taken as of January 1. The 1954 Census of Agriculture was taken in the fall of that year. Comparison of inventory numbers of livestock from census to census is seriously affected by changes in the date of enumeration. From January to April, there are material changes in numbers on hand in most parts of the country, due to births, marketings, farm slaughter, etc. In an effort to obtain as much comparability as possible, the censuses taken in April either excluded recently born animals from the enumeration or provided for their enumeration in a separate age group. Volume II of *U. S. Census of Agriculture: 1950* shows a complete history of the enumeration of livestock and presents a discussion of the comparability from census to census. For most kinds of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely in one direction.

Annual inventory numbers of livestock on farms, together with estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture, are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on Census enumerations for years when Census data are available.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series E 189-243") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Measures annual volume of farm production available for eventual human use.

² Measures gross production of meat animals, dairy products, poultry and eggs, and some miscellaneous livestock products not shown separately, excluding horses and mules. Livestock production is made up of three components: Constant-dollar value of pasture consumed, other feed consumed, and product-added in converting feed and pasture into livestock and products for human use. In combining production of livestock and crops into total farm output, value of feed other than pasture consumed is excluded to avoid double counting of production of feed crops included in crop production.

³ Total constant dollar value of all crop production regardless of its final disposition. Includes production of hay seeds, pasture seeds, and cover-crop seeds and some miscellaneous crop production not shown.

⁴ Hay and concentrates only. Constant dollar value fed to horses and mules is subtracted when combining livestock and crops into total farm output.

⁵ 52 crops for 1929 and 1930.

1956.....	102	93	109	130	40	47	101	57	155	109

¹ Based on data for 122 agricultural import classifications.² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports comprise all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.Source: Department of Agriculture, Foreign Agricultural Service; annual report, *Agricultural Statistics*. Published currently in *Foreign Agricultural Trade*. Computed from official records of Bureau of the Census and U. S. Tariff Commission.

No. 827.—AGRICULTURAL EXPORTS—ACREAGE USED AND RATIO OF VALUE TO CASH RECEIPTS FROM FARM MARKETINGS: 1910 TO 1956

[Acreage in millions; cash receipts and exports in millions of dollars. Acreages for crop exports for 1910-35 relate to exports for year beginning July 1, or month representing beginning of crop season. Acreages for crop exports and lend-lease, beginning 1940, are for calendar years]

YEAR	CROP ACREAGE		Export acreage as percent of total	Cash receipts from farm marketings	Agricultural exports	Ratio of exports to cash receipts (percent)
	Total harvested ¹	Used for export ²				
1910.....	325	37	11.4	5,780	919	16
1915.....	340	49	14.4	6,392	1,608	25
1920.....	360	60	16.7	12,600	3,443	27
1925.....	360	44	12.2	11,021	2,136	19

¹ For Census of 1920, cropland harvested was obtained by adding the acres of individual crops harvested. See footnote 6.

² Total acreage of crops harvested for which figures are available. Includes any acreage of alfalfa seed and clover and grass seeds enumerated, some of which was harvested from land also cut for hay.

³ Not available.

⁴ Total for specified crops.

⁵ Irish and sweet potatoes included with Field crops, not with Vegetables.

⁶ Excludes corn cut for fodder (acreage, 14,503,000; value, \$206,935,000) probably duplicated in acreage of corn harvested for grain.

⁷ Only strawberries included in small fruits; other small fruits included in field crops.

⁸ Acreage represents vegetables harvested for sale only; acreage in farm gardens not available. Value comprises both vegetables for home use and for sale, except as noted.

⁹ Vegetables harvested for sale.

¹⁰ Available data not comparable.

¹¹ Farm garden vegetables for home use only.

¹² Acreage in fruit orchards, vineyards, and planted nut trees not secured prior to 1930 Census.

¹³ Acreage of horticultural specialties not included.

¹⁴ Excludes acreage on farms reporting less than one-half acre in orchards, vineyards, and planted nut trees.

¹⁵ Excludes data for farms with less than 20 trees or grapevines.

¹ Total acreage of crops harvested for which figures are available. Includes any acreage of alfalfa seed and clover and grass seeds enumerated, some of which was harvested from land also cut for hay.

² Irish and sweetpotatoes included with Field crops, not with Vegetables.

³ Excludes sweet corn, popcorn, Egyptian corn, kafir, and milo maize.

⁴ Totals are for States for which data are available.

⁵ Individual hay crops may include some duplication of acreage due to cutting of more than one crop during year.

⁶ Includes grass silage converted to dry weight basis. See footnote 9.

⁷ Includes hays listed above in those States where separate inquiries were not on the questionnaire.

⁸ Silage crops other than corn and sorghums.

⁹ Green weight.

¹⁰ Excludes acreage for farms with less than 15 bushels harvested in 1949, and less than 20 in 1954.

¹¹ Except for horticultural specialties, figures exclude data for farms with less than 20 trees or grapevines.

¹² Excludes acreage on farms with less than ¼ acre of fruit orchards, groves, vineyards, and planted nut trees.

No. 832.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE: 1921 TO 1956

[For weights of units of measurement for principal products, see Appendix II. Number of pounds to a bushel of sorghums for grain, 56. Number of pounds to a bag of rice, 100. Prices and yields for periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for individual years. Acreage, production, and yield of all crops revised to Census data. See also *Historical Statistics*, series E 181-228, for acreage harvested, production, and price data for corn, wheat, oats, barley, flaxseed, potatoes, sweet potatoes, cotton, cottonseed, soybeans, and hay]

¹ Values are based on season average prices; see notes on "Price" column.

² Season average price received by farmers. For certain years, prices for corn, wheat, oats, rye, and barley include an allowance for unredeemed loans and purchase agreement deliveries.

¹ Values are based on season average prices; see notes on "Price" column.

² Season average price received by farmers. For certain years, prices for rice, flaxseed, cotton, and cottonseed include an allowance for unredeemed loans and purchase agreement deliveries.

³ Includes following quantities of potatoes not marketed and excluded in computing value (1,000 cwt.): 1923, 4,477; 1931, 40; 1932, 1,206; 1937, 43; 1939, 774; 1943, 264; 1950, 741; 1951, 456; 1953, 3,058; 1955, 1,147.

⁴ State production figures, which conform with Census annual ginning enumeration with allowance for cross-State shipments, rounded to thousands and added for United States totals.

⁵ Bales of 500 pounds, gross weight.

⁶ Excludes cotton grown in Lower California and ginned in California, 1921 to 1924.

¹ Acreage of crops for harvest for fresh market, including any partially harvested or not harvested because of low prices or other economic factors, plus acreage harvested for processing.

² Includes some quantities not marketed and excluded in computing value.

³ Based on season average prices received by growers.

⁴ Processing production shelled basis plus fresh market production in the shell. Equivalent shelled production: 1955, 97,000 tons; 1956, 116,900 tons.

¹ Processing production shelled basis plus fresh market production in the shell. Equivalent shelled basis: 1955, 464,480 tons; 1956, 555,360 tons.

¹ Includes some quantities donated to charity or not harvested on account of economic conditions or scarcity of harvest labor.

² Season average prices. Citrus fruit prices are equivalent packing-house-door returns for all methods of sale. ³ Production in commercial apple areas of each State.

⁴ California, 48 pounds; other States, 50 pounds.

⁵ Fresh basis for California derived by multiplying dry basis estimate by 2/3.

⁶ Net content of box varies. In California and Arizona approximate average is 77 pounds; in Florida and other States, 90 pounds.

⁷ In California and Arizona approximate average is 55 pounds net; in Florida and other States, 80 pounds net.

⁸ About 79 pounds net.

¹ Beginning 1910, includes Virgin Islands not shown separately.

² Louisiana and Texas 1909 to 1923. Louisiana only 1924 to 1927. Louisiana and Florida beginning 1928.

³ For 1900 to 1906, shipments to United States—sugar 96° basis as computed by Puerto Rican mills.

⁴ Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.

⁵ Exports 1900 to 1911, production 1912 and subsequently. Includes production of muscovado and panela, low grades of sugar mostly for domestic consumption.

⁶ Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.

⁷ Production for 1940; not available for 1941-44.

¹ Data from Sugar Division, Commodity Stabilization Service.

² Includes raws for processing held by importers other than refiners.

³ Includes sugar used in manufacture of other commodities. 1940, exports (Department of Commerce, *Foreign Commerce and Navigation*), beginning 1945, quantities delivered for export (Sugar Division, Commodity Stabilization Service). ⁴ Data based on allocation audits and records kept by Armed Forces.

⁵ Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers. Civilian per capita consumption, 1941-55.

⁶ Department of Agriculture net purchases for export amounted to 175,000 tons.

⁷ Includes shipments for civilian relief feeding.

¹ Growth of 9 months in Louisiana and 12 months in Florida. Sugar season usually ends by December or early January in Louisiana and in Florida by March following season of growth.

² Season average price received by farmers. Prices exclude Government payments under the Sugar Act. Price support payments for 1943-45 included.

³ Raw value equals 96° raw sugar as defined in Sugar Act of 1918, prior to 1929, calculated by the Agricultural Adjustment Administration Method. (S. R. Series 1, No. 1.)

⁴ Calculated on basis that 100 pounds of raw sugar required to produce 93.46 pounds of refined sugar.

⁵ Sirup production excluded. See table 847.

⁶ Converted to 80° Brix beginning with 1934. Data for previous years as reported. ⁷ Not available.

Source: Department of Agriculture, Agricultural Marketing Service, annual reports, *Agricultural Statistics* and *The Sugar Situation*.

Glycerin (100% basis) refined, all grades ¹³	215	180	30	242	192	34	252	192	51

¹ Data for production collected by Department of Agriculture.

² Data are on a commercial stocks basis and exclude figures for stockpiles of strategic oils. 1954 and 1955 stock figures for castor oil exclude 9,807,000 pounds held by Commodity Credit Corporation.

³ Collected by Department of Agriculture. Represents only rendered lard.

⁴ Excludes quantities used in refining.

⁵ Represents quantities of rendered tallow only.

⁶ Not shown to avoid disclosure of individual companies.

⁷ Includes data for menhaden, sardine, and fish oils other than cod and cod liver; production figures collected by Fish and Wildlife Service, Department of the Interior.

⁸ Excludes winterized-deodorized oil, hydrogenated-deodorized oil, and cooking and salad oil.

⁹ 1954 includes hydrogenated lard.

¹⁰ Not available.

¹¹ Represents quantities held by producing firms only.

¹² 1954 includes low rosin fatty acids.

¹³ Includes data for synthetic glycerin.

¹ Jan. 1 estimates include colts. Mules included with horses, Census figures, 1954, and USDA figures, beginning 1950.

² Census figures for 1910 are for animals over 3½ months old; 1920, 1945, 1960, and 1964, animals of all ages; 1930, animals 3 months and over except sheep (6 months and over); 1940, animals over 3 months, except hogs (over 4 months) and sheep (over 6 months).

³ Not available for Florida, Georgia, and South Carolina.

⁴ Includes adjustment for livestock shipped in and inventory changes.

¹ Comprises inspected, noninspected, retail, and farm slaughter.

² Prices are for beef steers, all grades, excluding western.

³ Excludes animals slaughtered under government account.

⁴ Includes slaughter under Emergency Government Relief Purchase Program in 1934-1935.

⁵ Prices are for lambs only; (sheep represent smaller part of animals slaughtered).

No. 870.—MEATS AND LARD—PRODUCTION, FOREIGN TRADE, AND CONSUMPTION BY KIND: 1945 TO 1956

[All quantities, except per capita, in millions of pounds of carcass weight equivalent. Edible byproducts are excluded. Production of pork excluding lard comprises weight of dressed hog carcass less head bones and less all carcass fat rendered into lard. Lard production represents rendered weight of lard, and lard exports represent rendered lard, including neutral lard. Federally inspected production omits production in Hawaii and Virgin Islands. Uninspected production is made up of farm and retail slaughter and all wholesale slaughter that is not Federally inspected. Commercial exports include commercial shipments to territories; they do not include USDA exports and shipments for Lend-Lease, UNRRA or other claimants, nor do they include shipments for military civilian feeding or voluntary relief feeding. Civilian consumption is calculated from production and foreign trade, with an allowance for changes in stocks, and with deduction of military takings, and of deliveries to USDA through 1947. See also *Historical Statistics*, series E 138, 142, 146, and 150 for total production of beef, veal, lamb and mutton, and pork]

ITEM AND YEAR	PRODUCTION			Exports of U. S. production	Imports for con- sumption	CIVILIAN CONSUMPTION

¹ Includes frozen turkeys.

² Frozen eggs may be converted to cases on basis of 38.5 pounds to a case.

Source: Frozen fish, Department of the Interior, Fish and Wildlife Service; annual bulletins. Other figures, Department of Agriculture, Agricultural Marketing Service; annual report, *Agricultural Statistics*; also published in monthly mimeographed reports.

Section 26

Forests and Forest Products

This section presents statistics on the area and ownership of commercial forest lands; volume of timber including annual growth and cut; the utilization and receipts of national forests for commercial and recreational purposes; forest fires; and forest industries and products such as lumber, paper, pulp, millwork, and turpentine.

The principal sources of these data are the *Timber Resource Review* reports issued in 1955; the annual report *National Forest Areas*, and *Forest Fire Statistics* published by the Forest Service of the Department of Agriculture; the annual reports of the Bureau of the Census entitled *Lumber Production and Mill Stocks* and *Pulp, Paper, and Board Mills*, and other reports in the Bureau of the Census *Facts for Industry* series issued quarterly on plywood and monthly on pulp, paper, and board. Additional information in this field is published in the annual report of the National Forest Reservation Commission, the *Annual Naval Stores Report* of the Agricultural Marketing Service, the monthly *Survey of Current Business* of the Office of Business Economics, the *National Survey of Lumber Demand and Supply* of the National Lumber Manufacturers Association, and releases of the Fish and Wildlife Service of the Department of the Interior.

The Bureau of the Census also collects statistics of foreign trade of forest products. The Bureau of Labor Statistics publishes monthly and annual statistics of wholesale lumber prices. Information on the domestic movement of forest products is collected by the Interstate Commerce Commission and the Association of American Railways.

The completeness and reliability of statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for Federal lands are considered much better than for private lands, though too much reliance should not be placed on estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and piling, fuelwood, and fence posts. The data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, is believed to have practically complete coverage. Statistics relating to average value of lumber sawed may be subject to some limitations due to incomplete representation of small mills.

For an historical summation of raw materials production, imports, exports, and consumption, which includes figures for forest products, see table 926.

Historical statistics.—Tabular headnotes (as “See also *Historical Statistics*, series F 69–73”) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. See preface.

Note.—This section presents data for the most recent year or period available on May 17, 1957, when the material was organized and sent to the printer.

¹ Comprises all land which is (a) producing, or physically capable of producing, usable crops of wood (usually sawtimber), (b) economically available now or prospectively, and (c) not withdrawn from timber utilization.

² Included with "Other" to avoid possible disclosure of area owned by individual "wood-using" industries. Where these combinations have been made, State figures for "Wood-using" industries and "Other" do not add to totals because national, regional, and sectional totals show correct ownership distribution.

³ Less than 500 acres.

No. 881.—LIVE SAWTIMBER—VOLUME, 1953, AND ANNUAL GROWTH AND ANNUAL CUT, 1952, ON COMMERCIAL FOREST LAND, BY STATES AND FOR ALASKA

[In millions of board feet. Sawtimber comprises all trees (except cull trees) which contain at least one merchantable sawlog as defined by regional practice, and which have the following minimum diameter at breast height: Eastern region softwoods, 9 inches; Eastern region hardwoods and all species of Western region, 11 inches]

¹ As of Jan. 1.

² Comprises natural growth and excludes catastrophic losses.

³ Live sawtimber and polelimber trees cut or killed by logging.

⁴ Less than one-half million.

1 Includes 294 million board feet of ponderosa pine.

2 Less than one-half million.

3 *Quercus alba* and *Quercus prinus*.4 *Quercus borealis*, *Quercus falcata* var *pagodaeifolia*, and *Quercus shumardii*.

5 Excludes ponderosa pine in the Plains region.

No. 893.—PAYMENTS TO STATES, ALASKA, AND PUERTO RICO FROM RECEIPTS OF NATIONAL FORESTS: 1950 TO 1957

[In thousands of dollars. For years ending June 30. Payments are 25 percent of net receipts collected during the preceding fiscal year from sales of timber, grazing fees, and miscellaneous uses of national forests under Act of May 23, 1908, exclusive of (a) payments to Arizona and New Mexico on account school-section lands administered by Forest Service, (b) payments for acquisition of land, and (c) payments to State of Minnesota on account of which the State is paid ¾ percent of the appraised valuation in lieu of 25 percent of the receipts from an area of the Superior National Forest]

No. 897.—LUMBER PRODUCTION, BY KIND OF WOOD, AND AVERAGE MILL VALUE: 1869 TO 1954

[Data not strictly comparable because of incomplete coverage of numerous small mills in the East prior to 1942 and exclusion of mills cutting less than 50 M ft. b. m. for all years prior to 1942 except 1869-1909 and 1919. Exclusion of under 50 M class of mills would affect totals less than 1 percent as reflected by 1942 survey. Data for 1943-46 and for 1949-53 are based on sample surveys; see source for sampling reliability. See also *Historical Statistics*, series F 109-111 and F 120-122, for similar but not identical figures from Dept. of Agri. Forest Service]

¹ West coast softwood plywood industry, principally Douglas fir; includes some hardwood.

² Veneer and plywood industry other than west coast companies; includes some softwood.

³ Cords of 128 cu. ft. (rough wood basis).

⁴ Includes 641,838 cords of woods not classified by kind, and 237,605 cords of saw mill waste.

⁵ Includes 988,873 cords of woods not classified by kind, and 287,335 cords of saw mill waste.

⁶ Excludes hardwood plywood produced in west coast softwood plywood mills amounting to 76,871,000 square-feet, 3/4" basis, in 1952.

⁷ Not available.

¹ Prior to 1950 cubic volume for crossties, poles, piling, fence posts, wood blocks, and cross arms was based on number of units reported and an estimated average cubic volume per unit. For 1950 and subsequent years, cubic volume is based on volume reported by treating plants, and data are therefore not completely comparable with earlier years.

² Full-length and butt-treated poles.

³ Included in "All other."

⁴ Included in "Construction timbers."

⁵ Included in "Lumber."

¹ Figures for turpentine and rosin from crude gum, beginning 1929-30, and from wood beginning 1933-34, relate to crop year ending Mar. 31; earlier figures relate to calendar years.

² Figures compiled from data reported by establishments in turpentine and rosin industry.

³ Figures compiled from data reported by establishments in Wood-Distillation industry.

⁴ Not reported.

⁵ Includes, for 1909 and 1914, 366 barrels and 1,848 barrels respectively, of turpentine and, for 1914, 3,596 drums of rosin, reported by establishments engaged in manufacture of lumber and timber products.

⁶ Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932-33, 26,720 drums; 1933-34, 28,048; 1934-35, 27,200.

⁷ Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

⁸ Includes data for rosin produced from reclaimed gum: For 1935-36, 43,350 drums; 1936-37, 34,155; 1937-38, 21,017; 1938-39, 31,983; 1939-40, 31,414; 1940-41, 20,181; 1941-42, 19,765; 1942-43, 11,297; 1943-44, 9,824; 1944-45, 8,066; 1945-46, 8,538; 1946-47, 8,449; 1947-48, 4,345; 1948-49, 4,230; 1949-50, 2,230; 1950-51, 500.

⁹ Beginning with 1945 total primary production of FF wood rosin.

¹⁰ Alabama, Mississippi, and South Carolina.

Section 27

Fisheries

This section presents statistics relating to quantity, value, species, and disposition of fish caught for commercial purposes, and of fishery products. The principal sources of these data are the annual report *Fishery Statistics of the United States*, and the monthly and annual *Current Fishery Statistics* bulletins, both published by the Fish and Wildlife Service of the Department of the Interior.

The Fish and Wildlife Service conducts annual surveys for various statistical information on the fishery industries. Results from the surveys include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and production, the reports include data on imports and exports of fishery commodities; freezings and cold-storage holdings of fishery products; monthly production of fish meal and oil; quarterly production of fish sticks; and monthly landings in most coastal States, and in Ohio. Information is also collected covering shad fisheries of the Hudson and Potomac Rivers; alewife fisheries of the Potomac; seed oyster fisheries; and Pacific Coast halibut fisheries.

The first comprehensive statistical survey of the fisheries and fishery industries of the United States was made for the year 1880, although it did not include data for the Mississippi River and its tributaries. Periodic general surveys of a limited number of States or limited areas of the United States were made for various years between 1880 and 1928. A complete survey of the entire United States was conducted in 1908. The next general survey of the entire United States was not made until 1931, although complete data for all sections, excluding the Mississippi River and its tributaries, were collected for 1929 and 1930. Various sections were surveyed during the years from 1933 to 1949, inclusive. A complete survey of all sections of the country, including the manufacturing and wholesaling operations, was made for 1950.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series F 155") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on May 17, 1957, when the material was organized and sent to the printer.

Collected for most part by State fishery agencies and compiled by Fish and Wildlife Service since 1927. Includes, in addition to lakes shown, small amounts for Lake Ontario and also prior to 1927, Lake St. Clair and St. Clair and Detroit Rivers and beginning 1927, Lake-of-the-Woods, Namakan Lake, and Rainy Lake. Not available. Excluding Atchafalaya River.

No. 914.—FISHERIES—DISPOSITION OF DOMESTIC CATCH: 1945 TO 1956

weight of catch in millions of pounds. Includes Alaska. A large portion of waste derived from filleting, and dressing fish and shellfish is utilized in production of fish meal and oil in addition to whole fish in manufacture of these products. From 600 million to 1 billion pounds of waste were used in production of meal and oil each year shown. See also *Historical Statistics*, series F 155-159]

FIG. XXXV.—VALUE OF MINERAL PRODUCTION: 1935 to 1955

[See table 921]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Department of the Interior, Bureau of Mines.

Section 28

Mining and Mineral Products

This section presents statistics relating to the mineral industries and mineral products. The data are arranged in four broad groupings: General summary statistics, nonmetals other than fuels, and metals. Summary measures of production and payment are presented for mining and its products. More detailed data on value and quantity of production, prices, imports and exports, consumption, and distribution are shown for specific mineral industries and products. The latter include not only primary minerals (coal, iron ore, etc.), but minerals which have passed through certain stages of processing (refined copper, cement, etc.), and minerals such as magnesium where extraction does not involve mining in the conventional sense.

The principal source of these data is the *Minerals Yearbook*, published by the Bureau of Mines of the Department of the Interior. Other government sources are the censuses of Mineral Industries conducted by the Bureau of the Census; *Statistics of Pipe Line Companies*, an annual report of the Interstate Commerce Commission; the Bureau of the Mint's *Annual Report of the Director*, which presents data on gold and silver. Nongovernment sources include the *Engineering and Mining Journal* published monthly by the McGraw-Hill Publishing Co.; *Iron Age*, a weekly Chilton Co. publication; the annual *Metal Statistics* of the American Metal Market; and the annual *Petroleum Facts and Figures* of the American Petroleum Institute.

General statistics, with principal emphasis on commodity detail, have been collected annually or at more frequent intervals by the United States Geological Survey and the Bureau of Mines since 1880. Current data available from Bureau of Mines publications include quantities and values of minerals produced, sold or used by producers, or shipped; quantities of minerals stocked; crude materials treated and preliminary minerals recovered; and consumption of mineral raw materials. The Bureau of Mines also collects and publishes separate data on man-hours, active days, length of service, and accidents.

Censuses of mineral industries have been conducted by the Bureau of the Census approximately every 10 years since 1840. The most recent censuses have been those of 1939 and 1954. Summary data from those censuses are included here. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau of the Census at monthly, quarterly, or annual intervals and issued in the *Products for Industry* series.

Data on mining and mineral products may also be found in other sections of this report. For example, data on iron and steel, aluminum and magnesium, copper products, clay products, and other mineral products appear in section 30, Manufactures; and summary data for U. S. Territories and possessions appear in section 33. In general, figures shown in the individual commodity tables include data for U. S. Territories and possessions, and may therefore not agree with summary table 924.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series 5") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

—This section presents data for the most recent year or period available on May 17, 1957, when the material was finalized and sent to the printer. In a few instances, more recent data were added later.

No. 921.—VALUE OF MINERAL PRODUCTION IN THE UNITED STATES: 1881 TO 1955

[In millions of dollars. Principal differences between old basis and new basis are as follows: (1) Total on the new basis represent continental U. S. only; on the old basis, production in Alaska, Hawaii, Philippine Islands, and Puerto Rico was included, but no data were collected for other U. S. possessions now shown in table 1158; (2) U. S. totals on the new basis are a better representation than formerly of the production of primary minerals from domestic mines (or concentrating mills); on the old basis, totals include secondary products and mineral products made from foreign materials. However, value on new basis still includes some advanced products, like cement, lime, and natural gas liquids; also, mine value of nonferrous metals is based not on ore, but on value after refining of the recoverable metal content. Revised data for years prior to 1925 on new basis are not available. See also *Historical Statistics*, series G 1-5]

No. 924.—MINERAL PRODUCTION AND PRINCIPAL PRODUCING STATES: 1950 TO 1954—Continued

[Value in thousands of dollars]

MINERAL	1950		1952		1953		1954	
	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value
Metals—Continued								
Columbium-tantalum concentrate								
pounds (gross weight).....	1,000	2	5,385	17	14,867	30	32,829	57
Copper (recoverable content of ores, etc.).....short tons	909,337	378,284	925,359	447,874	926,448	531,781	835,468	492,927
Gold (recoverable content of ores, etc.).....troy ounces	2,104,959	73,674	1,652,704	57,845	1,704,510	59,658	1,588,799	55,608
Iron ore, usable (excluding byproduct iron slinter)								
1,000 long tons (gross weight).....	97,151	483,358	97,236	590,347	117,198	790,491	76,090	525,416
Lead (recoverable content of ores, etc.).....short tons	430,678	116,283	390,161	125,632	342,635	89,770	325,419	89,165
Manganese ore (35 percent or more Mn)								
short tons (gross weight).....	134,451	6,230	115,379	8,252	157,536	12,480	206,128	15,176
Manganiferous ore (5 to 35 percent Mn).....do	1,087,597	4,609	1,009,018	5,117	1,239,390	6,947	558,332	3,079
Manganiferous residuum.....do	183,842	(14)	215,255	(14)	202,758	(14)	214,931	(14)
Mercury.....do	4,535	369	12,519	2,493	14,297	2,760	17,497	4,626
Molybdenum (content of ore and concentrate)								
1,000 pounds.....	44,544	37,729	42,717	40,845	53,823	52,362	61,105	64,070
Silver (recoverable content of ores, etc.)								
1,000 troy ounces.....	42,406	38,380	39,419	35,676	37,535	33,971	36,908	33,403
Tin (content of ore and concentrate).....long tons	15	31	17	45	(14)	(14)	(14)	(14)
Titanium concentrate:								
Ilmenite.....short tons (gross weight).....	452,370	5,608	522,515	8,023	512,176	7,223	531,895	7,375
Rutile.....do	(14)	(14)	(14)	(14)	6,476	703	7,305	870
Tungsten concentrate								
short tons (60-percent WO ₃ basis).....	4,807	8,157	7,603	28,943	9,557	35,933	13,691	51,433
Zinc (recoverable content of ores, etc.).....short tons	623,369	178,667	666,001	222,982	547,430	125,321	473,471	102,180
Zirconium concentrate.....do	(14)	(14)	(14)	(14)	21,234	794	17,959	820
Undistributed ¹	-----	10,219	-----	26,782	-----	30,174	-----	36,279

¹ Adjusted to eliminate duplication in the value of clays and stone.

² Includes small quantity of anthracite mined in States other than Pennsylvania.

³ Excludes sharpening stones, included with "Nonmetallic minerals, undistributed."

⁴ Weight not recorded.

⁵ Value included with "Nonmetallic minerals, undistributed."

⁶ Includes clays sold or used for cement.

⁷ Beginning 1954, quartz from pegmatites and quartzite included with stone.

⁸ Beginning 1954, sand and sandstone (ground) included with sand and gravel or stone.

⁹ Excludes abrasive stone, bituminous limestone, bituminous sandstone, and soapstone, all included elsewhere in table. Also excludes limestone for cement and lime.

¹⁰ Less than \$1,000.

¹¹ Sold or used by producers. Quantity and value of ground material included.

¹² Mine production of crude material.

¹³ Comprises apatite, brucite, diatomite, iodine, Kyanite, quartz crystal (1950), sharpening stones, and minerals indicated by footnote reference 5.

¹⁴ Value included with "Metals, undistributed."

¹⁵ Comprises magnesium chloride for magnesium metal, platinum-group metals (crude), vanadium, and minerals indicated by footnote reference 14.

¹ Represents value of shipments of primary and secondary products of the industry and amount received for contract services performed for other establishments. Figures for 1939 represent value of production.² Excludes proprietors and firm members of unincorporated concerns.³ Gross earnings paid to all employees on payroll.⁴ Represents employees up through the working foreman level engaged in manual work.⁵ Excludes paid vacations, holidays, and sick leave; includes actual overtime hours, not straight-time equivalent hours.⁶ Computed by subtracting cost of supplies, minerals received for preparation, fuel, electric energy, contract work, and purchased machinery from the value of shipments and capital expenditures. For 1939, comparable data not available for capital expenditures or for cost of purchased machinery and equipment.⁷ Represents horsepower of all prime movers plus horsepower of electric motors driven by purchased energy.⁸ Excludes figures for uranium-radium-vanadium ores industry (not available).⁹ Includes statistics for employees at central offices not classified by industry.¹⁰ Includes statistics for nonproducing metal mining establishments not classified by industry.

SUMMARY: 1939 AND 1954

production and with expenditures less than \$2,500; for 1954, less than \$500. 1954 data are preliminary]

Zinc ⁶	do.....	19, 449	42, 139	39, 889	4, 944	7, 556	6, 501

¹ Includes matte and oxide.
² Excludes semifabricated forms.
³ Includes alloys in chief value of lead.
⁴ Includes alloys in chief value of tin.
⁵ Includes crude (containing 85 percent or more sul fur), crushed, ground, refined, sublimed, and flowers.
⁶ Includes alloys..
⁷ Includes tin plated and terne plated scrap.

¹ Data relate to mines having output of 1,000 tons a year or more, including lignite and small output of anthracite produced outside Pennsylvania. Includes Alaska. ² Average number of men working daily.

³ Capacity of active mines with existing labor force, derived on basis of average output per day.

⁴ Includes 5.7 percent and 8.0 percent for 1954 and 1955, respectively, mined by continuous mining machines (not available for earlier years).

⁵ Beginning 1945, production data include some bootleg coal purchased by anthracite industry for preparation and shipment to market. Data on employment, however, exclude such purchased coal, as complete employment data on "bootleg" holes are not available. Data after 1950 not strictly comparable with prior years.

⁶ Less than 500 tons. ⁷ Not available. ⁸ For 1911.

¹ Federal Power Commission. Represents consumption by public-utility power plants in power generation including a small quantity of coke amounting to approximately 100,000 tons annually.

² Bureau of the Census.

³ Association of American Railroads. Represents consumption by class I railways for all uses, including locomotive, powerhouse, shop, and station fuel. The ICC reports that in 1955 consumption for all uses by class I line-haul railways, plus purchases for class II and class III railways, plus purchases by all switching terminal companies combined, was 17,337,755 tons of bituminous coal and lignite.

⁴ Includes small amount of anthracite.

⁵ Estimates based upon reports collected from a selected list of representative manufacturing plants and retailers.

¹ Estimated recoverable proved reserves. Offshore reserves included for California, Louisiana, and Texas. Excludes gas lost due to natural-gas liquids recovery. Source: American Gas Association.

² Includes liquefied petroleum gases and other allied products.

³ Comprises gas sold or consumed by producers, including losses in transmission, amounts added to storage, and increases in gas in pipelines.

⁴ Colorado, Montana, and Utah included with Wyoming.

⁵ Montana and Utah included with Colorado.

⁶ For 1953, Michigan included with Illinois; for 1954 and 1955, Michigan and Ohio included.

⁷ For 1953, Nebraska included with Kansas; for 1954 and 1955, Nebraska and North Dakota included.

⁸ Ohio included with Pennsylvania.

¹ Excludes bonus payments of Office of Metal Reserve.² Data are for "general imports," i. e., include copper imported for immediate consumption plus material entering country under bond. Comprises copper in ingots, plates, and bars, ores and concentrates, regulus, blister, and scrap. ³ Not separately recorded.⁴ Total exports of copper, exclusive of ore, concentrate, composition metal, and unrefined copper. Exclusive also of "other manufactures of copper," for which quantity figures are not recorded. Beginning 1953, data not strictly comparable with earlier years, due to changes in classification.⁵ Includes unrefined copper.⁶ Beginning 1945, excludes rods.⁷ Includes small exports of unrefined black blister and converter copper (bars, pigs, etc.).⁸ Beginning 1945, new copper and old scrap only.Source: Department of the Interior, Bureau of Mines; *Minerals Yearbook*.

No. 963.—COPPER—EXPORTS AND IMPORTS: 1891 TO 1956

[Quantities in short tons; values in thousands of dollars. Exports are those classed as "domestic" in foreign trade statistics but include copper smelted or refined in United States from imported ore or unrefined metal. Prior to 1952, values include all forms of copper, quantities represent all copper except some "Other copper manufactures" for which quantity data were not reported. For 1952 and subsequent years, export data exclude certain copper manufactures not reported separately. Copper content of exports of ore for years 1891-1915 and of imports for years 1894-1903 was estimated.]

Section 29

Construction and Housing

This section presents various measures of construction activity and costs, dwelling units, housing values, facilities, and structural characteristics, and residential financing.

The principal sources of these data are the monthly *Construction Review*, a joint publication of the Business and Defense Services Administration and the Bureau of Labor Statistics, which assembles data on the value of contract awards, construction activity cost and seasonal indexes, housing starts and vacancy rates, building permits, construction materials production, shipments and inventories, materials prices, wage rates and employment; and the *U. S. Census of Housing: 1950*, the reports of the decennial Census of Housing conducted by the Bureau of the Census. Other sources which specialize in particular types of construction or housing statistics are: The monthly *Dodge Statistical Research Service* of F. W. Dodge Corporation, which presents State data on construction contracts awarded; the *Engineering News-Record* issued weekly by the McGraw-Hill Publishing Company, Inc., which contains figures on contract awards and construction costs; the *Annual Report* of the Housing and Home Finance Agency which offers public housing statistics from its Public Housing Administration; and the *Annual Report* of the Federal Home Loan Bank Board which presents home mortgage data. Monthly data on the characteristics of vacant dwelling units are also collected by the Bureau of the Census and are presented quarterly in its *Housing and Construction Reports*.

Construction.—Monthly estimates of the value of construction put in place are prepared jointly by the Business and Defense Services Administration and the Bureau of Labor Statistics and appear in the *Construction Review*. Estimates of privately financed nonresidential construction are primarily the responsibility of the Business and Defense Services Administration. Construction estimates for buildings such as stores, warehouses, and factories are based on F. W. Dodge Corporation reports of construction contracts awarded, supplemented by building permit data and information from secondary sources for States which the Dodge Corporation does not cover. Public utility construction estimates are the responsibility of the Business and Defense Services Administration and are derived from data compiled by the Interstate Commerce Commission and other Federal regulatory agencies, and by private associations such as the American Gas Association and the American Transit Association.

State and local governmental construction of all types is the joint responsibility of the Business and Defense Services Administration and the Bureau of Labor Statistics. These data are derived from reports issued by numerous construction news services such as the F. W. Dodge Corporation, and *Engineering News-Record*, and from official reports issued by State and local government agencies. Estimates of Federally financed construction and housing construction activity are primarily the responsibility of the Bureau of Labor Statistics. Certain of the Federal agencies administer Federally aided construction programs; other agencies administer the construction of Federally owned facilities. Construction activity data of this type are derived by the Bureau of Labor Statistics from the reports of the respective Federal agencies. Estimates of residential construction activity, including number of housing units started, by type of structure and source of funds, and average construction costs are based primarily upon reports of building permits granted which are received from about 7,000 permit-granting authorities. Field surveys on a sample basis are used to obtain data of housing activity in nonpermit areas.

Note.—This section presents data for the most recent year or period available on May 17, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

Housing.—The first Census of Housing was taken in 1940, although some housing data were collected by the Bureau of the Census in earlier years in conjunction with Censuses of Population and Agriculture. Housing data were collected in sample surveys by the Bureau of the Census in October 1944, November 1945, April 1947, and May 1948 as part of the Current Population Survey (see page 2 for discussion of Survey). A second Census of Housing was taken in 1950. In 1955, a monthly vacancy survey was begun. Results from this survey are issued on a quarterly basis. Data on home ownership were collected in the Current Population Surveys of February 1956 and February 1957.

Dwelling unit.—In general, a dwelling unit is a group of rooms or a single room occupied, or intended for occupancy, as separate living quarters by a family or other group of persons living together or by a person living alone. Living quarters of the following types are not included in the dwelling-unit inventory: Rooming houses with five lodgers or more, transient accommodations (tourist courts, hotels, etc.), and barracks for workers (railroad, construction, etc.).

The count of dwelling units in the 1950 Census may be considered comparable with the count in the 1940 Census. Counts of total vacant units in 1950 are considered more inclusive than in 1940. In 1940, vacant units were enumerated only if they were habitable; vacant units which were uninhabitable and beyond repair were omitted. In 1950, all vacant units, whether or not dilapidated, were included if they were intended for occupancy as living quarters.

Residential financing.—Statistics on residential financing were collected on a sample basis as part of the 1950 Census of Housing. The survey covered nonfarm residential mortgaged properties, both owner and rental. The data are expressed in terms of mortgaged properties, number of mortgages, and outstanding mortgage debt. Construction mortgages were excluded.

Data on home mortgages and foreclosures, based largely on reports from major holders, are provided by the Federal Home Loan Bank Board. The Federal Housing Administration compiles from its records data on its real estate financial operations, such as volume of mortgages insured, type of lending institution, etc. The Veterans Administration also compiles from its records data on amounts and types of loans. For explanation of the relationship between the data obtained in the 1950 Census of Housing and those compiled from other sources, see Department of Commerce, Bureau of the Census, 1950 Census of Housing, Volume IV, *Residential Financing*.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series H 1-26") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

FIG. XXXVI.—VALUE OF PRIVATE AND PUBLIC CONSTRUCTION IN CURRENT DOLLARS: 1940 TO 1956

[Represents value of construction put in place. See table 971]

FIG. XXXVII.—VALUE OF PRIVATE AND PUBLIC CONSTRUCTION IN 1947-49 PRICES: 1940 TO 1956

[Represents value of construction put in place. See table 972]

Source of figs. XXXVI and XXXVII: Department of Commerce, Business and Defense Services Administration.

No. 971.—VALUE OF PRIVATE AND PUBLIC CONSTRUCTION: 1915 TO 1956

[In millions of dollars. Represents value of construction put in place during year; consequently differs from building permit and construction contract data which measure value of work started. In addition, coverage generally broader than permit and contract data. Includes value and cost of installation of equipment which is integral part of structure, but not that of machinery, shipbuilding, or land costs. See also *Historical Statistics*, series H 1-26]

No. 975.—BUILDING PERMIT ACTIVITY—VALUE BY CLASS OF CONSTRUCTION AND OWNERSHIP: 1954 TO 1956

[In thousands of dollars. Covers building activity in all urban and rural-nonfarm localities having building-permit systems. Such localities (approximately 7,000) include about 80 percent of the nonfarm population of the country, according to the 1950 Census. Compiled from estimates of construction costs made by prospective builders when applying for permits to build, and value of contracts awarded by the Federal Government. State and local government construction is reported by local officials]

CLASS OF CONSTRUCTION	1954	1955	1956
All building construction	16,485,791	18,535,953	18,760,732
New dwelling units	9,855,625	11,535,064	10,138,491

¹ Represents combination of indexes of wholesale prices of building materials (weighted 61.4 percent) and average of hourly earnings in building construction (weighted 38.6 percent).

² Covers materials either (a) physically incorporated as integral part of a building or (b) normally installed during construction and not removable without seriously impairing building. Excludes consumer durables, as kitchen ranges, refrigerators, etc.

³ Covers both full- and part-time construction workers through working foreman level, engaged on-site or off-site in actual construction work (including preassembly and precutting operations) who are employed by general contractors and by subcontractors engaged in special trades, such as plumbing, painting, etc. Excludes all non-construction workers employed by these firms.

⁴ Based on minimum wage rates agreed upon through collective bargaining; excludes overtime. As of May 15 through 1935; June 1 for 1940; July 1, thereafter.

⁵ For 1915 and 1920, based on weighted average of Interstate Commerce Commission indexes; 1925-1955, based on average contract unit bid prices for composite mile (involving specific average amounts of excavation, paving, reinforced steel, structural steel, and structural concrete).

⁶ Covers both building and nonbuilding construction excluding maintenance and repair. Represents a weighted average of various indexes both private and government used for different types of construction.

⁷ Represents composite of 36 major cost items in construction of 5 types (3 4-story and 2 1-story) of industrial buildings in New England. Confined to labor, materials, and other costs actually required (including insurance, taxes other than Federal and State income, and contributions to union health and welfare fund) for construction of the building. Excludes home-office overhead, profit on the job, and architectural and engineering fees.

⁸ Not available.

⁹ Average for 30 cities (prior to 1925, 24 cities) of 4 types of buildings: Wood-frame, brick-wood frame, brick-steel frame, and reinforced concrete. Covers materials and labor costs in structural portion of buildings but excludes materials and labor prices for plumbing, heating, lighting, sprinklers, and elevators. Reflects employee-benefit costs, and allows for contractors' overhead and profit.

BUILDING COST INDEXES: 1915 TO 1956

used in converting to 1947-49 base and for detail discussion, see source publication. For index on 1913=100, see or AAC, ENR (const.), and Turner indexes]

¹⁰ Covers both building and nonbuilding construction. Wages and materials for 12 cities combined in 40-6 ratio. Wages are for hod carriers and common laborers only. Materials weighted: Sand, gravel, crushed stone cement, common brick, and lumber, 1 each; hollow tile, $\frac{1}{2}$; and structural and reinforcing steel (together) $\frac{1}{2}$. Excludes taxes and employee-benefit costs.

¹¹ Average of 20 cities for types shown. Weights based on surveys of actual building costs and vary with different types of structures. Wage rates used for both common and skilled labor. Reflects payment of sales taxes and social security payroll taxes.

¹² Unweighted averages from Boeckh series prepared by Department of Commerce, Business and Defense Services Administration.

¹³ Building construction index computed on basis of hypothetical unit of construction requiring 6 bbls. of portland cement, 1.088 M bd. ft. measures of 2" x 4" lumber, 2,500 lbs. of structural steel, and 68.38 hours of skilled labor. General construction index based on same materials components combined with 200 hours of common labor. Not adjusted for changes in materials availability, competitive conditions, efficiency of plant and management, productivity, or related factors.

¹⁴ Composite of 36 major cost elements in 3 commercial-type buildings including structural elements and elevators, wiring, plumbing, heating, and ventilating. Job costs include both skilled and unskilled labor, and series reflects employee-benefit costs.

¹⁵ Eastern cities. Based on firm's cost experience with respect to labor rates, materials prices, competitive conditions, efficiency of plant and management, and productivity. Reflects payment of sales taxes and employee-benefit costs.

¹⁶ Based on data covering public utility construction costs (building construction, gas plant construction, and electric light and power construction) for 95 items in 6 geographical regions of the U. S. Job costs include both skilled and common labor. Indexes do not reflect tax payments nor employee-benefit costs. Department of Commerce has converted these series to a 1947-49 base, and combined the various items into a single index.

¹⁷ As derived by Department of Commerce; covers steam production plants only; excludes hydraulic plants.

No. 980.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES—VALUE OF CONSTRUCTION AND FLOOR SPACE OF BUILDINGS, BY CLASS OF CONSTRUCTION: 1925 TO 1956

[Values in millions of dollars; floor space in thousands of square feet. Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the *Statistical Abstract*. Figures for individual States and districts in table 981 represent value of construction contracts awarded in States and districts where work was actually done. See also *Historical Statistics*, series H 51-57]

¹ Comprises 5 boroughs and Nassau, Orange, Putnam, Rockland, Suffolk, and Westchester Counties.² All counties north of Orange, Putnam, and Rockland.Source: The F. W. Dodge Corporation, New York, N. Y.; figures published currently in *Statistical Research Service*.

No. 982.—CONSTRUCTION CONTRACTS AWARDED—INDEXES OF VALUE: 1920 TO 1957

[1947-49-100. Indexes are derived from monthly figures of construction contracts awarded reported by F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments computed separately for "residential" and "all other" types of construction and the two series combined. Indexes based on a 3-month moving average, centered at middle month. More detailed description of indexes obtainable from the Division of Research and Statistics, Board of Governors of the Federal Reserve System]

No. 983.—ENGINEERING CONSTRUCTION CONTRACTS AWARDED AND BACKLOG OF PROPOSED CONSTRUCTION—VOLUME, BY TYPE: 1930 TO 1956

[In millions of dollars. Covers continental U. S. construction projects of following minimum costs: For 1935, waterworks, excavation, drainage, and irrigation, \$10,500; other public works, \$17,500; industrial buildings, \$25,500; other buildings, \$105,000. For 1930 and 1940-45, minimums used were \$15,000, \$25,000, \$40,000, and \$150,000. For 1946-47, these minimums were raised to \$22,500, \$40,000, \$55,000, and \$205,000, respectively, to account for rise in construction costs. For 1948-50, minimums used were, \$28,000, \$50,000, \$68,000, and \$280,000. For 1951-54, minimums used were: \$34,000, \$60,000, \$82,000, and \$300,000. For 1955-56, minimums used were: \$44,000, \$73,000, \$93,000, and \$344,000]

¹ Includes private; amount of contracts awarded in 1956, \$10,366,000.

² Includes contracts awarded for atomic energy plants as follows (in millions): 1949, \$247; 1950, \$2,020; 1951, \$123; 1952, \$2,329; 1953, \$72; 1954, \$19; 1955, \$131; 1956, \$36.

³ Deduct \$400 million for cost savings on Portsmouth, Ohio, atomic energy plant originally estimated to cost \$1.2 billion.

—Bureau, New York, N. Y.

No. 987.—DWELLING UNITS OWNED OR SUPERVISED BY THE PUBLIC HOUSING ADMINISTRATION, BY PROGRAM: 1956

[As of December 31. Excludes units on which PHA has mortgages for collection. PWA housing was authorized under the Industrial Recovery Act of 1933 and the Emergency Relief Appropriation Act of 1935. The Housing Act of 1937 (PL-412) provided for loans and annual contributions to local public housing authorities. In 1940, PL-671 extended the provisions of PL-412 to provide for defense-worker housing. Title III of the Housing Act of 1949 (PL-171) increased the provisions of PL-412 by 810,000 dwelling units. The Housing Act of 1950 (PL-475) provided for conveyance by PHA of "permanent war housing units" to local public housing authorities. Minus sign (—) denotes decrease]

No. 990.—NEW PERMANENT DWELLING UNITS STARTED IN NONFARM AREAS, BY TYPE: 1920 TO 1956

(Figures are estimates covering construction of all new permanent family dwelling units in nonfarm area of United States, based upon building-permit reports, and from 1946, on building-permit information supplemented by data from field surveys in non-permit-issuing places. This area consists of all urban and rural-nonfarm places. See also *Historical Statistics*, series H 40-45, data for 1941-1945 in historical volume include temporary units)

¹ Metropolitan segment corresponds to the 168 standard metropolitan areas used in the 1950 Census.

² Includes 1- and 2-family dwellings with stores. ³ Includes multifamily dwellings with stores.

⁴ Private construction costs based on permit valuation, adjusted for understatement of costs shown on permit applications. Public construction costs based on contract values or estimated construction costs for individual projects. ⁵ Not available.

No. 991.—NUMBER AND AVERAGE CONSTRUCTION COST OF NEW PERMANENT PRIVATELY OWNED ONE-FAMILY DWELLING UNITS STARTED: 1940 TO 1956

(Average cost of all such dwelling units started nationally. Data do not represent construction cost of a typical house. These averages are affected by changes in cost of materials and labor, variations in size and design of the houses, type of projects started, differences in construction methods, and other variables. Construction costs cover only labor, materials, and subcontracted work, and that part of the builders' overhead and profit chargeable directly to the construction projects. Cost data based primarily on builders' estimates of construction cost made at the start of construction, and from 1946, also on reports of construction cost by individual construction contractors in a representative group of localities not issuing permits)

¹ Detached, semidetached, and row houses which can be sold independently of nearby or adjoining units.

² Advertised price at the time of survey, or the actual selling price of units already sold.

³ Computed from outside dimensions. Includes all livable space as well as laundry rooms, halls, and closets on first or higher floors, but excludes rumpus, storage, laundry, and utility rooms in the basement, garages, unfinished attic space, and open or screened porches.

⁴ Less than 0.5 percent.

⁵ Only rooms specifically designed for sleeping purposes.

⁶ Includes a few houses with no bedrooms.

⁷ Includes such outer facing materials as cut stone, field stone, structural tile, or stucco.

⁸ Includes such outer facing materials as composition (e. g., asphalt siding and shingles), metal, or stucco.

⁹ Steel frame panels, poured concrete, a combination of metal and lumber, concrete reinforced with steel, or sheathing panels with supplementary frame members.

No. 996.—RENTAL AND HOME-OWNER VACANCY RATES—PERCENT DISTRIBUTION, BY REGIONS, AND BY INSIDE AND OUTSIDE STANDARD METROPOLITAN AREAS: 1950, 1956, AND 1957

[Rental vacancy rate is the relationship between vacant housing for rent and total rental supply. The rental supply comprises renter-occupied units, vacant units already rented and awaiting occupancy at the time of enumeration, and vacant units available for rent. Similarly, home-owner vacancy rate is the relationship between available vacant housing for sale and total home-owner supply. The home-owner supply comprises owner-occupied units, vacant units already sold and awaiting occupancy, and vacant units available for sale]

ITEM AND YEAR	United States	REGIONS				Inside standard metropolitan areas	Outside standard metropolitan areas
		North-east	North Central	South	West		
Rental vacancy rate:							
1950, April.....	2.6	1.5	1.7	3.4	4.9	2.2	3.3
1956, 1st quarter.....	5.6	2.9	4.8	7.0	9.3	4.4	7.6
1957, 1st quarter.....	4.8	3.0	4.6	5.7	6.6	3.9	6.3
Home-owner vacancy rate:							
1950, April.....	0.9	0.9	0.7	1.0	1.3	1.1	0.7
1956, 1st quarter.....	0.9	0.7	0.6	1.0	1.3	0.9	0.8
1957, 1st quarter.....	0.8	0.7	0.8	0.8	1.0	0.7	0.9

¹ "Occupied dwelling units" for 1940 and 1950 is not exactly same as "Families" for earlier years, but differences are so small as to be negligible. Count of families for 1900 and 1930 represents private families only; that for 1890, 1910, and 1920, includes small number of quasi-family groups which were counted as families in those years.

² Since population in private families was not tabulated separately for all years, population per occupied dwelling unit (or family) is based on total population (including population in quasi-households). See table 9, pp. 12, 13.

³ Not available.

⁴ For 1890 to 1920, "Farm" contains a small proportion of urban-farm families in addition to the rural-farm families. For changes in definition of "Farm," see "Farm and nonfarm residence," p. 2.

No. 1005.—DWELLING UNITS—MORTGAGE STATUS OF NONFARM OWNER-OCCUPIED UNITS: 1890 TO 1950

[For 1940 and 1950, mortgage statistics are for owner-occupied dwelling units in 1- to 4-dwelling unit structures without business. An owner-occupied dwelling unit was reported as mortgaged if property on which it was located had an indebtedness in form of a mortgage or deed of trust, or if occupants had contract to purchase property. For 1920 and earlier, mortgage data are for owner-occupied units in all types of structures. Although types of units for which mortgage data were reported are not the same for all censuses, differences are not large enough to invalidate comparisons]

Section 30

Manufactures

This section presents measures of the manufacturing segment of the economy and its component inputs and outputs. The input data include figures for establishments; employment and wages; raw materials, fuels, and energy consumed; plant and equipment expenditures; and water use. The output data include figures for value and quantity of production and shipments; and value added by manufacture. Both types of data are shown for manufacturing as a whole, for major product groups, and for specific selected products.

The principal sources of these data are the reports of the Census of Manufactures conducted periodically by the Bureau of the Census; the same agency's *Annual Survey of Manufactures*; and its *Facts for Industry* series which presents monthly, quarterly, or annual data on production, shipments, and stocks for particular commodities. Indexes of industrial production are presented monthly in the Federal Reserve Board's *Federal Reserve Bulletin*. Reports on current activities of industries, or current movements of individual commodities, are also compiled by such government agencies as Bureau of Labor Statistics, Agricultural Marketing Service, Business and Defense Services Administration, Fish and Wildlife Service, Tariff Commission, and Internal Revenue Service, and by private research or trade associations such as the American Iron and Steel Institute, the National Cannery Association, and the National Association of Hosiery Manufacturers.

Data on financial operations and intercorporate relations of manufacturing corporations are collected from time to time by the Securities and Exchange Commission, the Tariff Commission, and the Federal Trade Commission. Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are summarized and published for the leading corporations that are registered with the Securities and Exchange Commission. The Tariff Commission publishes commodity surveys which cover economic and competitive aspects of production, distribution, and international trade in selected important industries. Each survey deals with several products which are related because of the raw materials consumed, or competitive uses. The Federal Trade Commission has made several comprehensive studies of individual industries.

Censuses and annual surveys.—The first Census of Manufactures covered the year 1809 and a census was taken at 10-year intervals to 1899, with the exception of 1829. It was conducted at 5-year intervals from 1904 through 1919, and every second year from 1921 through 1939, but was suspended during the war period until the 1947 Census. A census covering the year 1954 was the first taken under present legislation which provides for a quinquennial Census of Manufactures.

The *Annual Survey of Manufactures* was conducted for the first time in 1949 and carries forward, for the intercensal years, measures of manufacturing activity covered in detail by the quinquennial Census of Manufactures. It is designed to yield estimates of general statistics (employment, payrolls, value added by manufacture, inventories, and capital expenditures) for industry groups, important individual industries, geographic divisions, States, and important cross-tabulations of major industry groups by division and by State.

Note.—This section presents data for the most recent year or period available on June 6, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

The annual survey is based on a sample of about 55,000 of an approximate total of 288,000 manufacturing establishments. It comprises all large plants and a representative selection of the more numerous small plants. The large plants in the survey account for approximately two-thirds of total manufacturing employment in the United States. (Government-owned and -operated establishments are excluded.)

Establishments and classification.—The 1947 and 1954 Censuses of Manufactures covered operating manufacturing establishments as defined in the *Standard Industrial Classification Manual* issued by the Bureau of the Budget. Reports were required from all establishments employing one or more persons at any time during the census year. Each of the establishments tabulated was classified in one of the 461 manufacturing industries as defined by the Standard Industrial Classification system. This system defines an industry as a number of establishments producing a single product or a closely related group of products. An establishment is classified in a particular industry if its production of this product or product group exceeds in value its production of any other product group. In a few instances, the industry classification of an establishment is determined not only by its product group but also by the processes employed in making those products.

While some establishments produce only the products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect not only the primary activities of the establishments in that industry but also their activities of a secondary nature. For this reason the industry statistics usually cannot be directly related to statistics on the total shipments of products primary to that industry.

The 1947 and 1954 Censuses were conducted on an establishment basis. The term "establishment" signifies a single physical plant site or factory and is not necessarily identical with the business unit or company which consists of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

In earlier Censuses of Manufactures, establishments having less than \$5,000 value of products were designated as outside the scope of the census. The change in the minimum size limit in 1947 (employment of one person) as compared with 1939 has not appreciably affected the comparability for these two years, except for data on number of establishments for a few industries.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., are defined in essentially the same way for the annual surveys as for the census of manufactures. Consequently, these series may be considered to be comparable. However, beginning with 1949, average employment was calculated from the figures reported for the pay periods ending nearest the fifteenth of March, May, August, and November, whereas for 1947 such averages were based on 12 monthly employment figures. The 1954 figures are an average of reported employment totals for the four specified months, except for highly seasonal industries, where a 12-month average was obtained. Further, 1947 figures exclude data for central administrative offices and auxiliary establishments of manufacturing concerns, which are included in the statistics for later years. Employment data shown for administrative and auxiliary units were obtained from employer reports for mid-March to the Bureau of Old-Age and Survivors Insurance for the years 1949 to 1953; for 1954 such data were obtained during the census directly from each manufacturing firm.

Material in other sections.—In addition to the statistics presented in this section, statistics on the output and activities of manufacturers will be found in various other sections of this volume. For example, an historical summation of production and

consumption of raw materials appears in section 28, Mining and Mineral Products (see table 906); data on wages and hours appear in section 8, Labor Force, Employment, and Earnings; and abbreviated balance sheet and income account data on all manufacturing corporations appear in section 14, Federal Government Finances and Employment, and in section 17, Business Enterprise.

Historical statistics.—Tabular headnotes (as “See also *Historical Statistics*, series J 1-12”) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Technical Note—Annual Survey of Manufactures

The annual survey estimates vary from the totals that would have been obtained from a complete canvass of all manufacturing establishments. The relative magnitude of this sampling variation is given in the source report cited. The standard error should be interpreted to mean that the sample estimates will differ from complete canvass totals by *less than*: (1) The percentage shown in approximately 2 cases out of 3; (2) twice the percentage shown in approximately 19 cases out of 20; and (3) three times the percentage shown in almost every case.

In making any study of the trend since 1947, it is important to take account of the effect of the sampling variation on the apparent increase or decrease shown between years. In addition to sampling errors, individual figures may be subject to biases arising from undetected response or procedural errors which are not reflected in the “standard errors.” Figures are normally withheld from publication in the original source volumes if (1) the standard error of the estimate exceeds 15 percent, or (2) survey estimates are inconsistent with other Census series and related data. Any estimate which can be derived by subtraction of one published figure from another may have a standard error considerably in excess of 15 percent.

FIG. XXXVIII.—INDUSTRIAL PRODUCTION INDEXES: 1937 TO 1967

[1947-49=100. Monthly data based on physical volume and adjusted for seasonal variation. See table 1012]

No. 1010.—MANUFACTURES—SUMMARY: 1849 to 1955

[Figures for 1849 to 1919 comprise establishments whose products were valued at \$500 or more; for 1921 to 1939, establishments whose products were valued at \$5,000 or more; for 1947 and later years, figures cover all establishments employing 1 or more persons at any time during year. See also *Historical Statistics*, series J 1-12]

YEAR	Number of establishments	Number of proprietors and firm members	ALL EMPLOYEES ¹		PRODUCTION WORKERS		Value added ³ (\$1,000)
			Number (average for year) ²	Salaries and wages (\$1,000)	Number (average for year)	Wages (\$1,000)	
Factories and hand and neighborhood industries:							
1849	123,025	(4)	(4)	(4)	957,059	236,755	463,983

¹ Beginning 1939 includes data for employees of manufacturing establishments engaged in distribution and construction work. Extent to which data for such employees were included in figures for earlier years is not known.
² Data for 1949-54 based on pay periods ending nearest 15th of Mar., May, Aug., and Nov. For 1947, data represent average of 12 monthly figures; for earlier years, sum of average number of production workers for year and number of nonproduction workers reported for 1 payroll period (usually in October).
³ Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1849-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.
⁴ Not available. ⁵ Reduced to gold basis. ⁶ Excludes data for salaried officers of corporations.
⁷ Revised on basis of retabulation of returns to exclude data for establishments classified as nonmanufacturing in 1947. Value added by manufacture on a basis comparable with 1937 and previous years was \$24.7 billion.
⁸ Number of proprietors and firm members not revised. Figures for "All employees" revised on basis of estimates rather than by retabulation of 1939 reports. (See footnote 7.)
⁹ Estimates based on sample survey; see text, p. 779.
¹⁰ Includes data for administrative offices, and units auxiliary to manufacturing.

¹ Value of shipments less cost of materials, supplies, fuels, electric energy, and contract work.

² Excludes hours paid for vacations, holidays, or sick leave. Includes actual overtime hours, not straight-time equivalent hours.

³ Comprises, for plants in operation during 1954, expenditures for new structures and additions and new machinery and equipment. Excludes expenditures for "used" plant and equipment acquired from others and for land. In addition, approximately \$400 million was spent by manufacturing firms in 1954 for plants under construction.

⁴ See footnote 2, table 1017. ⁵ See footnote 3, table 1017.

⁶ 1954 figures include data for establishments engaged in the processing and distribution of fluid milk; excluded for 1947.

⁷ Not available. ⁸ Less than \$500,000.

* 1954 figures include data for logging camps and contractors, excluded for 1947.

** For further qualifications of this ratio, see Appendix A of source.

† Withheld to avoid disclosing figures for individual companies.

‡ Includes privately owned and/or operated establishments classified in "Ordnance and accessories."

§ Manufacturing concerns often reported separately for central offices or auxiliaries which serve the manufacturing establishments of a company, rather than the general public. Separate reports were obtained in 1954 from such units if at a different location or if they serviced more than one establishment.

No. 1017.—PERCENT OF TOTAL SHIPMENTS MADE BY LARGE MANUFACTURING COMPANIES IN SELECTED INDUSTRIES: 1947 AND 1954

[First 45 industries as determined by value of shipments in 1954. A "company" comprises all manufacturing establishments owned by the company plus those of subsidiaries or affiliates over which the company has acknowledged control. Percents were computed by adding together all establishments classified in the specified industry under common ownership; selecting the largest 4, largest 8, and largest 20 companies in each industry on basis of value of shipments of all products made by these establishments; and using these values of shipments of the companies as numerator, and total value of shipments of the industry as denominator. Top 4, 8, and 20 companies not necessarily identical for each year. Value of shipments includes transfers of products between manufacturing establishments of same company (interplant transfers). "N. e. c." means not elsewhere classified. Industries and code numbers listed are as defined in Bureau of the Budget, *Standard Industrial Classification Manual*, as amended]

	1954..	1, 189	1, 257, 892	17	23	33	.96	.97

¹ Comprises for all manufacturing establishments classified in an industry (a) value of products "primary" to the industry, (b) value of "secondary" products, which are primary to other industries, and (c) "miscellaneous receipts" such as those for contract and commission work on materials owned by others, scrap and salable refuse, repair, etc. Excludes sales of products bought and resold in same condition. 1947 figures for some industries reflect minor revisions.

² Measures extent to which establishments classified in an industry "specialize" in making products regarded as primary to the industry. That is, value of shipments of *primary* products of establishments in the industry is expressed as a ratio of total shipments of *all* products made by these establishments (excluding "miscellaneous receipts," such as those for contract and commission work on materials owned by others, scrap and salable refuse, repair, etc.). 1947 ratios for some industries reflect minor revisions.

³ Measures extent to which all shipments of primary products of an industry are made by plants classified in the industry, as distinguished from secondary producers elsewhere. That is, value of shipments of *primary* products made by plants classified in the industry is expressed as a ratio of total shipments of *primary* products made by all producers, both in and out of the specified industry. 1947 ratios for some industries reflect minor revisions.

⁴ Value added by manufacture used as basis for making calculations because of large amount of duplication resulting from use of products of some establishments in the industry as materials by other establishments in the same industry.

⁵ Not shown because total value of primary products shipped includes large amount of duplication.

⁶ Based on combined figures for Industry 2011, Meat Packing Plants, and Industry 2013, Prepared Meats.

⁷ Not available. ⁸ Excluded from 1947 Census.

⁹ Comparable data not available. In 1947, Industry 2613, Building Paper and Board Mills, combined with Industry 2612, Paper and Board Mills.

¹⁰ Includes Vinegar and Cider Mills, and Liquid, Frozen, and Dried Eggs processors, for which figures were published separately in 1947.

¹¹ Comparable data not available due to significant revisions in 1947 classification of plants or products.

¹² For 1947, includes multi-unit bakeries producing baked goods at each location for sale through a retail outlet at the same location; excluded for 1954.

¹³ Comparable data not available. In 1947, Industry 2829, Organic Chemicals, n. e. c., included Industry 2822, Intermediate Coal-Tar Products.

¹⁴ Includes Government-owned privately operated plants.

¹⁵ In 1947, Industry 2811, Sulfuric Acid, combined with Industry 2819, Inorganic Chemicals, n. e. c.; separate figures tabulated for 1954. Specialization ratio and coverage ratio for combined industries for 1947 were 87 and 80, respectively.

¹⁶ Industry 3321, Gray-Iron Foundries, includes in addition to commercial (jobbing) foundries, "captive" foundries at separate locations producing gray-iron castings for other plants of the same company. Accordingly, the ratios do not reflect market shares in the commercial foundry industry.

¹⁷ Includes data for Industry 2014, Sausage Casings.

¹⁸ Includes data for Industry 2335, Women's Suits and Coats, and Industry 2336, Women's Skirts; shown separately in 1947 and therefore comparable data not available.

¹ Represents average total number of employees of all establishments classified in an industry.

² See footnote 2, table 1017. ³ See footnote 3, table 1017. ⁴ Not available.

⁵ Not shown because total value of primary products shipped includes large amount of duplication.

⁶ 1951 figures not available. ⁷ See footnote 16, table 1017.

⁸ Not meaningful because of large proportion of receipts for repair work to total value of shipments.

No. 1020.—MANUFACTURES—EXPENDITURES FOR NEW PLANT AND EQUIPMENT, BY MAJOR INDUSTRY GROUPS: 1947 TO 1954

[In thousands of dollars. See headnote, table 1022. 1952 and 1953 figures based on sample and subject to sampling variation. See text, p. 779. 1947 figures exclude expenditures for: (a) Plants under construction but not in operation; (b) plants idle throughout year; (c) nonmanufacturing establishments of manufacturing companies; (d) plants and equipment leased to manufacturers by owners; and (e) used plant and equipment acquired from others. 1952 to 1954 figures include expenditures for plants under construction but not in operation]

¹ 1954 figures include data for establishments engaged in the processing and distribution of fluid milk; excluded for other years.

² 1952 to 1954 figures include data for logging camps and contractors; excluded for 1947.

³ Data for establishments under construction have been excluded from the expenditure figure for the industry group in order to avoid disclosing figures for individual companies. They are, however, included in "All industries" totals.

⁴ Includes privately owned and/or operated establishments classified in "Ordnance and accessories."

No. 1022.—VALUE OF MANUFACTURERS' INVENTORIES, BY MAJOR INDUSTRY GROUPS: 1947 AND 1954

[In thousands of dollars. 1947 figures exclude small establishments not reporting inventory (or expenditure) data; see source for measure of undercoverage. For 1954, small establishments (usually those with less than 6 employees) reported only their total beginning and end-of-year inventories. Their detailed inventory (or expenditure) figures were derived by prorating on basis of 1954 industry averages to obtain figures representing all establishments for 1954]

¹ Not available.

² Shipments to December 1.

³ Pack of sauerkraut in cases, barrels, and tanks, which have been converted to standard cases. Total supply to January 1, 1957.

⁴ Pack only.

⁵ Covers California only.

⁶ Basis 6/10's.

⁷ Includes fruits for salad and mixed fruits (except citrus).

⁸ Covers Florida only. Pack to January 1, 1957.

⁹ Covers Hawaii and the Philippines. Pack to January 1, 1957.

¹⁰ Covers purple plums only.

¹¹ Includes vegetable juice combinations containing at least 70 percent tomato juice.

¹² Measured in 100-can cases.

1956	465,484	42	26	3,972	498,614	268,226	673	267,554

¹ Separate accounts for alcohol produced at industrial alcohol plants required commencing May 1, 1920.² Through 1940, represents withdrawals of all products for denaturation, that is, domestic ethyl alcohol, spirits produced by registered distilleries (redesignated upon receipt at denaturing plants as alcohol), and rum. Beginning 1945, represents all products (except rum) used for denaturation, that is, domestic ethyl alcohol, imported ethyl alcohol, and spirits. Rum is included for 1935 and 1940 because denatured rum is included with specially denatured alcohol for those years. ³ Prior to 1945 includes denatured rum.⁴ Represents gross production. Net production (gross production minus products used in redistillation) for 1945, 650,089,874.

¹ Barrels of 31 wine gallons. ² Excludes ethyl alcohol.³ A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon. For spirits of less than 100 proof the tax gallon is equivalent to the wine gallon.⁴ Gross production; includes products used in redistillation.⁵ Includes ethyl alcohol.⁶ Production represents total amount removed from fermenters, including distilling material (substandard wines produced with excessive water or residue materials). In 1956, 344,530,291 gallons of distilling materials were produced. ⁷ Standard United States gallon.⁸ Includes vermouth and other special natural wines.⁹ Excludes distilling materials.¹⁰ Includes champagne, other effervescent wines, and artificially carbonated wines.

No. 1030.—TOBACCO PRODUCTS—PRODUCTION AND AMOUNT OF LEAF TOBACCO CONSUMED IN MANUFACTURE: 1901 TO 1955

[Data relate to products manufactured in continental U. S. and exclude tobacco used in bonded manufacturing warehouses. Leaf tobacco figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. Tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915. For other conversion ratios, see source. See also *Historical Statistics*, series J 171 and J 174.]

No. 1031.—SMOKING PATTERNS, BY AGE, COLOR, SEX, AND URBAN-RURAL RESIDENCE: 1955

[In thousands of persons 18 years old and over. Excludes Armed Forces and inmates of penal and mental institutions and inmates of homes for the aged, infirm, and needy. Data classified by smoking habits existing at time of interview (February 1955). Among smokers, the same person may be included in more than one category; e. g., smoke both cigarettes and cigars. Figures (except population) exclude persons not reporting on smoking habits. Based on Current Population Survey (see Technical Note, p. 193).]

¹ Reported by Bureau of the Census. For American cotton, tare of 22 pounds deducted from gross weight of bale produced in 1920; beginning 1925, tare as reported by Crop Reporting Board deducted. For foreign cotton, 15 pounds deducted.

² Reported by Bureau of the Census. Beginning 1950, excludes consumption of cotton and other spinning systems and consumption in batting and felt manufacture.

³ From *Textile Organon*. Represents domestic shipments plus imports for consumption.

⁴ From *Textile Organon*. Represents domestic production less exports plus imports for consumption.

⁵ Through 1952, represents imports for consumption reported by Bureau of the Census plus estimated production by (a) Bureau of Plant Industry through 1945 and (b) Portland, Oreg., office of Agricultural Marketing Service, 1950 to 1952; beginning 1953, imports for consumption reported by Bureau of the Census.

⁶ Compiled from reports of Bureau of the Census. Through 1930, general imports less reexports; beginning 1935, imports for consumption.

Source: Compiled by Department of Agriculture, Agricultural Marketing Service; records. Figures through 1954, published in Department of Commerce, Business and Defense Services Administration; *Wool and Man-Made Fibers in the United States*.

¹ Comprises all cotton-system spindles in place regardless of fiber spun (includes idle spindles).

Source: Department of Commerce, Bureau of the Census; annual report, *Cotton Production and Distribution*.

1038.—COTTON-SYSTEM SPINDLES, COTTON CONSUMPTION, AND STOCKS: 1840 TO 1956

For 1915 to 1955 relate to years ending July 31 and those for prior years to years ending Aug. 31. For 1956, spindles in place comprise all cotton-system spindles in place regardless of fiber spun. Prior to 1946, "lace" figure represents all spindles in place used exclusively for spinning cotton. Consumption and stocks expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and in cotton for all years are in equivalent 500-pound bales. See also *Historical Statistics*, series J 179-180, for on active cotton-system spindles in the U. S. and total cotton consumed including linters]

1945 and earlier years data represent sum of greatest number of cotton spindles reported by each mill as at any time during year, regardless of length of time operated. Beginning with 1947, active figure comprises system spindles active last day of year, regardless of type of fiber spun. On July 31, 1956, there were 60 spindles active on cotton, 1,295,000 on synthetics, 243,000 on other fibers and blends, and 1,348,000 idle. Linters for 1840 to 1908. Figures for all years include foreign and domestic cotton.

¹ available. ² Cotton mills only.

³ Linters stocks held in public storage and at compresses beginning 1938.

⁴ Linters for 1906 to 1908. ⁵ Average, 1909 and 1910.

⁶ "Land" includes "American-Egyptian" 1912 to 1930.

¹ Price received by farmers. Weighted season average 1946 to date, weighted calendar average earlier years. Season April-March.

² Actual weight. Imports for consumption beginning 1934, general imports prior thereto. For 1941 and earlier years, carpet wool includes only Donskoi, Smyrna, East Indian, Chinese, and similar wools without merino or English blood, and through 1933, includes camel hair; apparel wool includes all other wools. For 1942 and thereafter, carpet wool includes all duty-free wool and apparel wool includes all dutiable wool.

³ For 1942-1946, excludes a total of 506 million pounds of duty-free wool imported and stored in this country largely for the British Government, and later re-exported; not available to domestic mills.

⁴ Includes hair of angora goat, alpaca, and other like animals. Includes a small amount of carpet wool beginning 1943.

⁵ Production, minus exports, plus imports; stocks not taken into consideration. ⁶ Scoured basis.

⁷ Includes an allowance for wool under loan.

⁸ Weighted average price for wool sold April 1956-January 1957. ⁹ Not available.

Includes data for Government-owned privately operated plants.
Excludes byproduct coke-oven production. Data for 1950 to 1955 include synthetic ammonium sulfate in coke plants.
Includes data for decolorizing and water purification grades only.
Liquid and gas excludes quantities produced and consumed in the same plants manufacturing soda ash.
Production including quantities liquefied for use, storage, or shipment.
Excludes quantities produced and consumed in manufacture of methanol and ammonia but includes an amount of hydrogen produced for sale or interplant transfer to plants consuming this gas in production of ammonia.
Includes soda and caustic carbonation processes.
Excludes quantities diverted to manufacture of caustic soda and sodium bicarbonate and quantities processed for light and finished dense soda ash.
Excludes quantities converted to finished dense soda ash.
Produced in cooperation with Bureau of Mines.
Production figures represent total production for electrolytic and lime soda processes, including quantities evaporated to solid caustic and reported as such.
Includes quantities produced only for sale or interplant transfer.
Excludes sulfuric acid of oleum grades.

Department of Commerce, Bureau of the Census; 1947 Census of Manufactures reports; 1950-55 commercial manufacturers' reports and published in *Facts for Industry*, Series M19A.

¹ Represents type of high explosives approved by Bureau of Mines as suitable for safe use in coal mines provided specifications of use are followed.

² Includes 16,582,000 pounds liquid oxygen explosive in 1947, 15,620,000 in 1948, 13,922,000 in 1949, 13,804,000 in 1950, 20,341,000 in 1951, 21,915,000 in 1952, 22,465,000 in 1953, 17,741,000 in 1954, and 19,310,000 in 1955.

³ Includes 17,700,000 pounds liquid oxygen explosive in 1954, and 19,248,000 in 1955.

⁴ Includes 41,000 pounds liquid oxygen explosive in 1954, and 62,000 in 1955.

¹ Annual capacity as of Jan. 1, 1957, was 133,459,150 tons.

² Includes all other grades not shown separately, as follows: 1890, 4,248 tons; 1900, 5,445 tons. Beginning 1935, figures include only that part of steel for castings which was made in foundries producing steel ingots.

³ Not available.

⁴ Included with electric.

⁵ Average of Jan. 1 and July 1.

¹ Value of products less cost of materials, supplies, fuel, electric energy, and contract work. For 1890-1933, cost of contract work was not deducted.

² Not available.

³ Includes data for 2 establishments engaged in production of sintered ore and fine dust and operated independently of blast furnaces.

No. 1065.—IRON AND STEEL—AGGREGATE EXPORTS: 1890 to 1956

[Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars. Includes ferromanganese. Beginning 1925, excludes steam and hot water heating boilers and radiators. Value figures through 1920 exact, and those beginning 1925 include data for small items for which quantity figures are not available. See table 1064 for revised list of articles included, effective 1952]

¹ Disc caps (plug caps) and sanitary closure caps (hoods) are reported as one closure when sold to be used together. Beginning 1953, includes milk bottle closures stamped from purchased aluminum foil by milk bottling plants.

² Excludes quantity for cast or coil-type storage indirect water heaters valued at \$1,211,000.

³ Includes value of \$2,265,000 water heaters not specified by kind.

⁴ Not available.

⁵ Includes a small quantity of other metals and glazed earthenware.

Source: Department of Commerce, Bureau of the Census; *Facts for Industry* series. Data on electric stoves and electric water heaters from National Electrical Manufacturers' Association, except for 1954 which were obtained from the 1954 Census of Manufactures.

No. 1072.—MACHINE TOOLS—SHIPMENTS, BY MAJOR TYPES: 1950 TO 1955

[Includes light type machine tools, particularly in drilling machines, lathes, grinding and polishing machines, and milling machines. Excludes machine tools specifically designed for home workshops, model makers, garage, and service shops]

No. 1076.—MANUFACTURERS' SALES OF HOME APPLIANCES, 1940 TO 1956, RETAIL VALUE, 1954 TO 1956, AND HOMES OWNING AND WITHOUT APPLIANCES, 1957

[Lamp bulbs and tubes sales in millions; other figures in thousands. Compiled from sales reports and estimated associations and manufacturers, and from Census Bureau surveys of manufactures. Sales figures represent manufacturers' sales including exports. Unless otherwise specified, figures are for electric appliances only. Estimates for homes owning appliances and homes without appliances are based on the accumulation of yearly totals with certain allowances for replacement, trade-ins, junking, and other factors.]

Section 31

Distribution and Services

This section presents statistics relating to retail, wholesale, and service trades. The data are shown for the distribution trades classified by kind of business and for the different categories of services (personal, business, repair, amusement, hotel, etc.) and cover sales or receipts, establishments, employees, payrolls, proprietors, and other items. A number of tables are also included on advertising expenditures.

The principal sources of these data are the reports of the Census of Business conducted periodically by the Bureau of the Census and the same agency's reports resulting from its annual and monthly surveys. Other important government sources devoted to particular aspects of the distribution and service trades are the monthly *Federal Reserve Bulletin* (department store data) issued by the Board of Governors of the Federal Reserve System, and the monthly *Survey of Current Business* (retail sales, sales and inventories of wholesalers, consumer expenditures for services, etc.) issued by the Office of Business Economics. Financial data for tax-filing and securities-listed corporations engaged in retail, wholesale, or service trades appear in the annual *Statistics of Income* published by the Internal Revenue Service and are also available from the Securities and Exchange Commission. The Federal Trade Commission, in the course of its investigations, also collects operating statistics on firms and chains in various kinds of business.

In addition to the above, private agencies provide a number of helpful reports which include statistics in this field. Among these are: Dun and Bradstreet's monthly *Dun's Statistical Review*; the monthly *Horwath Hotel Accountant* of Horwath and Horwath; and the weekly *Advertising Age* of Advertising Publications, Inc.

Censuses and current surveys.—Censuses of Business have been taken at intervals since 1929. A census covering the year 1954 was the first taken under present legislation which provides for a quinquennial Census of Business.

Current sample surveys of the Bureau of the Census are conducted with varying scope for the retail and wholesale trades. The Bureau compiles monthly reports of the dollar volume of retail sales by kinds of business, showing national and regional estimates, and trends in selected large metropolitan areas. These appear in the *Monthly Retail Trade Report*. Annual figures on sales, inventories, and receivables, classified by kind of business, are presented in the *Annual Retail Trade Report*.

Statistics from the Bureau's wholesale trade survey, which is conducted monthly, present trends in volume of sales and inventories of merchant wholesalers, by kind of business and by geographic divisions. These data appear in the *Monthly Wholesale Trade Report* and are based on reports submitted by a sample of firms representing merchant wholesalers in all kinds of businesses. A more comprehensive survey was made covering 1953 which provided figures on sales, inventories, receivables, bad debt losses, and operating expenses. Monthly estimates of aggregate sales and inventories of all wholesalers are prepared by the Office of Business Economics and published in the *Survey of Current Business*.

The Bureau of the Census also compiles and issues current information on distributor stocks of various canned foods and on inventories of green coffee held and green coffee roasted by roasters, importers, and dealers.

Note.—This section presents data for the most recent year or period available on June 6, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

Establishments and coverage.—The business establishments covered in the fields included in the Census of Business may be generally described as follows:

Retail trade.—Places of business primarily engaged in selling merchandise for personal, household, or farm consumption;

Wholesale trade.—Establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and

Service.—Establishments engaged primarily in the sale of services as contrasted with the sale of merchandise.

Certain types of businesses, broadly defined, generally are not included in the Census of Business. Outstanding in this group are the business activities of doctors, lawyers, dentists, and others performing a professional or scientific service, educational institutions, religious or charitable institutions, hospitals and infirmaries, public utilities, and government-operated enterprises.

Data on retail and service trades from the 1948 Census excluded all establishments which had receipts of less than \$500; 1954 data exclude establishments with no paid employment which had receipts of less than \$2,500 and \$1,000 for retail trade and service trades, respectively. This change does not significantly affect sales comparisons but makes considerable difference in some kinds of establishment counts.

Wholesale trade establishments with no paid employment, included in 1948, were excluded from the 1954 Census. Service trades coverage for 1954 was expanded beyond that for 1948 to include data on golf and country clubs; motion picture production, distribution, etc.; trailer parks, and sporting and recreational camps. Different enumerating techniques adopted for the 1954 Census also increased coverage, particularly of business service and amusement establishments.

Advertising.—Statistics shown here on advertising expenditures are compiled by private organizations. McCann-Erickson, Inc., which compiles certain of the data shown on advertising expenditures, defines national advertising as that advertising done for companies whose products are distributed nationally, and for which national media rates are paid. Local advertising is defined as advertising done for companies which market their products locally and may pay special "local" media rates. Monthly figures are published regularly in *Printers' Ink*, in *Tide Magazine* and also by the Department of Commerce in *Survey of Current Business*.

FIG. XXXIX.—INDEXES OF DEPARTMENT STORE SALES AND STOCKS: 1937 TO 1957

[1937-38=100. Monthly data, adjusted for seasonal variation. See table 1001]

INVENTORIES ⁶										
All retail stores, inventories, end of year.....	(⁴)	(⁴)	5,285	15,190	18,414	(⁴)	⁷ 19,904	⁷ 19,898	⁷ 21,909	(⁴)

¹ New series not comparable to prior years due to change in methodology used to compute retail store sales and inventory estimates; see *Survey of Current Business*, September and November 1952.

² Sales of other durable goods stores, other food stores, and other nondurable goods stores not shown separately but included in totals.

³ Includes sales of certain milk dealers in the amount of \$130,000,000.

⁴ Not available.

⁵ Much of increase in sales from 1929 to 1939 results from change in classification. Garages primarily selling gasoline and oil were classified separately as garages in 1929 Census of Retail Trade and included in filling station category in 1939 Census of Retail Trade.

⁶ Source: Bureau of the Census. Data based on sample.

⁷ Includes chain-store warehouses.

Source: Department of Commerce, Office of Business Economics (except as noted); published currently in *Survey of Current Business*.

No. 1082.—SALES OF RETAIL STORES, BY MONTH: 1954 TO 1956

(In millions of dollars. Monthly figures are seasonally adjusted; they do not necessarily add to annual totals shown. Data not comparable to those published for years prior to 1951 due to change in methodology; see *Survey of Current Business*, September 1952)

No. 1092.—DEPARTMENT STORE MERCHANDISING SUMMARY: 1939 TO 1956

[In millions of dollars, except ratios. These figures are actual dollar amounts reported by a group of department stores located in various cities throughout the country and are not estimates for all department stores. Receipts of goods are derived from reported figures on sales and stocks. New orders are derived from receipts and reported figures on outstanding orders]

MONTHLY AVERAGE	Sales (total for month)	Stocks (end of month)	Outstand- ing orders (end of month)	Re- ceipts (total for month)	New orders (total for month)	RATIOS

No. 1106.—ADVERTISING—EXPENDITURES FOR NATIONAL ADVERTISING IN NEWSPAPERS, BY TYPE OF PRODUCT: 1954 TO 1956

[In thousands of dollars. Data are compiled on basis of actual space measurements of bulk of "national" advertising carried by weekday and Sunday newspapers. Figures represent projections to 100 percent; newspapers actually measured account for approximately 88 percent or slightly better of total weekday circulation and approximately 72 percent or better of total Sunday circulation]

No. 1109.—ADVERTISING—VOLUME OF MAGAZINE ADVERTISING: 1950 TO 1956

[In thousands of dollars. Data represent advertising revenue of general magazines and national farm magazines. Space cost is based on one-time rate; special rates are used where applicable. Retail advertising and direct-mail advertising are not distributed according to type of product, but are included in "All other." Figures from year to year may not be strictly comparable, as a few minor publications are added or deleted]

BILLIONS OF DOLLARS

Source: Department of Commerce. Chart prepared by Bureau of the Census; data from Office of Business Economics.

Section 32

Foreign Commerce

Including International Accounts and Aid

This section presents measures of the flow of goods, precious metals, services, and funds between the United States and other countries. These measures appear in summary in the balance of payments and in detail as dollar values of imports and exports of merchandise or commodities classified by countries (or larger geographic areas) of their origin or destination. Also shown are statistics on international investments, on the foreign aid and mutual security programs, and on import duties.

The principal sources of import and export data are publications of the Bureau of the Census. The *Quarterly Summary of Foreign Commerce of the United States* presents cumulative quarterly data in each issue (annual data in the issue for the last quarter of each year). For a complete list of this Bureau's monthly, quarterly, and annual reports in this field, consult its *Catalog of United States Foreign Trade Publications*. In addition, the Treasury Department's *Annual Report of the Secretary* is a helpful source for information concerning import duties.

The agencies primarily responsible for the compilation of foreign assistance data and international accounts are the Office of Business Economics and the International Cooperation Administration (successor to the Foreign Operations Administration). Current data on Federal Government grants to and credits utilized by foreign countries are presented in the former agency's quarterly *Foreign Grants and Credits by the United States Government*. Data with respect to mutual security programs appear in the latter agency's *Operations Report*, issued quarterly. The Office of Business Economics also presents current statistics on the balance of payments in the monthly *Survey of Current Business*; earlier data on this subject appear in *Balance of Payments of the United States, 1919-53*, published as a supplement to the *Survey of Current Business* in 1954.

International accounts.—The international accounts of the United States comprise the international balance of payments and the international investment position. The balance of payments shows, for given time periods, the transfers of goods, services, and financial assets and the form of compensation for these transfers between this country and the rest of the world; the international investment position indicates for specific dates the value of United States investments abroad and of foreign investments in the United States. The two types of accounts, however, are not strictly comparable; the transfers of assets between countries as shown in the balance of payments is only one of the factors affecting the value of foreign investments. Other factors not shown in the balance of payments are changes in security values and revaluation of assets, and reinvested earnings.

Foreign aid and mutual security programs.—Foreign aid is defined to comprise two categories—grants and credits. Grants are transfers for which no repayment is expected. Credits are loans or other agreements which give rise to specific obligations to repay or return, over a period of years, usually with interest. In some instances assistance has been given with the understanding that a decision as to repayment will be made at a later date; such assistance is included in grants. At such time as an agreement is reached for repayment a credit is established. Such credits cannot, as a

Note.—This section presents data for the most recent year or period available on June 6, 1957, when the material was organized and sent to the printer.

rule, be deducted from specific grants recorded in previous periods; an adjustment for grants converted into credits is made at the time of the agreement. All known returns to the United States Government stemming from grants and credits other than interest, are also taken into account in net grants and net credits.

United States foreign assistance programs since World War II have passed through a number of phases. The "emergency relief" phase was carried on through such means as United Nations Relief and Rehabilitation Administration; the Interim Aid Program for France, Italy, and Austria; the British Loan; and the Greece-Turkey Aid Program. This phase was followed by the Economic Cooperation Act of 1948 which authorized funds for a European Recovery Program (Marshall Plan) and for economic aid to the Republic of China. Separate legislation added Korea to the aid program in January 1949; beginning in June 1950 (when the Nationalist Government of China moved to Formosa) aid was extended to other countries in the "general area of China."

The Marshall Plan came to an end in 1951, and the major purpose of foreign aid shifted from economic recovery to defense support, although economic-type goods from the United States continued to flow to Europe (in smaller quantities). The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949.

The U. S. Technical Cooperation Program ("Point Four") represents another phase of foreign assistance. This program, initiated in a limited form in Latin America during World War II, was authorized by the Congress in the 1950 Act for International Development to help raise standards of living in less developed areas through the extension of technical knowledge and skills. In 1952 most economic, technical, and military assistance programs were combined under the Mutual Security Act.

Sale of United States agricultural commodities for foreign currencies is a comparatively recent development. The funds thereby obtained by the United States are used to finance military or other grants and credits for the purchasing countries or other countries or to pay United States obligations abroad, to purchase strategic materials, etc. Since the foreign countries do not have to use their dollar or other exchange resources for the agricultural commodities from the United States, they therefore receive temporary assistance which can be measured by the extent that the U. S. Government increases its holdings of foreign currencies or receivables.

Foreign trade.—Import data are compiled by the Bureau of the Census from import entries (various Customs forms) which importers are required to file with Collectors of Customs for each shipment arriving. Import values are, in general, based on market or selling price and are f. o. b. the exporting country. Values do not include import duties. The country of origin is defined as the country in which the merchandise was grown, mined, or manufactured. If the importer cannot obtain information as to the country of origin, it is credited (for statistical purposes) to the country of shipment.

Imports are classified either as general imports or imports for consumption. General imports represent total arrivals of imported goods (except for in-transit shipments), that is, merchandise released from Customs custody immediately upon arrival plus merchandise entered into a bonded storage warehouse, bonded manufacturing warehouse, and bonded refining warehouse immediately upon arrival. Imports for consumption comprise merchandise entered into United States consumption channels, that is, merchandise released from Customs custody immediately upon arrival, merchandise entered into a bonded manufacturing warehouse (other than smelting or refining warehouse), merchandise withdrawn from a bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in a bonded smelting warehouse, withdrawn for consumption or for reexport.

Effective January 1954, imports valued at \$250 or less, reported on formal consumption and informal entries (about 1 percent of total import value), are estimated from

a 5-percent sample. The estimated import values are excluded from detailed commodity statistics but are included in the over-all totals and are distributed in the appropriate country, district, and economic class totals and in the totals for groupings of commodity classifications (i. e., commodity group or subgroup). Some indication of the undercounting in the detailed commodity statistics for imports is presented in the Appendixes to the calendar year issues of Report FT 110, *United States Imports of Merchandise for Consumption*, beginning with the issue for 1954. Explanations of the sampling procedures are given in the *Quarterly Summary of Foreign Commerce of the United States* and in Report FT 110, *United States Imports of Merchandise for Consumption*.

Export data are compiled by the Bureau of the Census from Shippers' Export Declarations which exporters are required to file with Collectors of Customs for each shipment leaving the United States. Export data include shipments made after World War II under the Department of the Army Civilian Supply Program only for 1948 and subsequent years. In addition, export data include United States exports under the Lend-Lease, United Nations Relief and Rehabilitation Administration, Economic Cooperation Administration, Mutual Defense Assistance, and other mutual security programs. Shipments to United States Armed Forces for their own use are not included in export statistics for any period.

Export value figures are based on the selling price (or on the cost, if not sold) of the commodity shipped and include inland freight, insurance, and other charges to place of export. Transportation and other costs beyond the United States port of exportation are excluded. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited (for statistical purposes) to the country to which it is consigned.

Certain export commodity classifications were grouped for security reasons into special categories beginning with May 1949, with periodic amendments to include additional commodities. With the adoption of new security regulations, effective July 1950, the publication of the country of destination and Customs District detail for the special category commodities and groups was discontinued. Data for special category commodities are included, however, in all total export statistics.

Shipments individually valued at less than \$100 are not classified by commodity, but are reported in a single separate category. Effective with the statistics for July 1953 and continuing through December 1955, data for export shipments individually valued from \$100 to \$499 (about 4 to 6 percent of the total export value) were estimated on the basis of a 10-percent sample. From January through June 1956, the 10-percent sample was applied to shipments individually valued from \$100 to \$999 but, subsequently, the level was reduced to the previous level of \$499. Details concerning sampling error and procedures are given in the *Quarterly Summary of Foreign Commerce of the United States* and Report FT 410, *United States Exports of Domestic and Foreign Merchandise*.

Except as noted, the values stated are in United States dollars without reference to changes in the gold content of the dollar. (Between March 10, 1933, and January 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of the restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from January 1, 1935, through December 31, 1939, the Virgin Islands.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series M 1-13") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 1112.—BALANCE OF INTERNATIONAL PAYMENTS: 1920 TO 1956

13.—INTERNATIONAL INVESTMENTS—INCOME RECEIPTS AND PAYMENTS, BY AREA: 1950 TO 1956

in millions of dollars. Figures represent investment income receipts and payments abstracted from the general account of the United States balance of payments. "Direct" investments represent private enterprises in one country controlled by investors in another country or in the management of which foreign investors have an effective voice. "Other private" investments represent long-term miscellaneous holdings such as government bonds, interests in trusts and estates, or bank loans.

No. 1117.—U. S. GOVERNMENT FOREIGN GRANTS AND CREDITS, BY PROGRAM: 1945 TO 1956

[In millions of dollars. Grants and credits are generally goods delivered or shipped by, services rendered by, or funds disbursed by U. S. Government to or for account of a foreign government or other foreign entity. "Reverse grants and returns" and "Principal collected on credits" are comprised of goods, services, and funds received by U. S. Government. "Funds" includes foreign currency which, with goods and services, is measured in dollar equivalents]

Other.....	662	432	107	49	11	12	20	18	13

¹ July 1, 1945, through Dec. 31, 1956. All lend-lease and conversions of prior grants to credits are from V-J Day (Sept. 2, 1945).

² Negative entry of less than \$500,000 results from refunds of cash aid.

³ Less than \$500,000.

⁴ These "loans" are essentially transfers on an indeterminate basis, generally requiring only the return of the identical item, if available. In essence, this was the requirement pertaining to wartime lend-lease transfers of watercraft, which were included as grant transfers in these data.

⁵ Outstanding credits on Dec. 31, 1956, totaled \$11,852,000,000, representing net credits extended since organization of Export-Import Bank, Feb. 12, 1934, and excluding World War I debts and U. S. Government investment in International Bank for Reconstruction and Development, International Finance Corporation, and International Monetary Fund.

⁶ Negative entry results from excess of Bank repurchases from agent banks over agent-bank disbursements.

No. 1125.—EXPORTS AND IMPORTS OF MERCHANDISE, PER CAPITA: 1791 TO 1956

(Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively important) and for 1821 to date, on exports of United States merchandise only. Import figures for 1791 to 1820 are based on general imports; for 1821 to 1870, total imports less reexports; and for 1871 to date, imports for consumption. Beginning 1940, based on estimated population including Armed Forces overseas. (See tables 1126 and 1127.)

No. 1181.—IMPORTS—VALUE OF SELECTED COMMODITIES: 1821 TO 1956

[In thousands of dollars. For basis of dollar values, see text, p. 875. Figures represent "general imports" through 1932, "imports for consumption" thereafter. For years ending Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

¹ 1 year years through 1915, calendar years thereafter.

² General imports through 1932, imports for consumption thereafter.

³ Includes artificial silk prior to 1911.

⁴ Includes shipments under foreign aid programs such as UNRRA, Interim Aid, FCA, and FGA. Civilian supply shipments are included in 1948 and subsequent years only.

⁵ Raw silk.

¹ Beverages and, beginning 1941, exports include private relief shipments of foodstuffs.
² and figures. These figures have been erroneously identified as for 1821 in earlier issues of *Statistical*
 and in source publications.

³ July 1, 1915, to Dec. 31, 1920.

⁴ For security reasons, a small amount of semi-manufactures included with finished manufactures.

⁵ "Imports" through 1932, "Imports for consumption" thereafter.

Department of Commerce, Bureau of the Census, prior to 1947, *Foreign Commerce and Navigation of the United States* thereafter, *Quarterly Summary of Foreign Commerce of the United States*, and records.

No. 1187.—EXPORTS OF U. S. MERCHANDISE AND IMPORTS—INDEXES OF QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE: 1913 TO 1956

[1923-25 average=100. Quantity and unit value indexes were constructed on a preceding year base and chained into the series shown below. (Indexes for 1919 and 1913, however, were derived by direct comparisons of data for those 2 years, since 1914 to 1918 were omitted from the series.) The calculations were made in accordance with Fisher's "ideal formula," using both the weights of the given year and those of the preceding (or base) year. Commodities not directly entering the calculations were taken into account in the weighting, within the several economic classes of merchandise, on the basis of certain assumptions regarding similarity of their price movements to price changes of selected commodities specifically covered]

¹ Includes Greece and Turkey.² Comprises Southern, Southeastern, and Eastern Asia, and Australia and other Oceania.³ Excludes "Special Category" items. These are commodities to which restrictions apply regarding publication of detailed statistics.⁴ Data by area do not add exactly to totals shown, owing to limitations of the available estimate for low-valued shipments.⁵ Includes relatively small amounts of confectionery and distilled spirits, not classed as agricultural. Also includes relief food exports.⁶ Includes animal and vegetable oils; also a relatively small amount of essential oils, not classed as agricultural.⁷ Includes cigarettes, etc., not classed as agricultural.

LEADING COMMODITIES, BY AREAS: 1954 TO 1956

¹ Includes printing and bookbinding machinery and office appliances not shown separately.
² Minus sign (-) denotes excess of withdrawals for consumption over entries into warehouse.
³ Less than \$50,000.
⁴ Distilled spirits, imported largely from United Kingdom and Canada, were valued at \$124 million in 1953, \$126 million in 1954, \$137 million in 1955, and \$156 million in 1956.
⁵ Includes scrap.

* Effective January 1950, exports of Special Category commodities are not reported by country of destination for security reasons. Therefore, data in this table do not represent total exports to the respective countries and areas, but total exports less Special Category commodities. See July 1955 issue of *Foreign Trade Statistics Notes* for further explanation and lists of Special Category commodities.

† Sampling error is not greater than 15 to 20 percent.

‡ Sampling error is not greater than \$4,000 to \$6,000.

§ Sampling error is not greater than 5 to 10 percent.

|| Sampling error is not greater than \$11,000 to \$15,000.

¶ Less than \$500.

‡ Country designations established January 1952, data for prior years represent combined trade with East and West Germany.

(In thousands of dollars)

* Sampling error is not greater than 15 to 20 percent.

* Sampling error is not greater than \$4,000 to \$6,000.

* Sampling error is not greater than 5 to 10 percent.

* Sampling error is not greater than \$6,000 to \$8,000.

* Sampling error is not greater than 10 to 15 percent.

* Bonin Islands and Marcus Islands included with Western Pacific Islands (Oceania)

through 1953; with Nansai and Nanpo Islands, n. e. c., beginning 1954.

* Country designation established beginning January 1954. Previously designated

as Western Pacific Islands, n. e. c., but changed to reflect exclusion of Bonin Islands and

Marcus Islands.

* Less than \$500.

* July-December only.

* Country designation established beginning January 1956. Previously designated as

Anglo-Egyptian Sudan.

* Somaland included with Eastern Italian Africa prior to 1954; country designation

established January 1954.

* Eritrea included with Eastern Italian Africa prior to 1954; with Ethiopia, beginning

1954.

* Effective July 1954, Northern Rhodesia, Southern Rhodesia, and Nyasaland com-

bined under Federation of Rhodesia and Nyasaland. Prior to July 1954, Nyasaland was

included with British East Africa.

* January-June only.

DESTINATION OR ORIGIN

No. 1141.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE, BY SELECTED CUSTOMS DISTRICTS: 1860 TO 1956

[In thousands of dollars. For basis of dollar values, except export figures for 1870-78, see text, p. 871. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1923; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. In most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively.]

No. 1144.—IMPORTS OF MERCHANDISE, FREE AND DUTIABLE, AND PERCENT FREE, BY ECONOMIC CLASSES: 1821 TO 1956

[In thousands of dollars. For basis of dollar values, see text, p. 875. For years ending Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter, except as noted. Data are "general imports" through 1923, "imports for consumption" beginning 1924. Percentage free in general imports is normally slightly lower than in imports for consumption because relatively more of dutiable general imports are reported as reexported than of free general imports. Moreover, in the period 1922-1933, there is an understatement of free goods in general imports because for 1922 to 1923, carpet wool used for making carpets, and for 1922 to 1928, wheat imported for milling in bond for exports were reported as dutiable when entered, although no duty was ultimately paid on these products. See also *Historical Statistics*, series M 75-86]

Section 33

Territories, Possessions, and Other Areas Under the Jurisdiction of the United States

This section presents summary statistics on the industrial, social, and agricultural organization of the United States Territories, Alaska and Hawaii; the principal possessions, Virgin Islands, Guam, and American Samoa; the Commonwealth of Puerto Rico; and the Canal Zone. Primary sources of these data are the decennial censuses of population, housing, and agriculture, and the quinquennial censuses of business and manufactures conducted by the Bureau of the Census; the annual *Vital Statistics of the United States* issued by the National Office of Vital Statistics; the *Biennial Survey of Education* published by the Office of Education; and the *Quarterly Summary of Foreign Commerce of the United States* and *United States Trade with Puerto Rico and with United States Territories and Possessions (except Alaska and Hawaii)* issued by the Bureau of the Census. Additional information also appears in the *Minerals Yearbook* of the Bureau of Mines, *Income of Hawaii* issued by the Office of Business Economics, and the *Statistical Yearbook* published by the Bureau of Economics and Statistics of the Puerto Rico Planning Board.

Jurisdiction.—The circumstances under which the United States gained jurisdiction over its Territories, and those possessions and other areas for which statistics are included in this section, are as follows:

Alaska was acquired by purchase from Russia in 1867 and was organized as a Territory in 1912.

Hawaii, by voluntary action, ceded its sovereignty to the United States in 1898 and was organized as a Territory on June 14, 1900.

The islands of Puerto Rico and Guam were surrendered by Spain to the United States in October 1898, and were ceded to the United States by the Treaty of Paris, signed December 10, 1898, and ratified in the following year. Puerto Rico acquired the status of a commonwealth on July 25, 1952.

The Virgin Islands, formerly known as the Danish West Indies, were acquired by the United States by purchase from Denmark in 1917.

American Samoa was acquired by the United States in accordance with a convention between the United States, Great Britain, and Germany, signed December 2, 1899, and ratified February 16, 1900.

The use, occupation, and control of the Canal Zone were granted to the United States under the terms of a treaty with the Republic of Panama, signed November 18, 1903, and ratified in the following year.

For a brief summary of the territorial development of the United States, see tables 4 and 188 in sections 1 and 6, respectively.

Population, housing, agriculture, and economic censuses.—As a result of the differences in the population and housing characteristics and the varieties of agricultural products among the Territories, possessions, etc., the presentation of census data varies among areas. The tables in this section give, as nearly as possible, comparable data for the areas. The 1950 Census of Population covered all areas; the 1950 Census

Note.—This section presents data for the most recent year or period available on June 10, 1957, when the material was organized and sent to the printer.

of Agriculture covered all areas listed above, except the Canal Zone; the 1950 Census of Housing covered only Alaska, Hawaii, Puerto Rico, and the Virgin Islands. The 1954 Censuses of Business, Manufactures, and Mineral Industries covered establishments operated in Alaska and Hawaii. Separate Censuses of Business and Manufactures were also conducted in Puerto Rico for 1954.

For definition and explanation of terms used, see section 1, Population; section 24, Agriculture—General Statistics; section 25, Agriculture—Production and Related Subjects; section 29, Construction and Housing; section 30, Manufactures; and section 31, Distribution and Services.

Commerce.—Data on foreign commerce presented here show the total foreign trade of Puerto Rico and each of the United States Territories and possessions; figures on trade with the United States separately are also presented for Puerto Rico and for certain of the possessions. The trade with foreign countries represents exports and imports through the respective customs districts and does not necessarily represent exports of commodities originating within the designated territory, commonwealth, or possession, nor imports for direct consumption within the territory, commonwealth, or possession.

Information in other sections.—In addition to the specialized statistics presented in this section there are a number of tables on Territories and possessions appearing in other sections of this volume. Thus, statistics on the Alaska Railroad are presented in section 21, Transportation, Air and Land; statistics on cane sugar production in Hawaii and Puerto Rico are given in section 25, Agriculture—Production and Related Subjects; and data on the Panama Canal are presented in section 22, Waterways, Water Traffic, and Shipping. In addition, other data are included as integral parts of many tables showing distribution by States in various sections of the *Abstract*.

No. 1147.—POPULATION CHARACTERISTICS—SUMMARY FOR ALASKA, HAWAII, PUERTO RICO, VIRGIN ISLANDS, GUAM, AMERICAN SAMOA, AND CANAL ZONE: 1930 TO 1950—Continued

ITEM	Alaska	Hawaii ¹	Puerto Rico	Virgin Islands	Guam	American Samoa	Canal Zone
SCHOOL ENROLLMENT, 1950							
Persons enrolled in school, 5 to 29 years old..	18,517	109,970	416,206	7,034	(?)	(?)	(?)
5 and 6 years.....	1,200	8,170	10,435	959	238	280	28
7 to 13 years.....	11,122	59,185	279,019	4,268	5,779	3,065	5,000
14 to 17 years.....	4,831	29,500	84,085	1,485	2,557	1,398	1,000
18 and 19 years.....	759	7,050	18,051	261	4	448	87
20 to 24 years.....	598	4,310	13,373	61	9	276	30
25 to 29 years.....	247	1,755	10,643	40	(?)	(?)	(?)
YEARS OF SCHOOL COMPLETED BY PERSONS 25 YEARS OLD AND OVER, 1950							
Total persons, 25 years old and over.....	66,576	247,490	842,266	12,396	24,853	6,253	24,000
Years of school completed:							
None: Male.....	2,203	16,400	120,540	378	905	854	33
Female.....	1,989	9,725	160,845	353	850	874	10
1 to 4 years:							
Male.....	2,681	20,940	140,332	1,286	3,102	613	1,103
Female.....	1,632	11,945	112,438	1,416	2,378	531	38
5 to 8 years:							
Male.....	11,023	38,595	108,502	2,832	4,387	1,684	6,287
Female.....	4,637	33,210	88,568	2,465	1,802	1,207	2,988
High school: ¹⁴							
Male.....	16,990	47,845	43,082	806	6,348	185	5,187
Female.....	10,687	37,665	27,757	788	1,893	65	4,154
College or more: ¹⁵							
Male.....	7,826	14,270	15,405	348	2,172	101	2,340
Female.....	5,541	13,515	13,198	248	1,084	48	1,000
Median school years completed.....	11.3	8.7	8.7	6.2	8.4	5.3	9.9

¹ Data for married couples, income of families and unrelated individuals, school enrollment and years of school completed based on 20-percent sample. ² Censuses taken in 1929 and 1939.

³ Includes population (36 in 1930; 560 in 1940) for areas enumerated with, but which do not form part of Territory of Hawaii. ⁴ Per 100 square miles.

⁵ Urban population is that living in cities, towns, or villages of 2,500 or more. The remainder is classified as rural. ⁶ Includes consensually married. ⁷ Not available.

⁸ Worked as civilians in 1949. ⁹ For Hawaii, income is for families and unrelated individuals.

¹⁰ Includes 17,989 persons with no income. ¹¹ Includes 641,508 persons with no income.

¹² Includes 6,257 persons with no income. ¹³ Median computed on basis of those persons reporting income greater than zero, excludes those reporting no income. ¹⁴ Represents persons completing 1 or more years.

¹ Full-time equivalent employment measures man-years of full-time employment of wage and salary earners and its equivalent in work performed by part-time workers. Full-time employment is defined simply in terms of the number of hours which is customary at a particular time and place.

² Per full-time civilian employee.

³ Excludes military.

¹ Value of products sold minus cost of materials, supplies, fuel, electric energy, and contract work.

² Establishments engaged primarily in the pasteurization and bottling of fluid milk were excluded from the 1949 Census of Manufactures. ³ Withheld to avoid disclosing operations of individual companies.

⁴ Data for 1954 exclude 262 small cigar manufacturing establishments with no paid employees and value added by manufacture of \$192,000. ⁵ "N. e. c." means not elsewhere classified.

Section 34

Comparative International Statistics

This section presents summary statistics on the industrial, social, and agricultural organization of the various individual nations.

The principal source for the data presented in this section is the United Nations *Statistical Yearbook, 1956*. Statistics of the individual nations may be found primarily in the official publications or compendia, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages, expressed in their own or customary units of measure. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook*, the *Demographic Yearbook*, *Population and Vital Statistics Reports* (quarterly), and the *Monthly Bulletin of Statistics*. The Statistical Office of the United Nations also publishes a *Yearbook of International Trade Statistics* and the *Statistics of National Income and Expenditure*. For foreign agricultural and labor statistics, the outstanding sources are the *Yearbook of Food and Agricultural Statistics* issued by the Food and Agriculture Organization, and the *Yearbook of Labour Statistics*, issued by the International Labour Office; both are affiliated agencies of the United Nations. These publications usually present data covering an extensive period of time, frequently up to 20 years. The *International Population Statistics Reports*, Series P-90 and P-91, issued by the Bureau of the Census also present population figures for many foreign countries.

Statistical coverage.—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown here. The list of countries included is based on the membership rosters of the United Nations and of the larger specialized agencies affiliated with the United Nations (see table 1185). In a few instances, such member countries were omitted because of an almost complete lack of data.

Statistics are shown for a standardized list of countries. No attempt was made to alter the list according to the relative standing or significance of each country with respect to each specific subject item shown. In consequence, there may be instances, with respect to certain items shown, in which one or more of the countries omitted from the list are more important, statistically, than some of the countries included. Cases of this kind are believed to be infrequent.

The items selected for presentation here are believed to be among those most significant. However, certain important items, such as those on national income, are omitted because of the inability to convert the available statistics, stated in terms of the national currencies, to meaningful consistency in United States measures. Finally, items for which figures are available for a large number of countries were favored over items for which information is scanty, in order to broaden the scope of comparison as much as possible.

Note.—This section presents data for the most recent year or period available on June 10, 1957, when the material was organized and sent to the printer.

Quality and comparability of the data.—The quality and the comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for various subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted (see table headnotes). In most instances, the data shown are for calendar years. In a number of cases, however, the 12-month totals shown do not correspond with the calendar year. Space limitations made it impracticable to present the data for a series of years except for the figures on population, agriculture, and gold and foreign exchange holdings.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give some of the qualifications attached to the figures. Limits of space made necessary some condensation and editing of the more detailed notes appearing in the source. Therefore, careful analysis is required, since, at best, many of the measures shown are merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Such differences may be attributable to the use of differing original sources, a difference in the definition of geographic limits (continental United States only, or including certain Territories and possessions), or to possible adjustments made in the United States figures by the United Nations in order to improve their comparability with figures from other countries.

Conversion factors.—To facilitate comparison in terms of familiar units, items shown in metric units in the source have been converted to U. S. equivalents by means of the conversion factors given in the *Statistical Yearbook* and shown below. Further conversion factors are presented in Appendix II, Weights and Measures, p. 963.

CONVERSION FACTORS

<i>Metric units</i>	<i>U. S. equivalents</i>

No. 1172.—AREA AND POPULATION

countries, figures are provisional. Basis and level of reliability of population estimates range from continuous population register (Scandinavian countries) and census enumerations for a recent date (countries) to non-censal counts or partial censuses (Indonesia, Iran, Lebanon, Syria, Viet-Nam) and estimates derived by other means than counting (Cambodia and Liberia). Data, in general, refer to in-area population of the present territory. Area generally includes inland waters. See text, p. 936, a) comments concerning quality of the data]

1 Italics denotes population census figure.
2 Based on 1955 or latest year available.
3 Excludes civilian citizens absent for extended periods of time; census figures exclude 435,000 (estimated) Armed Forces outside continental U. S.
4 Actually enumerated—excludes adjustment for underenumeration.
5 Unofficial estimate.
6 Excludes full-blooded aborigines.
7 Excludes Indian jungle population.
8 Includes 31,960 schedules not tabulated by sex.
9 Represents the results of the first stage of a multi-stage sample census, approximating the urban area of the Union.
10 Excludes nonresident military and shipping personnel.
11 Excludes Taiwan.
12 1948.
13 Excludes Faeroe Islands and Greenland.
14 Includes nomad Arabs estimated at 12,000 in 1937, and 55,073 in 1947, of whom 27,270 were males.
15 Excludes nomad Arabs.
16 1951.
17 Finnish nationals in Finland only; includes merchant seamen at sea.
18 Metropolitan (continental) France only.
19 Excludes the Saar.
20 Includes Armed Forces outside country.
21 Includes area of Kashmir-Jammu and a great part of Part B tribal area of Assam where no census was taken.
22 Excludes Kashmir-Jammu and tribal areas of Assam; also Karikal, Mahé, Pondichéry, and Yanaon.
23 Includes Kashmir-Jammu.
24 Includes Kashmir-Jammu, Karikal, Mahé, Pondichéry, and Yanaon.
25 Includes Netherlands New Guinea.
26 Excludes nomad population, estimated at 250,000.
27 Jewish population only.
28 Jewish population of Palestine.
29 Includes that part of former Free Territory of Trieste incorporated in Oct. 1954.
30 Includes Armed Forces and civilian retinue outside country.
31 Excludes military personnel and their families living on military installations.
32 Korean nationals only (aliens numbered 23,988 at 1955 census).
33 1949.
34 Lebanese nationals only.
35 Excludes Kashmir-Jammu, Gilgit, Baltiston, Junagadh, and Manavadar.
36 Excludes Canal Zone.
37 Includes 12,881 schedules not tabulated by sex.
38 Territory of 1923-37.
39 Includes Azores and Maderia Islands.
40 1954.
41 1952.
42 Includes Balearic and Canary Islands.
43 Excludes nomads and semi-nomads, estimated at 288,400 in 1945.
44 Excludes Walvis Bay, except for 1937.
45 Figure from 1939 census and refers to 1939 territory.
46 April 1955.
47 Excludes Channel Islands and Isle of Man.
48 Comprising former Annam, Cochín-China and Tonkin.
49 Excludes Koper and Buje, that part of former Free Territory of Trieste incorporated in 1954.

No. 1173.—VITAL STATISTICS AND NET FOOD SUPPLY

Birth rates, infant mortality rates, and death rates derived from data having complete or virtually complete coverage for many countries and incomplete coverage for others. For many countries, data are known to year of registration rather than by year of occurrence. Crude birth rate: Number of live births per 1,000 persons.

Crude death rate: Number of deaths, exclusive of stillbirths, per 1,000 persons. Infant mortality rate: Number of infants under 1 year of age per 1,000 live births. Data exclude stillbirths. Expectation of life: Average number of years (in years) of persons at birth, if subject to mortality conditions of period indicated.

Net food supply: Net supply of foodstuffs, other than alcoholic beverages, at retail level (except for meat), available within the country for human consumption. See text, p. 936, for general comments concerning quality of data. Years for which data are shown may vary from column to column and from country to country.

Letters which are not for the year shown in the "year" column are prefixed by a letter to indicate the year indicated as follows: a, 1954; b, 1953; c, 1952; d, 1951; e, 1950; f, 1949; g, 1948; h, 1947; i, 1946; j, 1945; k, 1944; l, 1943; m, 1942; n, 1941; o, 1940.

No. 1178.—VITAL STATISTICS AND NET FOOD SUPPLY—Continued

[See text, p. 936, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "year" column are prefixed by a letter to indicate the year represented as follows: a represents 1954; b, 1953; c, 1952; d, 1951; e, 1950; f, 1949; g, 1948; h, 1947; i, 1946; j, 1945; k, 1944; l, 1943; m, 1942; n, 1941; o, 1940]

COUNTRY	BIRTH AND DEATH RATES				EXPECTATION OF LIFE AT BIRTH			NET FOOD SUPPLY PER PERSON	
	Year	Crude birth rate	Crude death rate	Infant mortality rate	Period	Male	Female	Year ¹	Calories per day
Union of South Africa	1955	²⁷ 25.5	²⁷ 8.5	²⁷ 30.5	1945-47	²⁷ 63.8	²⁷ 63.3	1954	2,600
U. S. S. R.	1955	25.6	8.4	-----	1926-27	²⁸ 41.9	²⁸ 46.8	-----	-----
United Kingdom	1955	15.4	²⁸ 11.7	25.7	1954	²⁸ 67.6	²⁸ 73.1	1955/56	3,210
Uruguay	1955	12.2	7.1	60.4	-----	-----	-----	1954	2,810
Venezuela	1955	²⁸ 47.0	²⁸ 10.2	²⁸ 60.5	-----	-----	-----	1951	2,280
Yugoslavia	1955	26.7	11.4	112.6	-----	-----	-----	-----	-----

¹ Diagonal indicates 12-month period beginning in 1 calendar year, ending in the following year.
² Based on a 50-percent sample of births.
³ White population only. Data for nonwhite population: 1952 male 59.1 years, female 63.7 years; 1954 male 61.0 years, female 65.8 years.
⁴ Excludes deaths in area of war operations.
⁵ Excludes full-blooded aborigines.
⁶ Luxembourg included with Belgium.
⁷ Federal district only.
⁸ Excludes Southern Dobruja.
⁹ Certain towns only, numbering 61 and having a population of approximately 2 million.
¹⁰ Excludes Yukon and Northwest territories.
¹¹ Includes events among Canadian residents temporarily in United States; excludes events among United States residents temporarily in Canada.
¹² Excludes infants dying before registration of birth.
¹³ Excludes foreigners; also excludes events among tribal aborigines, but rates are computed on population including them, except for infant mortality.
¹⁴ Based on baptisms recorded in church registers.
¹⁵ Based on burial permits.
¹⁶ Excludes live-born infants dying within 24 hours of birth.
¹⁷ Excludes premature infants who die within 24 hours of birth.
¹⁸ Excludes Faeroe Islands.
¹⁹ Based on live births tabulated by date of occurrence.
²⁰ Excludes events in Galápagos Islands, but computed on total population except for infant mortality.
²¹ Quito only.
²² Registration area.
²³ Excludes data for States of Amjer, Assam, and Bihar.
²⁴ Estimated. Data relate to an area with 294,749,000 inhabitants at 1951 census.
²⁵ Indonesian population; Java and Madura only.
²⁶ European population only.
²⁷ Jewish population only.
²⁸ Japanese nationals only.
²⁹ Includes data for the Democratic People's Republic of Korea and the Republic of Korea (South Korea).
³⁰ Lebanese nationals only.
³¹ Includes births occurring outside country if one or both parents are listed in a Netherlands population register.
³² Includes deaths of persons outside country if listed in a Netherlands population register.
³³ Includes deaths of Norwegian residents temporarily abroad.
³⁴ Excludes tribal Indians; also Canal Zone.
³⁵ Excludes Indian jungle population.
³⁶ Excludes nomad and semi-nomad population.
³⁷ White population only.
³⁸ European part only; probably territory as of period specified.
³⁹ Excludes deaths among Armed Forces outside country.
⁴⁰ England and Wales only.

¹ 1934-38=100, except as follows: Western Germany and Greece, 1935-38; Spain, 1931-35; Australia, 1936-39; Canada, New Zealand, Union of South Africa, United States, and the South American countries, 1935-39; India and Pakistan, 1936-38; South Korea, average of 1930, 1934, 1936. Refers to crop year, beginning in year indicated, except as noted. All commodities index comprises food, fibres, tobacco, industrial oilseeds, and rubber. Food index relates to production of crops and livestock products for human consumption.

² Refers, in general, to wage earners in manufacturing (excluding public utilities, building, and other construction).

³ In many instances, represents index only for principal city (or cities) of particular country.

⁴ General wholesale price index numbers usually weighted by gross value of sales on wholesale markets.

⁵ Indexes based primarily on common shares traded on leading exchange or exchanges of each country, intended to cover representative sample of companies in manufacturing, mining, and construction fields, excluding wherever possible companies in public utilities, transportation, distribution, and finance fields.

⁶ Average of quotations for same day each week.

⁷ 1948=100.

⁸ Calendar year.

⁹ Average of weekly quotations. Gold mining excluded.

¹⁰ General index.

¹¹ Includes salaried employees except those engaged in selling and distribution.

¹² Home consumption of food, farm products, and industrial raw materials.

¹³ Average of daily quotations.

¹⁴ Magnesite mining included with manufacturing industries.

¹⁵ Includes salaried employees.

¹⁶ Includes mining.

¹⁷ Excludes rent.

¹⁸ Average of quotations for same day each month.

¹⁹ Luxembourg included with Belgium.

²⁰ June.

²¹ Less than 12 months.

²² Farm products.

²³ Includes manufactured gas.

²⁴ Home consumed goods.

²⁵ Includes public utilities.

²⁶ January-September.

²⁷ Index of total man-hours worked per day.

²⁸ Includes direct taxes.

²⁹ Average of highest and lowest quotations each month.

³⁰ Average of end-of-month quotations.

³¹ Nonmetallic mining included with manufacturing.

³² Sales of all cooperative societies representing about 33 percent of total retail trade in 1953.

³³ Groceries. Sales of the Fédération Nationale des Coopératives de Consommation.

³⁴ Producers prices of industrial products.

³⁵ General industrial index; comprises manufacturing, electricity, and manufactured gas.

³⁶ Includes electricity, manufactured gas, and steam.

³⁷ January-June.

³⁸ Establishments employing 20 or more workers, or 10 or more workers and using power.

³⁹ Food only; free market prices.

⁴⁰ Unweighted index of 44 imported items.

⁴¹ General industrial index; comprises mining and manufacturing.

⁴² Includes working proprietors. September data.

⁴³ Base: August 1953=100.

⁴⁴ Base: December 1954=100.

⁴⁵ Department stores only.

⁴⁶ Base: August-December 1953=100.

⁴⁷ Includes nonferrous metallurgy.

⁴⁸ Food, clothing, coal, and soap.

⁴⁹ Food, coal, firewood, and soap.

⁵⁰ Textiles.

⁵¹ Food, beverages, and tobacco. Sales of cooperatives excluded.

⁵² Food, soap, kerosene, and cigarettes.

⁵³ Raw materials only.

⁵⁴ General industrial index; comprises building, manufacturing, electricity, and manufactured gas.

⁵⁵ Europeans only.

⁵⁶ General industrial index.

⁵⁷ Excludes open-cast coal mining.

⁵⁸ Excludes Northern Ireland.

⁵⁹ Weights relate to 1953.

⁶⁰ General industrial index; comprises mining, manufacturing, electricity, and manufactured gas.

⁶¹ Excludes U. S. S. R., Bulgaria, China Mainland, Czechoslovakia, Hungary, Poland, Rumania, and Eastern Germany.

Source: Statistical Office of the United Nations: Statistical Yearbook.

175.—INDUSTRIAL ORIGIN OF NET DOMESTIC PRODUCT (PERCENT DISTRIBUTION)

late to net domestic product at factor cost, unless otherwise specified. Excludes factor income received and includes factor income paid to the rest of the world. Estimates are not fully uniform from country to ry in items of income covered and industrial classifications used. Some of the major differences are indi- in footnotes below. In general, "Trade" covers wholesale and retail distribution; "Transport and com- ations" includes utilities; "Public administration and defense" includes administration, defense, justice, ollice, but not public enterprises nor other services which are classified under relevant industry; category thers" comprises finance, insurance, ownership of dwellings, and personal and other services. See text, for general comments concerning quality of the data]

des all public enterprises and services; ex-
rofits of public enterprises.
des cash rents paid by business.
domestic product at factor cost.
national product at market prices.
des supplements to wages and salaries in all
s. Excludes "ownership of dwellings."
des repairs and maintenance.
des slaughtering and dairy production.
prises all services of general government.
ides income originating in public enterprises.
s domestic product at market prices.
ides transport and communications.
ides all interest and rent payments.
ides utilities. National income.
beginning October 1.
t construction on own-account.
beginning April 1.
ides banking and insurance.
ides profits of public enterprises.
djusted for stock valuation.
ides net rent of business premises.
prises all services of general government ex-
nsportation, communication, and utilities;
services of nonprofit institutions.

²⁴ Year beginning July 1.
²⁵ Includes rental of farm dwellings.
²⁶ Includes income originating from foreign trading.
²⁷ Includes hotels, restaurants, and finance.
²⁸ Includes net interest payments by public and
private enterprises to persons and abroad.
²⁹ Includes interest on consumers' debt.
³⁰ Gross national product.
³¹ Includes interest payments.
³² Includes construction.
³³ Comprises total expenditure as shown in the
budget plus product originating in public enterprises
other than transportation, communication, and
utilities.
³⁴ National income including net international
transfers.
³⁵ Includes banking, insurance, and real estate
services.
³⁶ Gross domestic product at factor cost, before stock
valuation adjustment.
³⁷ Net material product at free market prices.
³⁸ Transport only.

No. 1176.—PRODUCTION OF FARM CROPS, MEAT, AND SUGAR

[In thousands of short tons. Prewar averages have been adjusted to present territorial boundaries. Crop production data pertain to harvest of the year indicated (or to harvests continuing into the first half of the following year for Southern Hemisphere and southerly regions of Northern Hemisphere). Meat production data pertain to the calendar year. Sugar production data are for the crop year September (of year indicated) to August in most cases. See text, p. 936, for general comments concerning quality of the data]

² For 1952. ⁶ For 1954. ⁷ For 1953.
¹⁴ Excludes U. S. S. R. ²⁰ Includes North Korea.
²¹ Refers to beef and veal (including buffalo meat), pork (including bacon and ham), mutton and lamb (including goat meat). Excludes lard, tallow and offals. Figures relate to commercial and farm slaughter.
²² Beet and cane. Figures expressed generally in terms of raw sugar. ²³ Inspected production.
²⁴ Cane sugar. ²⁵ Calendar year.
²⁶ Commercial production. ²⁷ Excludes Taiwan.
²⁸ Includes production of Eastern Germany.
²⁹ White sugar refined from cane, gur, and khandsari.

³⁰ Pakistan for 1934-38 included with India.
³¹ Does not include meat equivalent of live imports.
³² White sugar. ³³ Includes chancaca.
³⁴ Centrifugal sugar.
³⁵ Excludes meat from animals slaughtered in villages (native livestock).
³⁶ Excludes meat from collective farms and home-slaughtered livestock.

No. 1177.—LABOR FORCE, ENERGY, MANUFACTURING, IMPORTS, AND EXPORT

[See text, p. 936, for general comments concerning quality of the data. Years for which data are shown from column to column and from country to country. Figures which are not for the year shown in column are prefixed by a letter to indicate the year represented as follows: a represents 1954; b, 1950; c, 1951; d, 1955; e, 1950; f, 1949; g, 1948; h, 1947; i, 1946]

COUNTRY	Year	Economi- cally active popula- tion ¹	Produc- tion of electric energy ²	Consump- tion of sources of energy (in terms of coal equiv- alent) ³	MANUFACTURING ⁴		Imports ⁷
					Establish- ments ⁵	Persons employed, total ⁶	
		1,000	1,000,000 KWH	1,000 short tons	Number	1,000	\$1,000,000
Uruguay.....	1955		a 927	2,306	d 24,296	d 180	226
Venezuela.....	1955	e 1,706	14 1,151	12,898			11 973
Yugoslavia.....	1955	b 7,838	4,340	9,172	c 1,792	c 378	441
World total.....	1955		1,869,300	2,927,900			88,200

¹ Census data. Includes unemployed, except as noted.

² Comprises utilities (publicly and privately owned) generating primarily for public use, plus industrial establishments generating primarily for own use. Data relate to production at generating centers and therefore include transmission losses.

³ Refers to gross inland consumption of commercial fuels and water power. Fuelwood and other vegetal fuels and peat omitted.

⁴ Relates to production (incl. repair work) in factories, and excludes mining, building and construction, and public utilities (gas, electricity, and water supply).

⁵ Single plants or factories. ⁶ Comprises average number of wage and salaried employees engaged in production (excl. sales and distribution staff).

⁷ Expressed in U. S. dollars and refers to merchandise including silver (exc. current silver coin), excluding gold and issued paper currency. Imports are generally valued c. i. f.; exports, f. o. b. Generally, postal and governmental trade are included, war reparations and restitutions excluded. See source publication for "general trade" or "special trade" category distinctions. Roughly half the countries fall into each category, thus affecting comparability.

⁸ 14 years old and over. ⁹ Excludes members of Armed Forces outside cont. U. S. and civilian citizens absent from country for extended periods of time.

¹⁰ Establishments employing 1 or more persons (in addition to working proprietors). Wage earners, 4-mo. average. ¹¹ F. o. b. ¹² Includes Alaska, Hawaii, Puerto Rico. ¹³ Includes foreign aid and special category military goods. ¹⁴ Public utility plants.

¹⁵ Excludes full-blooded aborigines and Armed Forces outside country. ¹⁶ Establishments employing 4 or more persons or using mechanical power.

¹⁷ Excludes working proprietors. ¹⁸ Includes foreign aid. ¹⁹ Luxembourg included with Belgium.

²⁰ 10 years old and over. ²¹ Excludes tribal Indians, Colones, Communarios, and unemployed.

²² Excludes Indian jungle population and unemployed. ²³ Production.

²⁴ Factories employing 10 or more wage earners.

²⁵ Excludes Yukon and Northwest territories.

²⁶ Includes Newfoundland. ²⁷ Excludes part-time employees, unpaid family workers, and unemployed seeking work for first time. ²⁸ 12 years old and over.

²⁹ Excludes persons seeking work for first time.

³⁰ Establishments employing 5 or more persons, having a capital of 100,000 pesos or more or production exceeding 250,000 pesos. ³¹ Includes quarrying, music, and entertainment. ³² 3 principal enterprises.

³³ Based on sample of population in private households and Armed Forces. ³⁴ Establishments employing 6 or more wage earners; excludes home workers.

³⁵ All industries; manufacturing, 97-98 percent.

³⁶ Excludes unemployed persons.

³⁷ Port of Guayaquil.

³⁸ 5 years old and over; excludes nomads.

³⁹ Establishments employing 10 or more workers. Egypt, June data. Germany, Western, includes mining. ⁴⁰ Excludes sugar and textile industries.

⁴¹ Establishments employing 5 or more persons. Sweden includes quarries.

⁴² Persons employed during one pay period, excl. unpaid workers. ⁴³ Ethiopia and Eritrea.

⁴⁴ June data. Includes more than 2,000 w sugar cane plantations. ⁴⁵ Includes unpe workers. ⁴⁶ Includes Saar.

⁴⁷ November. Establishments employing

⁴⁸ Consumption in main cities except Jacm

⁴⁹ Excludes butter and cheese factories.

⁵⁰ Excludes Kashmir-Jammu and tribal Assam. Self-supporting persons. ⁵¹ Estab employing 20 or more wage earners and using

⁵² Includes distribution staff. ⁵³ Excl trade. ⁵⁴ Consumption. ⁵⁵ Excludes oil

⁵⁶ Establishments employing 3 or more wa excludes outside piece-workers.

⁵⁷ Excludes pipeline exports of crude petro

⁵⁸ Based on sample survey; includes Arm

⁵⁹ Includes Trieste. ⁶⁰ Based on sample September. ⁶¹ Privately owned establishi

⁶² Includes public utilities. ⁶³ Man-ye

⁶⁴ Establishments employing 2 or more 1 using mechanical power.

⁶⁵ Establishments with value of products 12,000 córdobas during the year. ⁶⁶ Includ paid workers. ⁶⁷ 15 years old and over.

⁶⁸ Establishments whose wage earners ployed a total of 12,000 hours or more during

⁶⁹ Includes Svalbard. ⁷⁰ Excludes Kashm Gilgit, Baltistan, Junagadh, Manavadar, 1 Frontier Province and Armed Forces.

⁷¹ Excludes tribal Indians and Canal Zone

⁷² Panama and Colon. ⁷³ Excludes C and national exports to the Zone.

⁷⁴ Consumption in Lima and Callao.

⁷⁵ Establishments employing 8 or more

⁷⁶ Incomplete data. ⁷⁷ Establishments 5 or more wage earners; includes mining.

⁷⁸ Establishments employing 11 or more wa or having an installed capacity of more than

⁷⁹ Includes Balearic and Canary Islands, C Melilla. ⁸⁰ Bangkok and Thomburi.

⁸¹ Major industries; State and private sec hined. ⁸² Includes Basutoland, Bechuana Swaziland. ⁸³ Establishments employing persons using mechanical power.

⁸⁴ Production, partially corrected for trade

⁸⁵ 15 years old and over. Excludes Nor land. Based on 1-percent sample of censu

⁸⁶ Authorized undertakings. Self produce

⁸⁷ Establishments employing 11 or more p

⁸⁸ Excludes Indian jungle population.

⁸⁹ Federal District, State of Miranda, and pal enterprises in rest of country.

⁹⁰ Excludes parcel post.

⁹¹ Based on 2-percent sample of census retu

⁹² Includes persons under 15 years of age.

⁹³ Establishments employing 20 or more wa or having an installed capacity of 20 h. p. or

⁹⁴ Excludes U. S. S. R. and North Korea.

⁹⁵ Excludes U. S. S. R., China Mainland, and Eastern Europe.

⁹⁶ Excludes Albania, Bulgaria, China 1 Czechoslovakia, Eastern Germany, Hunga Korea, Poland, Rumania, and U. S. S. R.

¹ Excludes lignite and brown coal.
² Source presents data in metric tons. Conversion of data to barrels allows for differences in specific gravity of petroleum. Figures refer to crude petroleum including shale oil, but excluding natural gasoline.
³ Covers, as far as possible, all hydraulic cements used for construction (portland, metallurgic, aluminous, natural, etc.).
⁴ Data generally refer to iron content of marketable ores mined, including manganiferous iron ores but excluding pyrites. Data are sometimes only rough estimates obtained by applying a fixed percentage to figures for production of crude ores.
⁵ Data expressed in terms of pure (monohydrate) sulfuric acid and include sulfuric acid equivalent of oleum or "fuming" sulfuric acid.
⁶ Total production of crude steel, both ingots and steel for castings. Excludes wrought (puddled) iron.
⁷ Data represent apparent consumption (i.e., production plus imports minus exports) and do not take into account changes in stocks.
⁸ Excludes manganiferous iron ores.
⁹ Portland cement only (98.7 percent of total production).
¹⁰ Ingots only.
¹¹ Excludes natural cement.
¹² Luxembourg included with Belgium.
¹³ Excludes alloy steels.
¹⁴ Shipments. Includes Newfoundland.
¹⁵ Includes lignite.
¹⁶ Strength of acid not reported.

¹⁷ China. Represents estimated iron content of iron ore imports into Japan from China and of small production of mines under Chinese control. Excludes Manchuria.
¹⁸ Includes natural gasoline.
¹⁹ Includes wrought (puddled) iron.
²⁰ Excludes royalties in kind to the States.
²¹ Ingots and finished castings.
²² Excludes the Saar (coal, 19,102,000 tons; cement, 312,000 tons; steel, 3,489,000 tons).
²³ Includes Saar.
²⁴ Low-grade coal has been included at its hard-coal equivalent.
²⁵ Excludes issues to miners.
²⁶ Represents production of National Iranian Oil Co.
²⁷ Represents about 97-98 percent of total production.
²⁸ Svalbard; Norwegian-operated mines only.
²⁹ Includes ferro-titanium.
³⁰ Includes content of iron pyrites.
³¹ Entirely shale oil.
³² Pit head production.
³³ Great Britain only; excludes coal produced at quarries but includes open-cast coal.
³⁴ Production in Guárico and Táchira.
³⁵ Includes Cambodia and Laos.
³⁶ Excludes U. S. S. R. and China Mainland.
³⁷ Excludes U. S. S. R.
³⁸ Excludes U. S. S. R. and some small producers.

includes gold used in payment of a country's subscriptions to International Monetary Fund or International Reconstruction and Development. Reported in United States dollars at \$35 per fine troy ounce.

Foreign exchange holdings ordinarily include foreign currencies, bank deposits abroad, payment and clearing account balances, and short-term foreign bills and securities (generally those with an original maturity of 1 year or less), and, in those instances where information is available, foreign investments held by official institutions. Includes subscriptions to International Monetary Fund, drawing rights in EPU, undrawn portions of foreign currencies, and similar rights to incur foreign debts. Holdings have been converted into United States dollar equivalent value or, in absence of a par value, at official exchange rate.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund.

Includes holdings of commercial banks. Foreign exchange holdings reported on a net basis. ⁵ Estimated.

Foreign exchange holdings included with gold holdings. ⁷ Excludes small mint holdings.

Includes all United States dollars. ⁹ Beginning 1954, excludes small amounts held by the Amortization Fund.

Includes Treasury holdings. ¹¹ Holdings of the National Bank. ¹² Net holdings.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ¹⁴ Virtually all sterling.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ¹⁶ Figures relate to March 20 of the following year.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ¹⁸ Figures relate to March 20 of the following year.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ²⁰ Figures relate to March 20 of the following year.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ²² Figures relate to March 20 of the following year.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ²⁴ Figures relate to March 20 of the following year.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ²⁶ Figures relate to March 20 of the following year.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ²⁸ Figures relate to March 20 of the following year.

Includes holdings of Treasury and of gold in active portion of Stabilization Fund. ³⁰ Figures relate to March 20 of the following year.

No. 1180.—FOREIGN EXCHANGE RATES: 1952 AND 1955

[United States cents per unit of national currency. Data represent (a) domestic par values or basic official rates for countries with single rates of exchange, (b) all significant domestic selling rates (and buying rates when they differ sufficiently from selling rates) for multiple-rate countries. Data represent average of a fluctuating rate or a fixed rate in effect throughout, entire year or major part thereof. Where a rate applies to only part of the period, its time span is indicated in a footnote]

Venezuela.....	1935	315a	15,000	115,000	2,400	—	—	14,000	25
Viet-Nam.....	1935	—	11,400	11,400	1,700	—	—	—	—
Yugoslavia.....	1935	300	11,400	1,415	2,201	4,000	7,000	1,000	20
World total.....	1935	100,000	—	1,000,000	1,000,000	—	1,712,000	1,404,000	52,750

¹ Figures relate to merchant boats on June 30. They are given in gross registered tons (see text, p. 954). Only vessels of 100 gross tons and over are included. Excludes vessels without mechanical means of propulsion, but includes sailing vessels with auxiliary power. Excludes the following classes of ships, not entered in Lloyd's Register: Ships trading on Canadian lakes, wooden or composite ships trading on Great Lakes of North America.

² In general, represents sum of net registered tonnage (see text, p. 954) of seagoing foreign and domestic merchant vessels power and sailing entered with cargo from a foreign port and refer to only one entrance for each foreign voyage. Excludes, if possible, "in ballast" i. e. entering without unloading goods.

³ Represents weight of all goods including their packing, in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country in question. Excludes bunkers, ships stores, ballast, and transshipment (goods transhipped from an importing vessel to an exporting vessel). Includes goods unloaded into or loaded from bonded warehouses.

⁴ Relates to domestic and international traffic on all railway lines within each country shown, except railways entirely within an urban unit and plantation, industrial, mining, trolley and cable railways. Passenger miles include all passengers except military, government, and railway personnel when carried without revenue. Ton miles relate to freight net ton miles and include all goods whether carried by fast or ordinary trains except express traffic, mail, baggage and nonrevenue government stores.

⁵ Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

⁶ For years in which a census or registration took place, census or registration figure is shown, for other years officially estimated number of vehicles in use is shown. Includes passenger cars and commercial vehicles. Excludes trams, trolley-buses, special and government service vehicles, motorcycles, trailers, farm and road tractors. Includes Great Lakes.

⁷ U. S. customs area. Includes Great Lakes international traffic; includes Alaska, Hawaii, Puerto Rico.

⁸ Excludes goods in Transit and Department of Defense controlled imports and exports and commodities classified as "special category."

⁹ Includes Alaskan airlines.
¹⁰ Includes vessels in ballast.
¹¹ 11 months only.
¹² Includes mail and passengers' baggage.
¹³ Includes Government vehicles.
¹⁴ State railways. Full carloads only.
¹⁵ All entrances counted.
¹⁶ Excludes goods to and from bonded warehouses.
¹⁷ Excludes livestock.
¹⁸ Includes nonrevenue and nonscheduled flights.
¹⁹ May include service traffic.
²⁰ Includes service traffic.
²¹ Includes vessels trading on Great Lakes (304,303 gross tons).

²² Includes Great Lakes and St. Lawrence international traffic.

²³ Includes Newfoundland.

²⁴ Gross ton miles. ²⁵ Taiwan only.
²⁶ Excludes international ferry traffic.
²⁷ Includes Danish portion of Scandinavian Airways System.

²⁸ Includes goods imported and exported other than by sea.

²⁹ Includes passengers' baggage.
³⁰ Traffic Djibouti-Addis Ababa.
³¹ Includes bunkers and ships stores.
³² Includes nonscheduled flights for all air lines except Air France.

³³ Includes small vans.
³⁴ Excludes occupation traffic.
³⁵ Includes occupation traffic.
³⁶ Includes trolley buses.
³⁷ Part of France only.

³⁸ Includes diplomatic and foreign mission cars.
³⁹ Includes nonscheduled flights.
⁴⁰ Republic of India.
⁴¹ Includes Caspian Sea traffic.
⁴² Excludes tankers and petroleum.

⁴³ Two principal railways; including some traffic in Northern Ireland.

⁴⁴ Includes military traffic. ⁴⁵ Includes Trieste.
⁴⁶ Excludes wooden or composite ships with auxiliary power under 100 tons.

⁴⁷ Excludes military goods.
⁴⁸ Excludes civilian aid goods (1,100,000 tons).

⁴⁹ Port of Beirut only. Excludes livestock and petroleum loaded in Sidon and Tripoli (24.6 million tons). Includes coastwise shipping.

⁵⁰ Excludes livestock and express parcels.
⁵¹ Includes floating appliances when delivered without being loaded on ships.

⁵² Includes vehicles of special services.
⁵³ Includes nonmilitary government vehicles and vehicles of special services.

⁵⁴ Excludes suburban traffic. ⁵⁵ Includes Norwegian portion of Scandinavian Airways System.

⁵⁶ Includes coastwise shipping.
⁵⁷ Includes bunkers, excludes livestock.

⁵⁸ Excludes packing.
⁵⁹ Includes Balearic Islands.

⁶⁰ Includes Canary Islands, the Balearic Islands, Ceuta, and Melilla.

⁶¹ Includes Swedish portion of Scandinavian Airways System.

⁶² Includes coastwise shipping and petroleum loaded at Benise (10 million tons). ⁶³ Bangkok.

⁶⁴ Bangkok and Thonburi only.
⁶⁵ Excludes timber and livestock.

⁶⁶ Includes data for South-West Africa.
⁶⁷ Includes South-West Africa and Vryburg-Bethany line of Rhodesia railways.

⁶⁸ Excludes packing. Includes goods carried by air, rail and rail between Ireland (Rep.) and Northern Ireland.

⁶⁹ British Railways. ⁷⁰ Includes free-landed traffic.

⁷¹ Excludes Northern Ireland.
⁷² Saigon only. ⁷³ South.

⁷⁴ Excludes China Mainland and U. S. S. R.

⁷⁵ Excludes Albania, Bulgaria, China Mainland, Czechoslovakia, Eastern Germany, Hungary, North Korea, Poland, Rumania, and U. S. S. R.

⁷⁶ Excludes China Mainland and U. S. S. R.

Yugoslavia.....	1955	161	3,944	479	18	801	46	17	b 418

¹ Comprises public and private telephones (including extension instruments) connected to a central exchange. Total number of telephones in use in the world in 1955 estimated to be 101,000,000.

² Comprises generally all types of telegrams including cablegrams and radiograms, but excludes messages in transit.

³ Letters mailed for distribution within national territories. Comprises letters (airmail, ordinary mail and registered), postcards, printed matter, business papers, small merchandise samples, small packets, phonopost packets, and mail carried without charge, but excludes ordinary packages, and letters and packages with a declared value.

⁴ Publications containing general news and appearing at least four times a week; may range in size from a single sheet to 50 or more pages.

⁵ Comprises copies sold both inside and outside the country.

⁶ No adjustment made for copies sold outside the country.

⁷ Comprises stations broadcasting to the public; excludes television and service stations (e. g., aeronautical and naval stations). Data are believed to represent the number of stations but in some instances may refer to number of transmitters or of frequencies (wave lengths).

⁸ Comprises for most countries number of licenses issued for receiving sets; figures which are estimates of number of sets in use are footnoted. In general, figures should be used with considerable caution as number of licenses falls, in varying degree from country to country, to represent full number in use. Data apply to all types of receivers for radio broadcasts to the public, including loud speakers connected to a "radio redistribution system" but excluding television sets. Total number of sets in use in the world in 1955 estimated to be 290,000,000.

⁹ Figures which are estimates of number of sets in use are footnoted; all others relate to number of licenses, issued for receiving sets.

¹⁰ Includes messages to Canada, Mexico, St. Pierre, and Miquelon.

¹¹ Domestic and foreign, including ordinary packages, and letters and packages with a declared value.

¹² Includes Alaska, Guam, Hawaii, and Puerto Rico.

¹³ Includes Alaska, Hawaii, Puerto Rico, and Virgin Islands. Data relate to commercial stations actually on the air.

¹⁴ Estimated number of receivers in use. ¹⁵ Includes stations of Allied Forces.

¹⁶ All telegrams sent and received by land are counted as domestic.

¹⁷ Includes foreign letters sent and received. ¹⁸ May exclude some dailies with circulations below 15,000.

¹⁹ Taiwan only. ²⁰ Includes Faeroe Islands and Greenland. ²¹ Includes Faeroe Islands.

²² Ethiopia and Eritrea. ²³ Includes Algeria, Guadeloupe, Martinique, French Guiana, and Reunion.

²⁴ Includes Algeria. ²⁵ Includes telegrams sent to or received from Eastern Germany and Berlin.

²⁶ Excludes West Berlin. ²⁷ Excludes 1 English language daily.

²⁸ Letters carried. ²⁹ Includes Cameroons [Br.].

³⁰ Revenue telegrams only. ³¹ Includes Canal Zone. ³² Includes the Azores and Madeira.

³³ Revenue telegrams, excludes those transmitted exclusively over railway telegraph lines.

³⁴ Includes foreign telegrams sent. ³⁵ All letters sent. ³⁶ All newspapers.

³⁷ Includes 5,400,000 combined sound-television licenses.

³⁸ Southern Viet-Nam only.

No. 1188.—EDUCATION AND HEALTH

Education: Figures usually refer to both official (public) and independent (private) schools, to school year beginning in year stated, and generally exclude adult education, apprenticeship courses and correspondence schools; intercountry comparisons are subject to caution owing to variations in definitions employed and in scope of data; usually excludes (unless otherwise stated) nursery schools, kindergarten and other preschool education. **Health:** Data do not allow of a close comparison between countries which present a similar standard, whether high or low, in respect of strength and character of their medical facilities. However, they may be used to judge approximate difference in standard between advanced and less developed countries. See text, p. 936, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "year" column are prefixed by a letter to indicate the year represented, as follows: a, 1954; b, 1953; c, 1952; d, 1951; e, 1950; f, 1949; g, 1948; h, 1947.

¹ Schools providing basic training and education to children within compulsory or customary ages of full-time education, length of this education may vary from 4 to 9 years from country to country.

² Middle schools, secondary schools, high schools, providing general instruction more advanced than that given at primary level. ³ Inhabitants per physician.

⁴ Public schools only.

⁵ Includes preschool education.

⁶ Includes technical education. ⁷ Less than 500.

⁸ Government services only.

⁹ Excludes those described as not fully qualified, interns, aids, assistants, "curanderos," volunteers, and similar nonqualified personnel.

¹⁰ Registered personnel only.

¹¹ Secondary schools included with primary schools.

¹² Junior technical colleges and home science schools included with secondary schools.

¹³ Excludes teachers of religion, needlework, etc.

¹⁴ Includes kindergartens.

¹⁵ Includes evening schools.

¹⁶ Secondary and technical schools included with primary schools.

¹⁷ Includes teacher-training.

¹⁸ Excludes part-time teachers.

¹⁹ May include medical dentists.

²⁰ Active personnel only.

²¹ Medical dentists included with physicians.

²² Excludes West Berlin.

²³ Includes "new system" schools which also provide secondary education.

²⁴ Includes teachers in "new system" schools; excludes part-time teachers.

²⁵ Excludes Andra and Bombay.

²⁶ Excludes Andra.

²⁷ Includes preschool and special education.

²⁸ Includes Arabic education.

²⁹ Excludes 556,730 part-time students.

³⁰ Excludes limited physicians, dentists, and herb doctors. ³¹ Number of classes.

³² Includes technical and teacher-training.

³³ Dentists included with physicians.

³⁴ Excludes teachers of handwork, domestic science, etc.

³⁵ Excludes 53,194 pupils in continuation courses (part-time compulsory schooling).

³⁶ Includes military personnel.

³⁷ England and Wales only.

³⁸ Derived from a 1-percent sample of census returns.

¹ Calculated from official scale of assessments.
² Calculations are preliminary, subject to finally approved UN scale.
³ Computed scale as applied to actual assessments.
⁴ Budget less \$1,313,640 prior year savings plus \$2,117,000 upward adjustment in 1956 budget less \$2,531,010 estimated miscellaneous income.
⁵ Budget less an estimated miscellaneous income of \$140,000.
⁶ Budget less \$191,368 estimated miscellaneous income.
⁷ Budget less a surplus of \$2,330 from prior year, \$198,890 transfer of assets from Assembly suspense account and Publications Revolving Fund and an estimated miscellaneous income of \$154,580.
⁸ Inactive members. Scales of assessment include inactive members, even though these states have announced that they no longer consider themselves members.
⁹ Admitted to membership in late 1956. Assessments for 1957 will remain outside the 100-percent scale pending a general review of cost sharing by the Twelfth General Assembly.
¹⁰ The United States is also assessed an additional \$39,000 toward the UNESCO Working Capital Fund, due to the increase in its percentage share, and is entitled to a credit from past budgetary surpluses of \$302,647, making its net contribution for 1957 \$3,382,999.

APPENDIX I

HISTORICAL APPENDIX—INDEX TO TABLES IN WHICH *HISTORICAL STATISTICS* SERIES APPEAR

[Comprises statistical time series (identified by number) shown in the historical supplement entitled *Historical Statistics of the United States, 1789-1945* and in *Continuation to 1952 of Historical Statistics of the United States, 1789-1945*. Historical series are listed only: (1) Where comparable data are available for a year or years later than 1945; (2) where data are included in a table in this *Abstract*. In a number of instances, the listing includes series which do not appear in *Historical Statistics* but do appear in the *Continuation to 1952 of Historical Statistics*. These series, identified by an alphabetical suffix after the series number (as C 27a), are new series (indexes computed on a new base, figures significantly revised to include new elements, etc.) which replace discontinued series appearing in *Historical Statistics*. For a complete listing of *Historical Statistics* series for which data are available for the years 1946 to 1952, see the *Continuation to 1952 of Historical Statistics*]

APPENDIX II

Weights and measures

UNITED STATES UNITS WITH METRIC EQUIVALENTS

1 inch = 2.540 centimeters.	1 liquid quart = 0.9463 liter.
1 foot = 0.3048 meter.	1 gallon = 231 cubic inches = 3.785 liters.
1 yard = 0.9144 meter.	1 bushel (measured) = 2,150.4 cubic inches = 35.24 liters.
1 mile = 1.609 kilometers.	1 avoirdupois ounce = 28.35 grams.
1 square yard = 0.8361 square meter.	1 troy ounce = 31.10 grams.
1 acre = 0.4047 hectare.	1 pound = 0.4536 kilogram.
1 square mile = 2.590 square kilometers.	1 long ton = 2,240 pounds = 1.0160 metric tons of 1,000 kilograms.
1 cubic inch = 16.39 cubic centimeters.	1 short ton = 2,000 pounds = 0.9072 metric ton.
1 cubic foot = 0.02832 cubic meter.	
1 cubic yard = 0.7646 cubic meter.	

UNITED STATES GALLON AND BUSHEL WITH BRITISH EQUIVALENTS

1 United States gallon = 231 cubic inches = 0.8331 imperial gallon.	1 United States bushel = 2,150.4 cubic inches = 0.9694 imperial bushel.
---	---

OFFICIAL WEIGHTS OF THE BARREL OF NONLIQUID PRODUCTS

ITEM	Pounds	Kilograms
Wheat flour, barley flour, rye flour, and corn meal (net) ¹	196	88.90
Resin, tar and pitch (gross).....	500	226.80
Fish, pickled (net).....	200	90.72
Lime (net).....	200	90.72
Cement (4 bags counted as 1 barrel) (net) ¹	376	170.55

¹ Except as noted in the tables.

OFFICIAL WEIGHTS OF THE UNITED STATES BUSHEL

ITEM	Pounds	Kilograms
Wheat, beans, peas, potatoes (Irish or white).....	60	27.22
Rye, corn (maize), linseed (flaxseed), maslin (mixed grain).....	56	25.40
Barley, buckwheat.....	48	21.77
Onions.....	57	25.86
Rough rice.....	45	20.41
Malt.....	34	15.42
Oats.....	32	14.51
Peanuts, green, in shell.....	22	9.98
Castor beans.....	50	22.68

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

ITEM	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilo-grams	Pounds	Kilo-grams
Crude petroleum.....	7.3	3.311	306.6	139.07
Lubricating oils.....	7.0	3.175	294.0	133.36
Illuminating oils (kerosene).....	6.6	2.994	277.2	125.74
Gasoline and related products (motor spirit, benzine, etc.).....	6.1	2.767	256.2	116.21
Fuel and gas oils.....	7.7	3.493	323.4	146.69

BIBLIOGRAPHY OF SOURCES OF STATISTICS

Alphabetically arranged by subject, this bibliography contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. Non-recurrent publications presenting compilations or estimates for several years or new types of data not available in regular series are also included.

Much valuable information may also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right-hand side of each page indicate where data from the report cited appear in the *Statistical Abstract*. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. It should not be assumed that all of the subjects from the original source are summarized in the *Abstract*.

Publications listed under each subject are divided into two groups in the main: "United States Government" and "Other." The location of the publisher of each report is given except for Federal governmental agencies located in Washington.

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles. However, specific volume numbers and subtitles of the major census publications are listed at the end of the bibliography.

PUBLICATIONS OF MAJOR CENSUSES

The final reports of the 1954 Censuses of Agriculture, Business, Manufactures, and Mineral Industries are listed below, together with the final reports of the 1950 Censuses of Housing and Population. Most parts (or chapters) of a volume in this list are published as separate reports. Preliminary bulletins and advance reports which were issued are not included in the list. Certain of the 1954 final volumes listed below are still in press but will be issued during the latter part of 1957.

The *Catalog of United States Census Publications* is published quarterly and cumulated to the annual issue. A sample copy is available from the Bureau of the Census on request. The subscription price for 4 consecutive issues of the *Catalog* and 12 issues of its Monthly Supplement is \$1.00.

1954 CENSUS OF AGRICULTURE

Vol. I: Counties and State Economic Areas. Detailed statistics by counties and economic areas. Economic areas within each State comprise groups of counties having similar agricultural, demographic, and other characteristics. A series of 33 separately published parts.

Vol. II: General Report. Summary data and analyses by subjects for States, for geographic divisions, and for the United States. Subject matter chapters also issued as separate reports.

Vol. III: Special Reports.

Part 1. Multiple-Unit Operations.

Part 2. Ranking Agricultural Counties.

Part 3. Alaska, Hawaii, Puerto Rico, District of Columbia, and United States Possessions.

Part 4. Agriculture, 1954, a Graphic Summary. Three chapters published separately.

Chapter I. Land Utilization.

Chapter II. Farm Machines and Facilities.

Chapter III. Farm Tenure.

Part 5. Farm Mortgage Debt.

Part 6. Irrigation in Humid Areas.

Part 7. Popular Report of the 1954 Census of Agriculture.

Part 8. Size of Operation by Type of Farm.

Part 9. Farmers and Farm Production in the United States.

Nine chapters published separately.

Chapter I. Wheat Producers and Wheat Production.

Chapter II. Cotton Producers and Cotton Production.

Chapter III. Tobacco and Peanut Producers and Production.

Chapter IV. Poultry Producers and Poultry Production.

Chapter V. Dairy Producers and Dairy Production.

Chapter VI. Western Livestock Production.

Chapter VII. Cash Grain and Livestock Producers in the Corn Belt.

Chapter VIII. Part-Time Farming.

Chapter IX. Agricultural Producers and Production in the United States—A General View.

Part 10. Use of Fertilizer and Lime.

Part 11. Farmers' Expenditures.

Part 12. Methods and Procedures.

1954 CENSUS OF BUSINESS

Retail Trade

Vol. I: Summary Statistics.

Chapter 1. United States Summary.

Chapter 2. Sales Size.

Chapter 3. Employment Size.

Chapter 4. Single and Multiunits.

Chapter 5. Legal Form of Organization.

Chapter 6. Miscellaneous.

Chapter 7. Territories of Alaska and Hawaii.

Chapter 8. Administrative Offices, Auxiliaries, and Warehouses.

Vol. II: Area Statistics.

Wholesale Trade

Vol. III: Summary Statistics and Public Warehouses.

Chapter 1. United States Summary.

Chapter 2. Size of Wholesale Establishment or Firm.

Chapter 3. Credit, Receivables, Bad Debt Losses.

Chapter 4. Sales by Class of Customer.

Chapter 5. Warehouse Space.

Chapter 6. Commodity Line Sales.

Chapter 7. Legal Form of Organization.

Chapter 8. Petroleum Bulk Plants and Terminals.

Chapter 9. Miscellaneous.

Chapter 10. Territories of Alaska and Hawaii.

Vol. IV: Area Statistics.

Selected Service Trades**Vol. V: Summary Statistics.**

- Chapter 1. United States Summary.
- Chapter 2. Receipts Size.
- Chapter 3. Employment Size.
- Chapter 4. Single and Multiunits.
- Chapter 5. Legal Form of Organization.
- Chapter 6. Hotels and Motels.
- Chapter 7. Laundry, Cleaning, and Related Services.
- Chapter 8. Motion Pictures.
- Chapter 9. Miscellaneous.
- Chapter 10. Territories of Alaska and Hawaii.

Vol. VI: Area Statistics.**1954 CENSUS OF MANUFACTURES****Vol. I: Summary Statistics.**

- Chapter I. General Statistics.
- Chapter II. Employment and Payrolls.
- Chapter III. Size of Establishments.
- Chapter IV. Type of Organization.
- Chapter V. Manufacturers' Inventories.
- Chapter VI. Expenditures for Plant and Equipment.
- Chapter VII. Horsepower of Power Equipment.
- Chapter VIII. Fuels and Electric Energy Consumed.
- Chapter IX. Industrial Water Use.
- Chapter X. Selected Materials Consumed.
- Chapter XI. Industry Specialization of Establishments.
- Chapter XII. Selected Metalworking Operations.
- Appendix A. Industry Descriptions.
- Appendix B. Conversion of Industry Classifications from 1947 to 1954.
- Appendix C. Census Report Forms and Punch Cards.
- Appendix D. Provisions of Law Relating to 1954 Census of Manufactures.

Vol. II: Industry Statistics.

- General Statistics.
- General Statistics for 20 Major Industry Groups and 460 Individual Industries.
- Special Report—Manufacturing Activity in Government Establishments.
- Appendixes A–D. Same as in Vol. I.
- Appendix E. Alphabetic Product Index.

Vol. III: Area Statistics.

- General Statistics.
- General Statistics for Geographic Divisions.
- General Statistics for 49 States.
- General Statistics for Alaska and Hawaii.
- Appendixes A–D. Same as in Vol. I.

Indexes of Production. Manufacturing production indexes for 1954 relative to 1947, based largely on Census of Manufactures data. Indexes for total United States, for major groups, and for over 200 industries. Also, comprehensive discussion of methods and a presentation of the detailed statistics.

1954 CENSUS OF MINERAL INDUSTRIES

Vol. I: Summary and Industry Statistics. Summary statistics and details by industry and State, type of operation, and size of establishment. Chapters on individual industries or groups of related industries.

Vol. II: Area Statistics. Chapters by State showing industry statistics, county statistics, size of establishment, and water use.

17th DECENNIAL CENSUS, 1950

Housing

- Vol. I: General Characteristics. A separate bulletin is also issued for the United States, each State, and the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands of the United States. Characteristics by States, counties, standard metropolitan areas, urban places, and other constituent areas.
- Vol. II: Nonfarm Housing Characteristics. Chapters also issued as separate bulletins for the United States and the 9 geographic divisions, and for each of the 152 standard metropolitan areas of 100,000 or more inhabitants including the 106 cities of 100,000 inhabitants or more in the United States.
- Vol. III: Farm Housing Characteristics. Analytical data for the rural-farm segment of the dwelling-unit inventory; for the United States and each of the 119 economic subregions. Subregions usually are combinations of two or more counties having relatively homogeneous agricultural conditions.
- Vol. IV: Residential Financing. Financial characteristics of nonfarm mortgaged residential properties, for the United States, the 4 geographic regions, and for the 25 largest standard metropolitan areas as measured by 1940 population figures (2 parts).
Part 1. United States.
Part 2. Large standard metropolitan areas and comparable data for the United States.
- Vol. V: Block Statistics. Separate reports for each of the 209 cities in the United States which had a population of 50,000 or more inhabitants in 1940, or in a subsequent special census prior to 1950. (These bulletins *not* bound in a single publication.)

Population

- Vol. I: Number of Inhabitants. General characteristics of the population by States, counties, standard metropolitan areas, urban places, and other constituent areas. State chapters also issued as separate bulletins.
- Vol. II: Characteristics of the Population. A series of separately published parts, one for each State and the District of Columbia, a summary for the United States, and another part for the Territories and possessions. Each part comprises the following chapters: (A) Number of Inhabitants, (B) General Characteristics, and (C) Detailed Characteristics. Each of these chapters also issued separately as State bulletins.
- Vol. III: Census Tract Statistics. Selected population and housing data by census tracts. 64 separate bulletins for tracted cities. (These bulletins *not* bound in a single publication.)
- Vol. IV: Special Reports. Comprises Series P-E Bulletins including: Employment and Personal Characteristics; Occupation by Industry; Institutional Population; Marital Status; Nativity and Parentage; Nonwhite Population by Race; Persons of Spanish Surname; Puerto Ricans in Continental U. S.; State of Birth; Characteristics by Size of Place; Education.
